

D

**A study on cultivation of autologous epidermal
cells and their use as grafts for coverage of skin
ulcers and deep burn wounds**

Thesis

Submitted for Partial Fulfillment of the
M.D. Degree in
Plastic and Reconstructive Surgery

By

Abd El Aziz Hanafy Abd El Aziz Ahmed

M.B., B.Ch., M.Sc.

Supervised By

Prof. Dr. Hassan A. Badran

*Prof. of Plastic Surgery & Head of
General Surgery Depts.
Faculty of Medicine
Ain Shams University*

Prof. Dr. Ali Khalifa

*Prof. of Biochemistry & Head of
Oncology Diagnostic Unit
Faculty of Medicine
Ain Shams University*

Prof. Dr. Cynthia Luz Marcelo

*Research Scientist
Plastic Surgery Department
Faculty of Medicine
University of Michigan*

Prof. Dr. Talaat M. El Deeb

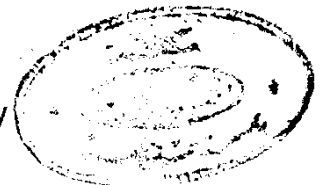

*Professor of Pathology
Faculty of Medicine
Ain Shams University*

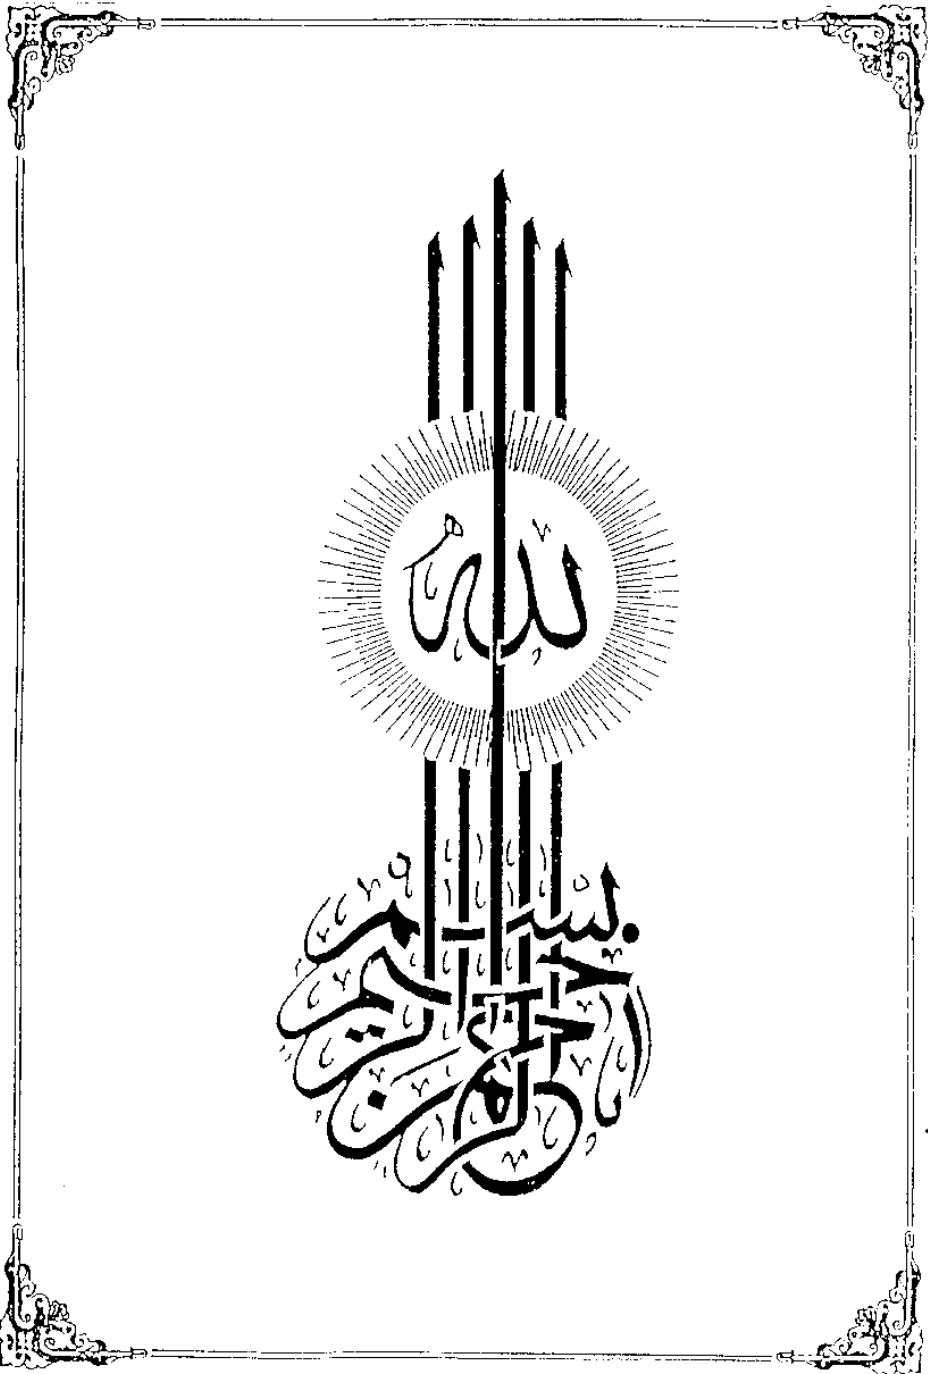

Dr. Esam Ahmed Mady

*Lecturer of Biochemistry
Faculty of Science
Ain Shams University*

**Faculty of Medicine
Ain Shams University**

Acknowledgement

I would like to express my sincere appreciation to **Prof. Dr. Hassan A. Badran**, Professor of Plastic Surgery and Head of General Surgery Departments, Ain Shams University, for his continuous guidance and support throughout the course of this work.

I am very grateful to **Prof. Dr. Cynthia L. Marcelo**, who taught me the art of tissue culture and provided all the facilities used to implement the experimental part of this work.

I owe much to **Prof. Dr. Ali Kalifa**, Prof. of Biochemistry, Ain Shams University, for his valuable supervision and starting the experimental trials in his tissue culture laboratory.

I would like to thank all the people who helped me to complete this thesis, **Prof. Dr. David Smith Jr**, Prof. of Plastic Surgery, **Mrs. Rhodes** and **Mrs. Zuccaro**, from the University of Michigan. and **Prof. Dr. Talaat A. El-Deeb**, Prof. of Pathology and **Dr. Esam A. Mady**, Lecturer in Biochemistry, from Egypt.

LIST OF TABLES

Tab. No.	Title	Page
1	Clinical data of patients with chronic leg ulcers	50
2	Clinical data of burned patients	54
3	In vitro growth characteristics of cultured keratinocytes	58
4	Effect of serum on cultured keratinocytes	68
5	Effects of cholera toxin on cultured keratinocytes	70
6	Comparison between the cholera toxin-free and cholera toxin-containing medium on cultured keratinocytes	71
7	Replacement of BPE by b.FGF	73
8	Effects of K-CMs on cultured keratinocytes	75
9	Clinical response of chronic leg ulcers to cultured keratinocytes	78
10	Summary of the outcome of treatment of chronic leg ulcers by cultured keratinocytes	80
11	Burned patients (control group)	84
12	Burned patients (Autologous keratinocytes)	86
13	Burned patients (Allogenic keratinocytes)	88
14	Studies on treatment of chronic leg ulcers by cultured keratinocytes	108
15	Egyptian experience in treatment of burns by cultured keratinocytes	124

LIST OF FIGURES

Fig. No.	Title	Page
1	P2 confluent keratinocyte culture	59
2	Cultured epidermal sheet	60
3	P2 cultured melanocytes (DOPA stain)	62
4	P2 cultured melanocytes-indirect immunofluorescent stain	63
5	Cultured epidermal graft (DOPA stain)	65
6	Mixed melanocyte-keratinocyte epidermal graft (DOPA stain)	66
7	Chronic leg ulcer before treatment with cultured keratinocytes	82
8	Chronic leg ulcer after treatment with cultured keratinocytes	83
9	Burned patient treated with meshed skin graft	89
10	Cultured allogenic keratinocytes on-lay	90
11	The outcome of treatment by cultured allogenic keratinocytes	91
