

# MANAGEMENT OF COLORECTAL CARCINOMA

*Thesis Submitted for the Partial Fulfillment of the Master Degree  
in Radiation Oncology and Nuclear Medicine*

By

**Khalid El-Hoseiny Nasr**

*M.B., B.Ch.*

Supervised by

***Dr. Soheir Sayed Ismail***

Assistant Prof. of Radiation Oncology & Nuclear Medicine  
Faculty of Medicine-Ain Shams University

***Prof. Dr. Laila Faris Matta***

Professor and Head of Radiation Oncology & Nuclear  
Medicine Dept.

Faculty of Medicine-Ain Shams University

***Dr. Mohamed Essam Saleh***

Lecturer of Radiation Oncology & Nuclear Medicine  
Faculty of Medicine-Ain Shams University

**Faculty of Medicine  
Ain Shams University  
1998**

بِسْمِ اللَّهِ الرَّحْمَنِ الرَّحِيمِ

**قالوا سبحانك لا علم لنا إلا ما علمتنا،  
إنك أنت العليم الحكيم**

صدق الله العظيم

سورة البقرة- الآية: ٣٢

*To My Parents*

## *Acknowledgment*

*First of all, thanks to God; without his help this work could not be completed.*

*I would like to thank Dr. Soheir Sayed Ismail, Assistant Prof. of Radiation Oncology & Nuclear Medicine, Faculty of Medicine-Ain Shams University, for her kind help, meticulous supervision and continuous support and guidance throughout this work,*

*Also, I would like to express my gratitude to Prof. Dr. Laila Faris Matta, Professor and Head of Radiation Oncology & Nuclear Medicine Dept., Faculty of Medicine-Ain Shams University, for her fruitful encouragement, vast knowledge and valuable advises throughout the whole work,*

*Last but not least, I would like to thank Dr. Mohamed Essam Saleh, Lecturer of Radiation Oncology & Nuclear Medicine, Faculty of Medicine-Ain Shams University for his priceless efforts, continuous support and encouragement during this work,*

*Khaled El-Hoseiny*

## List of Figures

	<b>Page</b>
• Fig. (1):Anatomic segments and vascular supply to colon and rectum	5
• Fig. (2): Divisions of the rectum	6
• Fig. (3): Lymphatic drainage of the colon and rectum	8
• Familial adenomatous polyposis	16
• Fig. (5): Tubular adenoma	24
• Fig. (6): Tubulovillous adenoma	24
• Fig. (7): Adenoma carcinoma sequence	25
• Fig. (8): Adenocarcinoma of the cecum	30
• Fig. (9): Adenocarcinoma of the rectum	31
• Fig. (10):Adenocarcinoma of the colon	32
• Fig. (11): Adenocarcinoma (Histopathology)	34
• Fig. (12): Composition of various pathologic staging systems	41
• Fig. (13): Adenocarcinoma of the cecum, barium enema	56
• Fig. (14): Adenocarcinoma of the cecum, endoscopic view	58
• Fig. (15): CT scan of primary rectal carcinoma	59
• Fig. (16): Recurrent appendiceal carcinoma, CT scan plus radioimmunoscintigraphy	66
• Fig. (17): Surgical resection of colon cancer	70
• Fig. (18): Application of contact X-ray therapy	99
• Fig. (19): Steel fork pre-loaded with <sup>192</sup> -Ir inserted in the rectal wall	100
• Fig. (20): Isodose distribution curves of external beam irradiation by arc rotation	102
• Fig. (21): Belly board with an opening	106
• Fig. (22): Radiation treatment fields	109
• Fig. (23): Treatment plan using three field technique	112
• Fig. (24): Treatment volume, simulator film	113
• Fig. (I): Disease-free survival of all patients	156
• Fig. (II): Overall survival of all patients	156
• Fig. (III): Rectosigmoid carcinoma, barium enema	157
• Fig. (IV): Postoperative four-field technique, simulator film	157
• Fig. (V): Isooise contour, three field technique, for a patient with cancer rectum	158
• Fig. (VI): Lung metastasis, chest X-ray film	158

## List of Tables

	<b>Page</b>
• Table (1): Cancers of colorectum, frequency, sex ratio and mean age	12
• Table (II): Clinical features of inherited cancer syndrome	18
• Table (III): Incidence of cancer in polyps	23
• Table (IV): Classification of large bowel tumors	28
• Table (V): Histopathological typing of colorectal carcinoma	33
• Table (VI): AJCC/UTCC staging classification	43
• Table (VII): Symptoms of colorectal cancer	46
• Table (VIII): Anatomical resection of colon cancer	71
• Table (IX): Adjuvant chemotherapy in colon cancer	90
• Table (X): Adjuvant chemotherapy in rectal cancer	91
• Table (XI): Complications of antitumoral chemotherapy	93
• Table (XII) Selection factors for endocavitary radiation therapy for rectal cancer	97
• Table (XIII): Acute radiation morbidity criteria	115
• Table (1): Protocol of FAM regimen as adjuvant therapy in colorectal cancer	136
• Table (2): Age grouping of all patients	137
• Table (3): Sex distribution	137
• Table (4): Primary site affected	138
• Table (5): Site distribution within the colon	138
• Table (6): Past history	139
• Table (7): Duration of complaint	139
• Table (8): Alteration in bowel habits as a presenting symptom	140
• Table (9): Abdominal pain as a presenting symptom	140
• Table (10): Bleeding per rectum as a presenting symptom	140
• Table (11): Intestinal obstruction as a presenting symptom	140
• Table (12): Abdominal mass a presenting symptom	141
• Table (13): Non-specific symptoms	141
• Table (14): Type of alteration in bowel habit	141
• Table (15): Loss of weight as a presenting symptom	142
• Table (16): Gross pathology	143
• Table (17): Histological type	143
• Table (18): Lymph node involvement	143

• Table (19): Grade of adenocarcinoma	144
• Table (20): Stage of tumor	144
• Table (21): Type of operation	145
• Table (22): Type of adjuvant chemotherapy in both groups	145
• Table (23): Mean age in both groups	146
• Table (24): Sex distribution in both groups	146
• Table (25): Primary site affected in both groups	146
• Table (26): Stage of tumor in both groups	146
• Table (27): Lymph node affection in both groups	147
• Table (28): Histological type of the tumor in both groups	147
• Table (29): Grading of adenocarcinoma in both groups	147
• Table (30): Acute radiation complications in both groups	148
• Table (31): Late radiation complications in both groups	149
• Table (32): G.I. complications in both groups	149
• Table (33): Bone marrow suppression in both groups	150
• Table (34): Mucositis in both groups	150
• Table (35): Comparison of the mean CEA level in both groups	150
• Table (36): CEA level in both groups	151
• Table (37): Recurrence in both groups	152
• Table (38): Site of recurrence	152
• Table (39): Impact of histopathological type on recurrence in group I	153
• Table (40): Impact of histopathological type on recurrence in group II	153
• Table (41): Impact of lymph node involvement on recurrence in group I	153
• Table (42): Impact of lymph node involvement in group II	153
• Table (43): Impact of stage of the tumor on recurrence in group I	154
• Table (44): Impact of stage of the tumor on recurrence in group II	154
• Table (45): Impact of the grade of the tumor on recurrence in group I	154
• Table (46): Impact of the grade of the tumor on recurrence in group II	154
• Table (47): Impact of CEA level on recurrence in both groups	155
