

**DEVELOPMENT OF EMISSION SPECTROMETRIC  
METHOD FOR THE DETERMINATION OF RARE  
EARTH ELEMENTS IN BLACK SANDS**

580  
S.A.

Thesis

Submitted for degree of master of science

(Physics)

by

**Samira Abd El Mongy Ahmed**

Supervising committee

**Prof. Dr. A. B. El-Bialy**

Head of Physics Department

Faculty of Girls for Art, Science

and Education,

Ain Shams University

**Prof. Dr. M. A. El**

Spectroscopy Department

Physics Division

National Research Centre

**Dr. Zeinab El-Sayed Abd El-Aziz**

Assistant Prof. Spectroscopy Department - Physics Division

National Research Centre

1995

Ain Shams University  
Faculty of Girls  
For Art, Science and Education

Name of Student : **Samira Abd El Mongy Ahmed**  
Title of Thesis : Development of Emission Spectrometric  
Method for the Determination  
of Rare Earth Elements in Black Sands

Supervising Committee

\* **Prof. Dr. A. B. El-Bialy**

Head of Physics Department - Faculty of Girls for Art, Science  
and Education, Ain Shams University

\* **Prof. Dr. M. A. Eid**

Spectroscopy Department - Physics Division  
National Research Centre

\* **Dr. Zeinab El-Sayed Abd El-Aziz**

Assistant Prof. Spectroscopy Department - Physics Division  
National Research Centre

Approval Stamp :

Date of Approval / /199

Approval of Faculty Council

Approval of University Council

Name of Student : **Samira Abd El Mongy Ahmed**  
Scientific Degree : Bachelor of Science  
Department : Physics  
Name of Faculty : Faculty of Girls  
University : Ain Shams  
Graduation Date : May 1990  
Academic Scholarship :

## ACKNOWLEDGEMENT

*Thanks to God for helping me to complete this work.*

*I would like to express my sincere thanks to those who supervised my work:*

***1) Prof. Dr. Aida El Bialy***

*Head of Physics Department, Faculty of Girls for Art, Science and Education, Ain Shams University.*

***2) Prof. Dr. Mohamed A. Eid.***

*Spectroscopy Department, Physics Division, National Research Centre.*

***3) Dr. Zainab El Sayed***

*Spectroscopy Department, Physics Division, National Research Centre.*

*I am also indebted to Dr. Ahmed Mahdy, Physics Department, Al-Azhar University, for valuable discussions during the progress of this work.*

*I would like to extend my gratitude to the following authorities :*

***1) Physics Department, Faculty of Girls for Art, Science and Education, Ain Shams University.***

***2) National Research Centre.***

LIST OF FIGURES . . . . .	
ABSTRACT . . . . .	
SUMMARY . . . . .	i
CHAPTER I	
INTRODUCTION . . . . .	1
Aim of the Present Work . . . . .	4
CHAPTER II	
REVIEW ON PLASMA SOURCES AND THEIR APPLICATIONS FOR THE DETERMINATION OF REE IN DIFFERENT	
MATERIALS . . . . .	6
2.1. Direct Current Plasmas . . . . .	7
2.1.1. Stabilized d. c. arcs . . . . .	8
2.1.2. D.C. Plasma jets . . . . .	11
2.2 Radio Frequency (RF) Plasmas . . . . .	14

2.3. Microwave Plasmas. . . . .	19
2.3.1. Capacitively coupled microwave plasma (CMP). . . . .	20
2.3.2. Microwave induced plasmas (MIP). . . . .	22

## CHAPTER III

### THEORETICAL BASIS OF SPECTROSCOPIC PLASMA

DIAGNOSTICS. . . . .	26
3.1. Types of Radiative Transitions. . . . .	26
3.1.1. Line emission. . . . .	26
3.1.2. Free-bound transition. . . . .	27
3.1.3. Free-free transition. . . . .	28
3.2. Collisional and Radiative Processes in a Plasma. . . . .	28
3.3. Intensity of Spectral Line. . . . .	32
3.4. Models of Plasma State. . . . .	33
3.4.1 Complete thermodynamic equilibrium (CTE). . . . .	33
3.4.2. Local thermodynamic equilibrium (LTE). . . . .	36
3.4.3. Partial local thermodynamic equilibrium (PLTE). . . . .	37

3.4.4 Corona model.	38
3.5. Intensity of Spectral Line Emitted in LTE.	39
3.6. Line Profiles.	40
3.7. Line Broadening Effects.	42
3.7.1. Natural broadening.	42
3.7.2. Doppler broadening.	43
3.7.3. Pressure broadening.	44

## CHAPTER IV

EXPERIMENTAL SET UP.	48
4.1. The ICP Equipment.	48
4.1.1. The radio-frequency generator.	48
4.1.2. The load coil.	50
4.1.3. The plasma torch.	51
4.1.4. Sample introduction device, the nebulizer.	53
4.1.4.1. Pneumatic nebulizers.	56
4.2. Spectrometric System.	58
4.2.1. Illumination of the spectrometer.	59
4.2.2. Dispersive equipment.	63

4.2.3. The detector and readout system. . . . .	64
4.3. Measurement of Spectral Respons of the Spectrometric System. . . . .	66
4.3.1. Standard radiation sources. . . . .	67
4.3.1.1. Primary standard sources. . . . .	67
4.3.1.2. Secondary radiation standards. . . . .	68
4.3.1.2.1. The tungsten lamp standards. . . . .	68
4.3.1.2.2. The carbon arc standard. . . . .	69

## CHAPTER V

RESULTS AND DISCUSSIONS. . . . .	74
5.1. Development of the Inductively Coupled Plasma- Atomic Emission Spectrometric Technique for the Determination of REE in Black Sand Samples. . . . .	74
5.1.1. Optimization of the ICP-operating conditions for determination of the REE. . . . .	75
5.1.2. Samples and sample dissolution procedures. . . . .	86
5.1.3. Preparation of standards. . . . .	89
5.1.4. Study of spectral interference and selection of	

the analytical lines. . . . .	89
5.1.4.1. Study of spectral interference-selection	
of RE analytical lines . . . . .	94
5.1.5. Matrix effect-Influence of easily ionizable	
elements (Sodium) on the intensity of the	
REE spectral lines . . . . .	96
5.1.6. Analytical calibration curve. . . . .	100
5.1.7. Limits of detection. . . . .	106
5.1.8. Precision. . . . .	110
5.1.9. Correction of interference for Pr, Gd, Yb and	
Lu spectral lines. . . . .	115
5.1.10. Evaluation of the sample dissolution procedures.	120
5.1.11. Results of the analysis of the black sand samples.	122
5.2. Spectrometric Diagnostic of the ICP. . . . .	123
5.2.1. Measurement of plasma temperature. . . . .	125
5.2.1.1. Determination of the excitation	
temperature using Fe I lines. . . . .	128
5.2.1.2. Determination of the excitation	

temperature using Ar I lines. . . . .	132
5.2.2. Determination of the electron density in the ICP. . . . .	145
5.2.2.1. Measurement of electron density from the half	
width of $H_{\beta}$ spectral line. . . . .	148
5.2.3. Influence of easily ionizable element (EIE) on the	
excitation temperature and electron density. . . . .	151

## CHAPTER VI

CONCLUSIONS. . . . .	156
REFERENCES. . . . .	159

## LIST OF TABLES

Table (1): FWHM (in $10^{-3}$ nm) for spectral lines of some elements. . . . .	47
Table (2): The spectral irradiance of the standard lamp different wavelength. . . . .	72
Table (3): Operating parameters. . . . .	86
Table (4): Wavelength of analysis lines and interferents. .	97
Table (5): Limits of detection of rare earth elements. .	111
Table (6): The precision (RSD) of concentration measurments.	112
Table (7): Concentrations of the interfering elements ( $C_j$ ) in the sample solutions. . . . .	115
Table (8): Interference coefficients ( $K_{ij}$ ) for the interferents.	119
Table (9): Correction coefficient ( $\sum K_{ij} C_j$ ), uncorrected ( $A_i$ ) and corrected concentration ( $C_i$ ) of the Pr, Gd, Yb and Lu in the different sample solutions. . . . .	121
Table (10): Results obtained for REE in Rashid sample by different dissolution procedures. . . . .	122

Table (11): Results of analysis of black sand samples for REE.	124
Table (12): Wavelength, excitation energies, and log gf values for Fe I lines.	129
Table (13): Fe I excitation temperature using gf value after different authors.	133
Table (14): Fe I excitation temperature.	137
Table (15): Transition probabilities of Ar I lines.	138
Table (16): Excitation temperature using Ar I lines gA value after different authors.	141
Table (17): Excitation temperature by using Ar I lines.	142
Table (18): Results of excitation temperature $T_{exc}$ .	145
Table (19): The Half-Width of voigt profiles.	152
Table (20): Excitation temperature from Fe I lines in presence of Na in the nebulized solution.	154
Table (21): Excitation temperature from Ar I lines in presence of Na in the nebulized solution.	155
