

GENE THERAPY IN GLIOMAS

ESSAY

Submitted for Partial Fulfillment of
The Master Degree
in
GENERAL SURGERY

616.99481

H. A

Presented by
Hazem Abdalla Eltahawy
M.B., B.Ch
(Ain Shams University)

Under Supervision Of:
Prof. Dr. Adel Hussein El-Hakim
Professor of Neurosurgery
Faculty of Medicine
Ain Shams University

Dr. Mohammed Sayed Ismail
Lecturer of Neurosurgery
Faculty of Medicine
Ain Shams University

Dr. Hisham Abd Al-Salam Simry
Lecturer of Neurosurgery
Faculty of Medicine
Ain Shams University

**FACULTY OF MEDICINE
AIN SHAMS UNIVERSITY
CAIRO 1997**

بِسْمِ اللَّهِ الرَّحْمَنِ الرَّحِيمِ

﴿قَالُوا سُبْحَانَكَ لَا عِلْمَ لَنَا إِلَّا مَا عَلَّمْتَنَا

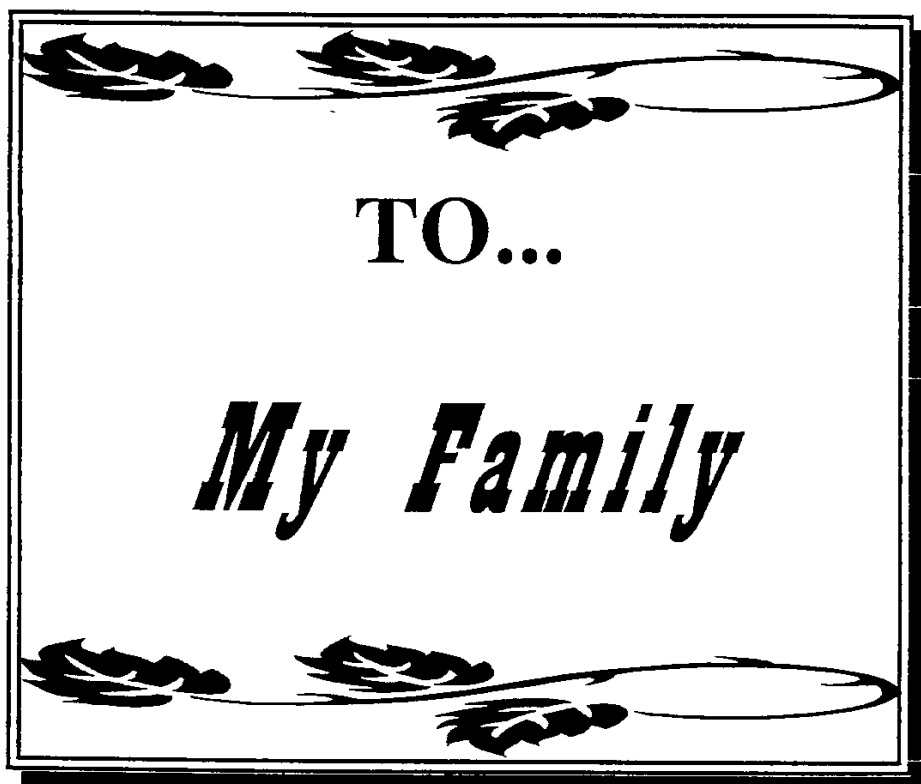

إِنَّكَ أَنْتَ الْعَلِيمُ الْحَكِيمُ﴾

صَدَقَ اللَّهُ الْعَظِيمَ

(سورة البقرة - ٣٢)

أهدي هذا العمل والجهد المتواضع للزوجة الكريمة
والأب الحبيب الذي تعلمت منه الكثير والذي
أخذ بيدي في أول خطوات التربية

عائشة العماوي
٢٠١٢/٢١

ACKNOWLEDGMENT

To the Almighty God, to Him, whose knowledge is beyond all knowledge, and to whom I relate any success in my life.

*I would like to express my deepest gratitude and appreciation to **Professor Dr. Adel Hussein El-Hakim**, Professor of Neurosurgery, Ain Shams University, for giving me this precious opportunity of working under his supervision, and for his valuable guidance, supervision and keen interest during the performance of this work.*

*I am also very grateful to **Dr. Mohamed Sayed Ismail**, Lecturer in Neurosurgery, Ain Shams University. I will always remember his kind help, and sincere advice to ensure the accuracy of this work.*

*I am also deeply indebted to the great help offered by **Dr. Hisham Simry**, Lecturer in Neurosurgery, Ain Shams University, and for his close supervision, fruitful advice and constructive criticism to fulfil this work.*

Last but not least, my deep appreciation is expressed to all my seniors and colleagues in the Neurosurgery department, Ain Shams University, and to all members of my family for their co-operation and encouragement.

CONTENTS

Part	Subject	Page
I	Introduction and Aim of the work	1
II	Discussion:	
	♦ Pathology of Gliomas	3
	♦ Biology of Gliomas	30
	♦ Management of Gliomas	51
	♦ Gene therapy in Gliomas	85
III	Summary and Conclusion	139
IV	References	141
V	Arabic summary	---

List of Figures

Fig. No.	Title	Page
1	Incidence of different primary brain tumors	3
2	Differentiation of medullary epithelium	4
3	Cerebral astrocytoma, coronal section	6
4	Low-grade astrocytoma, gross appearance	6
5	Fibrillary astrocytoma, light microscopic (L.M) appearance	7
6	Anaplastic astrocytoma L.M.	9
7	Glioblastoma multiforme, coronal section	11
8	Glioblastoma multiforme, L.M.	12
9	Giant cell astrocytoma, L.M.	15
10	Protoplasmic astrocytoma, L.M.	17
11	Gemistocytic astrocytoma, L.M.	18
12	Ependymoma of 4th ventricle, gross appearance	20
13	Ependymoma, neuroepithelial rosette, L.M.	23
14	Ependymoma, perivascular pseudo rosettes, L.M.	23
15	Oligodendroglioma, coronal section	25
16	Oligodendroglioma L.M.	26
17	Oncogenes and signal transduction	34
18	Signal transduction via ras	39
19	Tumor suppressor genes	42

20	Genetic model of progressive anaplasia in astrocytoma	46
21	Typical CT scans of low grade astrocytomas	53
22	MRI T1 scans of low grade astrocytomas	54
23	MRI scans (T2)	55
24	Glioblastoma CT scan and MRI	56
25	Percentage of glioblastoma patients surviving as a function of time and type of surgery	63
26	Typical human structural gene	85
27	Structure and replication of DNA	87
28	Normal base-pairing in DNA	88
29	Action of structural and control genes	91
30	Transcription of genetic information	93
31	Diagrammatic representation of the way in which genetic information is translated into protein	94
32	Retrovirus vector design production and gene transfer	107
33	Adenovector virus design, production and gene transfer	111
34	Representation of liposome mediated gene therapy	112
35	Subcutaneous xenograft of glioblastoma cell line in athymic mouse	117
36	Tumor infiltrating lymphocytes as vector for gene therapy	119

List of Tables

Tab. No.	Title	Page
1	Oncogenes implicated in the pathogenesis of malignant glioma	32
2	Delivery of therapy by stereotactic localization	60
