

**EFFECT OF REHABILITATION TEACHING PROGRAM
ON PATIENTS WITH ESSENTIAL HYPERTENSION**

by

IMAN ABDALLAH MOHAMED

M.Sc. in Nursing
Assistant Lecturer of M.S.N.
High Institute of Nursing
Ain Shams University

A Thesis
Submitted in Partial Fulfillment
of the Requirements for the
DOCTORATE DEGREE
in
Science of Nursing
(Medical Surgical Nursing)

UNDER THE SUPERVISION OF

Ass. Prof. Dr. TAHANY EL-SENOUSY

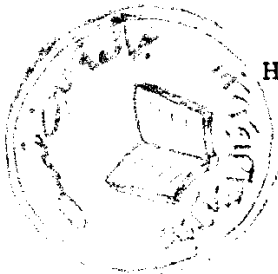

Assist. Prof. of Medical Surgical Nursing
High Institute of Nursing
Ain Shams University

Ass. Prof. Dr. IHAB MOHAMED ATTIA

Assist. Prof. of Cardiology
Faculty of Medicine
Ain Shams University

ACKNOWLEDGMENT

All praise is to Allah; "O my Lord, grant me the grace that I may thank You for the favors You have bestowed on me and on my parents and that I do such good works as may please You". (Qura'n; 46:15)

I would like to express my deepest gratitude and appreciation to **Dr. Tahany El-Senousy**, Assis. Professor of Medical-Surgical Nursing, High Institute of Nursing, Ain Shams University, for her continuous guidance, encouragement and meticulous revision of every detail of this study.

It is a real pleasure to acknowledge with gratitude the assistance and skillful guidance of **Dr. Ihab Mohamed Attia**, Assis. Professor of Cardiology, Faculty of Medicine, Ain Shams University.

I would like to thank **all my patients** for their full cooperation and understanding.

I am also indebted with appreciation to **my father, the spirit of my mother, my husband, my**

lovely daughter, and my brother who triggered off and stimulated my enthusiasm through the duration of this study and tolerated me with understanding and support at all times.

At last, one may say that without all those people, this study could not have been completed.

Table of Contents

INTRODUCTION.....	1
AIM OF THE STUDY.....	6
REVIEW OF LITERATURE.....	7
Pathogenesis of Essential Hypertension.....	9
Factors That Contribute to Essential Hypertension.....	14
1- Age:	14
2- Sex:	14
3- Race and Environment:	15
4- Obesity:	15
5- Salt Intake:	16
6- Family History:	16
7- Smoking:	17
8- Alcohol:	18
9- Emotional Stress:	20
10- Elevated Serum Lipids:	20
Clinical Manifestations of Hypertension.....	21
Complications of Hypertension.....	22
Medical Management.....	26

I- Diagnostic:	26
II- Non-Pharmacological Treatment of Hypertension:	32
Nursing Care	53
Teaching Plan for the Patient With Hypertension	56
Follow-up and Periodic Monitoring of Blood Pressure	57
<i>METHODOLOGY</i>	59
Research Setting	59
Tools	59
Subjects	63
The Pilot Study	66
The Statistical Design	66
The Administrative Design	66
<i>RESULTS</i>	68
<i>DISCUSSION</i>	88
<i>CONCLUSIONS</i>	114
<i>RECOMMENDATIONS</i>	116
<i>SUMMARY</i>	118

List of Tables

Table (1): Characteristics of the patients included in the study.	70
Table (2): Predisposing factors that precipitate essential hypertension as verbalized by patients included in the study.	71
Table (3): Unhealthy habits as verbalized by the patients prior to illness.	72
Table (4): Predisposing complaints which lead the patients to seek medical assessment.	73
Table (5): Signs and symptoms associated with blood pressure increase as prescribed by the patients.	74
Table (6): Medical management followed by the patients included in the study.	75
Table (7): Patient's developed complications in relation to duration of illness.	76
Table (8): Impact of the disease on the patients' life as verbalized by them	77
Table (9): Misconceptions related to hypertension among patients included in the study in relation to sex.	78

Table (10): Patient's mean total score of	
hypertension knowledge for both groups at	
pre/post program and follow-up period. . .	79
Table (11): Patient's total score of hypertension	
knowledge at pre/post program and follow-	
up period in relation to education for	
both groups.	80
Table (12): Patient's total score of hypertension	
knowledge at pre/post program and follow-	
up period in relation to socioeconomic	
level for both groups.	81
Table (13): Patient's mean measures of the ratio	
(W/H ²) for both groups at pre/post program	
and follow-up period.	82
Table (14): Mean measures of systolic blood pressure	
for both groups at pre/post program and	
follow-up period.	84
Table (15): Mean measures of diastolic blood pressure	
for both groups at pre/post program and	
follow-up period.	85
Table (16): Difference between both groups as regard	
to mean measures of SBP and DBP after 6	
months.	87

List of Figures

Figure (1): Patient's mean total score for both groups.....	79
Figure (2): Mean measures of the ratio (W/H^2) for both groups.....	83
Figure (3): Mean measures of systolic blood pressure for both groups.....	84
Figure (4): Mean measures of diastolic blood pressure in both groups.....	86
Figure (5): Mean measures of SBP and DBP after 6 months for both groups.....	87

LIST OF ABBREVIATIONS

BP	Blood Pressure
BMI	Body Mass Index
DBP	Diastolic Blood Pressure
HS	Highly Significant
3m	3 months
4m	4 months
6m	6 months
NS	Not Significant
Pre	Pre Program
SBP	Systolic Blood Pressure
S.D.	Standard Deviation
S.E.	Standard Error
S	Significant
W/H ²	Weight/(Height) ²
