

D

**ROLE OF TRANSVAGINAL SONOGRAPHY
IN ABNORMAL UTERINE BLEEDING
IN PERIMENOPAUSAL AND POSTMENOPAUSAL PATIENTS**

Thesis

Submitted for Partial Fulfillment of
Master Degree of Obstetrics and Gynaecology

By

Sally Ahmed Refaat Abd-El-Latif

ACKNOWLEDGEMENT

I would like to express my deepest gratitude, thanks and appreciation to Prof. Dr. Ibrahim Yassin Abou Senna, Professor of Obstetrics and Gynecology, Ain Shams University for his fatherly advice and sincere support all through supervision of this work.

Also, I would like to express my deepest gratitude and appreciation to Lecturer Dr. Alaa El-Din Abd-El-Aziz El-Gindy, lecturer of Obstetrics and Gynecology, Ain Shams University for his guidance, precious observations and effort to release this work in its present form.

Lastly but not the least, I would like to express my thanks, respect and appreciation to whole staff, members and colleagues in the Special Care Center for the Fetus and Ultrasound Unit, Ain Shams University for their help, support and it is due to their fruitful directions that this work has been brought to light.

List of Figures

	Page
Fig. (1):	Diagram explaining different parts of the vaginal probe.....39
Fig. (2):	Basic scanning directions, planes and depths achieved by moving the probe.....41
Fig. (3):	Diagrammatic representation of transvaginalsonography.....44
Fig. (4):	Approach in transvaginal scanning.....46
Fig. (5):	Uterus, endometrium and cervix.....52
Fig. (6):	Scanning planes used for transvaginal sonography of the endometrium with representative sonograms in the secretoryphase.....53
Fig. (7):	Sonographic depiction of the uterus.....56
Fig. (8):	Long. axis image of cervix.....58
Fig. (9):	Endometrialhyperplasia.....60
Fig. (10):	Transvaginal sonography of endometrial carcinoma with accompanying gross specimen.....65
Fig. (11):	Transverse scan of the uterus with a hydatidiformmole.....68
Fig. (12):	Intrauterine device bulging into the adnexa.....70
Fig. (13):	Isoechoic intramural leiomyoma.....74
Fig. (14):	Submucous myoma, transvaginal scan show as small hypoechoic myoma.....74
Fig. (15):	Longitudinal scan of the uterus.....76

	Page
Fig. (16): Right ovarian follicular cyst with thinwall.....	82
Fig. (17): Six of the many faces of the corpus luteum.....	84
Fig. (18): Polycysticovary.....	85
Fig. (19): Complex ovarian cyst: Transvaginal sonographic image showing layering of echogenic material within complex cyst....	89
Fig. (20): Two images of 63-year old patient diagnosed with stage III ovarian carcinoma.....	90
Fig. (21): Mean age in cases with post and perimenopausal bleeding.....	109
Fig. (22): Frequency distribution of studied cases according to complaint.....	110
Fig. (23): Mean endometrial thickness in cases with post and perimenopausal bleeding.....	111
Fig. (24): Endometrial pattern in studied cases.....	112
Fig. (25): Sensitivity and specificity as regards different pathological sites.....	113

List of Tables

	Page
Table (1): Age of all studied group.....	98
Table (2): Endometrial thickness.....	98
Table (3): Frequency distribution of the complaint...	99
Table (4): Uterine dimensions.....	99
Table (5): Endometrial pattern.....	100
Table (6): Myometrial thickness.....	100
Table (7): Myometrial pattern.....	101
Table (8): Focal lesions.....	101
Table (9): Cervical abnormalities.....	102
Table (10): Right ovarian size.....	102
Table (11): Right ovarian texture.....	102
Table (12): Left ovarian size.....	103
Table (13): Left ovarian texture.....	103
Table (14): Positive and negative cases according to operative findings.....	104
Table (15): Sensitivity and specificity.....	106
Chi square test to detect association between transvaginal sonographic findings, operative and histopathologic findings as regards different abnormalities in the studied sample:	
Table I : Thick endometrium.....	106
Table II : Polyp.....	107
Table III: Leiomyomas.....	107
Table IV : Adenomyosis.....	107
Table (16): Comparison between transvaginal sonography and operative findings in diagnosis of abnormal uterine bleeding...	108

List of Plates

	Page
Plate (1): Long. scan of RVF uterus with well-placed IUCD.....	114
Plate (2): Long. scan of AVF uterus showing IUCD with both anterior wall and fundal intramural myoma.....	114
Plate (3): Endometrial hyperplasia in both longitudinal and transverse scan of the uterus.....	115
Plate (4): Long. scan of the uterus showing endometrial polyp.....	115
Plate (5): Long. section of RVF uterus with posterior intramural myoma.....	116
Plate (6): Degenerated anterior wall intramural myoma in transverse scan of the uterus...	116
Plate (7): Anterior and posterior intramural myoma..	117
Plate (8): Submucous myoma.....	117
Plate (9): Subserous myoma.....	118
Plate (10): Subserous myoma with hypoechoic areas inside suggestive of degenerative changes.	118
Plate (11): Anterior intramural to submucous myoma...	119
Plate (12): Long. scan of the uterus showing cervical polyp.....	119
Plate (13): Right sided unilocular ovarian cyst, with thin wall and clear texture, cervical polyp is seen in association....	120
Plate (14): Right sided unilocular ovarian cyst, with two daughter cysts are seen inside..	120
Plate (15): Normal long. scan of AVF uterus, with multilocular ovarian cyst showing septations and turbidity.....	121
