Acknowledgment	1
Introduction and Aim of the work.....	3
1- Chapter I:	
Chronic Renal Failure (Uremic Syndrome).....	5
2- Chapter II:	
Lipoprotein Biochemistry and Metabolism.....	21
3- Chapter III:	
Lipoprotein (a) [Lp(a)].....	47
4- Chapter IV:	
Lipids and the Kidney.....	67
Subjects and Methods.....	81
Results.....	89
Discussion.....	107
Summary & Conclusion.....	111
References.....	113
Arabic summary.....	141

List Of Table

Table (1):

 Show: Physical prooperties of Plasma Lipoproteins23

Table (2):

 Show: The main function of these lipoproteins may be summarized
 in the following table.....23

Table (3):

 Show: Properties of the different apoproteins29
 present in human plasma lipoproteins

Table (4):

 Show: Classification of primary hyperlipidaemias42

Table (5):

 Show: Apo(a) phenotype frequencies and Lp(a) concentrations52
 (mean±S.D) in austrain blood donors by electroimmunoassy

Table (6):

 Show: Descriptive data of group I “HD” (No. 20)89

Table (7):

 Show: Descriptive data of group II “before starting HD” (No. 20)90

Table (8):

 Show: Descriptive data of control subjects “group III” (No.20)91

Table (9):

 Show: Comparison between quantitative clinical & Biochemical variable92
 in group I & group II (Number of valide cases in each group 20)

Table (10):

 Show: Comparison between quantitaive variables in93
 group I & group III “control”

Table (11):

Show: Comparison between quantitative variable in group II & group III "Control"94

Table (12):

Show: Correlation coefficients between Lp(a) and other variable in group I "HD"95

Table (13):

Show: Correlation coefficients between Lp(a) and other variable in96
group II "before starting HD"

Table (14):

Show: Correlation coefficients between Lp(a) and other variable in97
"control group" group III

Table (15):

Show: Student t-test as regarding TC/HDL-C ratio between group I & group II98

Table (16):

Show: Student t-test as regarding TC/HDL-C ratio between group I & group III98

Table (17):

Show: Student t-test as regarding TC/HDL-C ratio between group II & group III99

Table (18):

Show: Chi-square test for smoking by groups99

Table (19):

Show: T-test for independent samples of smoke (group I) with Lp(a)100

Table (20):

Show: T-test for independent samples of smoke (group II) with Lp(a)100

Table (21):

Show: T-test for independent samples of smoke (control) with Lp(a)101

LIST OF ABBREVIATIONS

ABP	Arterial blood pressure
BUN	Blood urea nitrogen
CE	Cholesteryl esters
CHD	Coronary heart disease
CRF	Chronic renal failure
CM	Chylomicrons
ECG	Electrocardiogram
ECG	Echocardiography
FH	Familial hypercholesterolaemia
GAG	Glycosaminoglycan
GFR	Glomerular filtration rate
HDL	High density lipoprotein
HDL-C	HDL-cholesterol
HD	Haemodialysis
HMG-CoA	Hydromethyl. Glutaryl COA reductase
NS	Highly Significant
IDL	Intermediate density lipoproteins
JG	Juxta-glomerular

List of Abbreviations

LCAT	Lesithin cholesterol acyltransferase
LDL	Low density lipoproteins
Lp(a)	Lipoprotein (a)
LPL	Lipoprotein Lipase
MC	Macrophage
NS	Non significant
SLE	Systemic lupus erythematosus
SD	Standard deviation
TGF- β	Transforming growth factor-beta
TG	Triglycerides
VHS	Very Highly Significant
VLDL	Very Low density lipoprotein

Table (22):

Show:Chi-square test for Echo by groups.....101

Table (23):

Show:T-test for independent samples of Echo (group I) with $L_p(a)$102

Table (24):

Show:T-test for independent samples of Echo (group II) with $L_p(a)$102

Table (25):

Show:The relation between $L_p(a)$ and variable Aetiology group I103

Table (26):

Show:The relation between $L_p(a)$ and aetiology in group II.....103

Table (27)

Show:Chi-square test for aetiology by group.....104

Table (28)

Show:Chi-square test for HTN by groups.....104

Table (29)

Show:Diagnostic performance of $L_p(a)$ in the diagnosis of early atherosclerosis.....105

ACKNOWLEDGMENT

I am greatly honoured to express my sincere and deep gratitude to **Dr. Ahmed Abd El-Kader**, Assistant professor of internal medicine and nephrology, Ain Shams University, For his maximum accuracy and continuous advise throughout the whole work.

My deep appreciation and gratitude also for **Dr. Nashwa Ahmed Abdel El-Badawi**, Assistant professor of clinical pathology, Ain Shams University, for her valuable unlimited help and her tolerance in affording me much of her time during this work.

I would like to express my thanks and gratitude to **Dr. Eman Anour El-Azab**, Lecture of internal Medicine & Nephrology, Ain Shams University for her Kind advise and supervision during this study.

I would also like to express my thanks and gratitude to **Dr. Essam Nour El-Dien**, Lecture of internal Medicine & Nephrology, Ain Shams University, for his kind advice.

Finally, My thanks and great appreciation are to **Dr. Suzan Said**, who provided much effort and time for conducting the Lab. Work of this study.

INTRODUCTION AND AIM OF THE WORK
