1. The first part of the document is a list of references. The references are listed in a standard format, including the author's name, the title of the work, and the publisher. The references are as follows:

THESIS
ENTITLED
Effect of Ionizing Radiation on Some Polymers

Thesis Supervisors

Approved

Prof. Dr. A. M. Rabie

Faculty of Science, Ain Shams University

Prof. Dr. A. H. Zahran.....

NCRRT, AEA

HEAD OF CHEMISTRY DEPARTMENT

Prof. Dr. F.A. FAHMY

ACKNOWLEDGMENTS

The author would like to thank Prof. Dr. Abdel Gawad Rabie, Dean of the Faculty of Science, Ain Shams University, for his capable supervision, encouragement, interest and useful discussion.

Deepest gratitude is owed to Prof. Dr. Abdel Hamid Zahran, Chairman of the National Center for Radiation Research and Technology (NCRRT), for suggesting the topic of this work, his keen enthusiasm, sincere guidance and continuous supervision that made this work possible.

Great appreciation is owed to Prof. Dr. Abdel Wahab El-Naggar, Head of Radiation Chemistry Department, NCRRT, for his sincere guidance, continuous supervision and valuable help in evaluating and presenting this work.

Great thanks are due to Dr. Kareman El-Salmawi, Radiation Chemistry Department, NCRRT, for her sincere guidance, capable supervision, assistance and valuable discussion throughout this work.

The author wishes to express his thanks to Prof. Dr. Zahera Tawfik, Head of Central Laboratories NCRRT and Dr. Lobna Abdel Wahab assistance in performing the Spectroscopic analysis, Thermal, Mechanical properties

Many thanks are due to EL-SHNTI GROUP Co for their good Cooperation, many facilities and assistance throughout this work. Also many thanks are due to Eng. Nageh Shehata and Eng. Mohamed El-Asser, Head of Laboratory in UNITED Co. for many facilities and assistance throughout this work.

Thanks are also extended to the staff and fellow colleagues of Radiation Chemistry Department for their kind help. Also many thanks are due to the staff working in irradiation source facilities for their Cooperation and assistance throughout this work.

CONTENTS

CHAPTER I

INTRODUCTION AND LITERATURE REVIEW

	Page
1.1. Ionizing Radiation.	1
1.2. Effect of Ionizing Radiation on Polymers.	3
1.3. PVC Formulation.	7
1.4. Effect of Ionizing Radiation on PVC.	21

CHAPTER II

MATERIALS AND EXPERIMENTAL TECHNIQUES

2.1. Materials.	46
2.1.1. Poly (vinyl chloride).....	46
2.1.2. Plasticizer.	46
2.1.3. Stabilizer.	46
2.1.4. Solvents and Chemical Reagents.	47
2.2. Technical Procedures.	47
2.2.1. Film Preparation.	47
2.2.2. Gamma Irradiation.	49
2.3. Analysis and Tests.	49
2.3.1. Mechanical Properties.	49
2.3.2. Spectroscopic Analysis.	52
2.3.3. Electrical Properties.	52
2.3.4. Molecular Weight Determination.	52
2.3.5. Thermogravimetric Analysis (TGA).	53

CHAPTER III

RESULTS AND DISCUSSION

	Page
3.1. Effect of Gamma Radiation on The Chemical Structure of different PVC Blends.	55
3.1.1. UV Analysis of PVC Blends with Ba-Cd Stearate.	55
3.1.2. UV Analysis of PVC Blends with Lead Compounds	60
3.1.3. IR Spectroscopic Analysis of PVC Blend with Ba-Cd Stearate and Lead Compounds.	63
3.1.4. Intrinsic Viscosity and Molecular Weight of PVC Blends with Ba-Cd Stearate.	73
3.1.5. Intrinsic Viscosity and Molecular Weight of PVC Blends with Lead Compounds.	78
3.2. The Thermal Properties of Gamma- Irradiated of PVC Blends.	82
3.2.1. Thermal Decomposition Behaviour of PVC Blends with Ba-Cd Stearate.	83
3.2.2. Thermal Decomposition Behaviour of PVC Blends with Lead Compounds.	93
3.3 Mechanical Properties of Gamma Irradiated PVC Blends.....	104
3.3.1. Stress -Strain Behaviour of PVC Blends with Ba-Cd Stearate.	104
3.3.2. Stress-Strain Behavior of PVC Blends with Lead Compounds.	110
