بِسْمِ اللَّهِ الرَّحْمَنِ الرَّحِيمِ
﴿سَنُرِيهِمْ ءَايَاتِنَا فِي الْأَفَاقِ وَفِي أَنْفُسِهِمْ
حَتَّى يَتَبَيَّنَ لَهُمْ أَنَّ اللَّهَ الْحَقُّ أَوَّلَمَ يَكْفِ
بِرَبِّكَ أَنَّ اللَّهَ عَلَى كُلِّ شَيْءٍ شَهِيدٌ﴾

﴿سورة فصلت، آية ٥٣﴾

the 1990s, the number of people in the UK who are employed in the public sector has increased by 1.5 million, from 2.5 million in 1980 to 4 million in 1995. The public sector has become a major employer in the UK, and its growth has been a major factor in the overall growth of the economy.

The public sector has also become a major provider of social services, and its growth has been a major factor in the overall growth of the economy. The public sector has become a major provider of social services, and its growth has been a major factor in the overall growth of the economy.

The public sector has also become a major provider of social services, and its growth has been a major factor in the overall growth of the economy. The public sector has become a major provider of social services, and its growth has been a major factor in the overall growth of the economy.

The public sector has also become a major provider of social services, and its growth has been a major factor in the overall growth of the economy. The public sector has become a major provider of social services, and its growth has been a major factor in the overall growth of the economy.

The public sector has also become a major provider of social services, and its growth has been a major factor in the overall growth of the economy. The public sector has become a major provider of social services, and its growth has been a major factor in the overall growth of the economy.

The public sector has also become a major provider of social services, and its growth has been a major factor in the overall growth of the economy. The public sector has become a major provider of social services, and its growth has been a major factor in the overall growth of the economy.

The public sector has also become a major provider of social services, and its growth has been a major factor in the overall growth of the economy. The public sector has become a major provider of social services, and its growth has been a major factor in the overall growth of the economy.

The public sector has also become a major provider of social services, and its growth has been a major factor in the overall growth of the economy. The public sector has become a major provider of social services, and its growth has been a major factor in the overall growth of the economy.

The public sector has also become a major provider of social services, and its growth has been a major factor in the overall growth of the economy. The public sector has become a major provider of social services, and its growth has been a major factor in the overall growth of the economy.

LIST OF TABLES

TITLE	PAGE
1-Modified White classification of pregnant diabetic women	8
2-National diabetes data group classification	9
3-Congenital anomalies in infants of diabetic mothers	25
4-Etiologic factors associated with diabetic embryopathy.	26
5-Descriptive data of the whole study.	83
6-Correlation between plasma glucose level and other parameters	84
7-Descriptive data of subjects with positive screening test.	85
8-Mean, SD & range of variables for subjects with -ve screening test.	86
9-Comparison between group 1 and group 2 regarding data studied.	88
10-Mean, SD & range of variables for gestational diabetic patients.	89
11-Comparison between group 1 and group 2 regarding data studied.	92

the 1990s, the number of people in the world who are undernourished has increased from 600 million to 800 million.

There are a number of reasons for this increase. One of the main reasons is that the world population has increased from 5 billion in 1989 to 6 billion in 1999. This has led to a greater demand for food, which has not been met.

Another reason is that the world's food production has not increased at the same rate as the population. This is due to a number of factors, including a lack of investment in agriculture and a focus on short-term profits.

Finally, there is a growing inequality in the distribution of food. The rich are able to afford more food, while the poor are unable to afford enough to eat.

These factors have led to a global food crisis, which is a major threat to human health and the environment.

It is essential that we take action to address this crisis. This includes increasing investment in agriculture, improving food distribution, and reducing food waste.

Only by taking these steps can we ensure that everyone has access to enough food to eat.

The world's food production has not increased at the same rate as the population. This is due to a number of factors, including a lack of investment in agriculture and a focus on short-term profits.

Acknowledgment

I wish to express my deepest gratitude and appreciation to Professor Dr. Hassanein Makhoul, Professor of Obstetrics and Gynaecology, Faculty of Medicine, Ain Shams University, to whom I am greatly indebted and much grateful for his patience, cooperation, supervision, valuable suggestion with his advice, which allowed me to go through lots of difficulties during this work.

I wish also to express my gratitude and appreciation to Dr. Maher Abd El-Razek Omran, Assistant Professor of Obstetrics and Gynaecology, Faculty of Medicine, Ain Shams University for his support and generous ideas.

I am also grateful to Dr. Sherif Abd El Khaled Akl, Assistant Professor of Obstetrics and Gynaecology, Faculty of Medicine, Ain Shams University for his support.
