بِسْمِ اللَّهِ الرَّحْمَنِ الرَّحِيمِ

قالوا سبحانك لا علم لنا

إلا ما علمتنا إنك أنت

العليم الحكيم

صدق الله العظيم

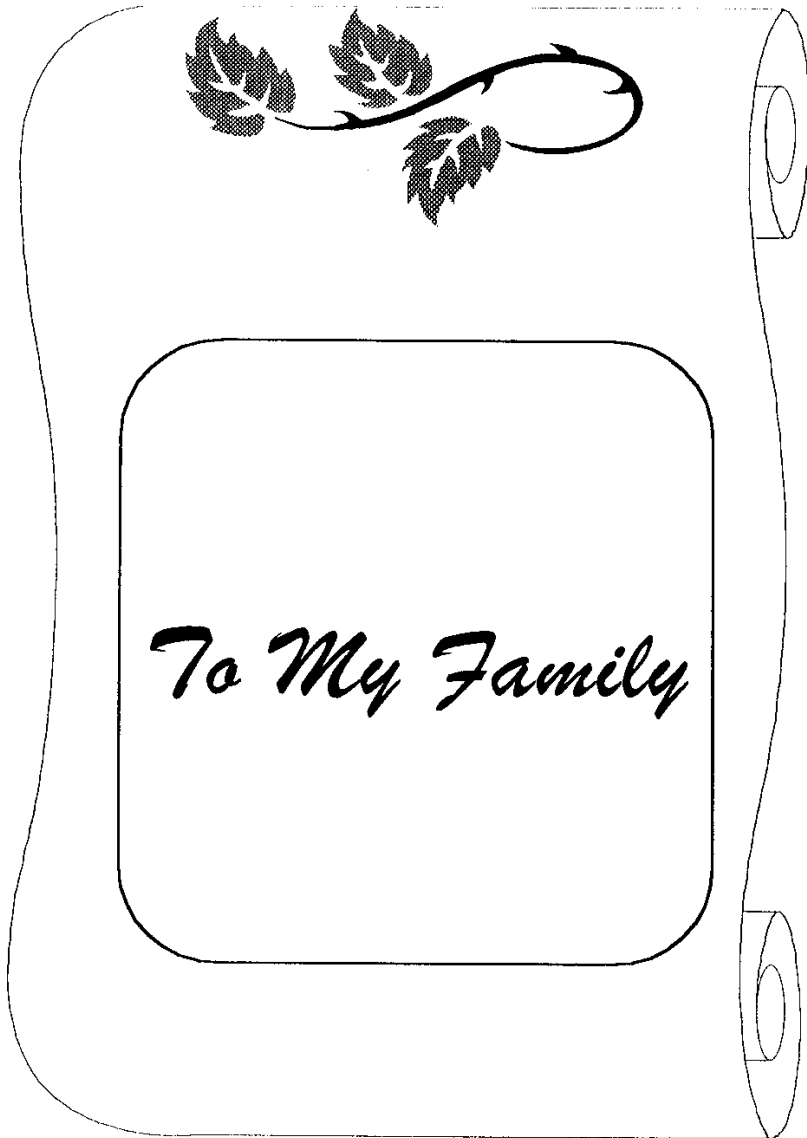

Acknowledgment

First, thanks are all due to **God** for blessing this work until it has reached its end, as a part of his generous help throughout my life.

I would like to express my deepest gratitude to **Prof. Dr. Rakia Mohamed Amin Sheir**, Professor of Anesthesia and Intensive Care, Faculty of Medicine, Ain Shams University, for her great support and continuous encouragement throughout this whole work. It is a great honor to work under her supervision.

I am truly grateful to **Prof. Dr. Mokhtar Mohamed Mahmoud El-Hakeem**, Professor of Anesthesia and Intensive Care, Faculty of Medicine, Ain Shams University, for his close supervision, sincere help, valuable suggestions and continuing encouragement throughout the whole work.

Ahmed Ibrahim

List of Contents

	PAGE
Introduction	1 – 2
Chapter (1): The Anatomy and Pathophysiology of Acute to Chronic Pain.	3 – 24
Chapter (2): Pharmacology and Mechanisms of Opioid Analgesic Activity.	25 – 43
Chapter (3): Adjuvant Drug Therapy: NMDA Receptor Antagonists.	44 – 48
Chapter (4): Morphine Metabolites.	49 – 56
Chapter (5): Cancer Pain Classification.	57 – 65
Chapter (6): Cancer Pain Management.	66 – 89
Chapter (7): Opioid Responsiveness.	90 – 101
Chapter (8): Psychomotor and Cognitive Functioning in Cancer Patients.	102 – 106
Summary	107 – 108
References	109 – 136
Arabic Summary	1 – 2

List of Tables

No.	Table	Page
Table (1):	Erlanger / Gasser classification of peripheral nerve fibers.	5
Table (2):	Opioid-receptor summary.	26
Table (3):	Endorphin synthetic pathways.	40
Table (4):	Opiate receptor types with the native / synthetic putative agonist and primary assay preparation used for study of each agonist.	41
Table (5):	Top ten pains in patients with advanced cancer at Sobell House.	57
Table (6):	Classification of cancer pain by patient type.	58
Table (7):	Types of pain and implications for treatment.	60
Table (8):	Opioid resistant cancer pain: clinical classification.	60
Table (9):	Neuropathic pain in cancer patients.	61
Table (10):	Superficial burning pain.	64
Table (11):	Factors affecting pain threshold.	65
Table (12):	Temporal classification of pain.	65
Table (13):	Problems associated with a unidimensional pain assessment.	68
Table (14):	Components of a multidimensional assessment.	68
Table (15):	Prognostic factors for poor pain control.	70
Table (16):	New Edmonton Staging System for cancer pain.	71
Table (17):	Principles for opioid treatment in cancer pain.	72
Table (18):	Opioid toxicities.	73
Table (19):	Potential application of different routes of opioid administration.	75
Table (20):	Equianalgesic doses for commonly used opiate analgesics.	83
Table (21):	Therapeutic alternatives for the management of postoperative pain in patients with chronic pain.	99

List of Figures

No.	Figure	Page
Figure (1):	Neuroanatomical pathways and neural targets involved in peripheral transmission, central processing, and descending modulation of pain.	4
Figure (2):	Rexed's laminae.	6
Figure (3):	Diagram of the relationship of excitatory neurotransmitters and opioids to activation of the dorsal horn nociceptive neuron.	8
Figure (4):	Generalized overview of opioid receptor subtypes mediating spinal analgesia.	11
Figure (5):	Postoperative reductions in lung volumes and capacities.	21
Figure (6):	An outline of pathophysiologic responses associated with surgical trauma and their impact on key target organs.	24
Figure (7):	Schematic of organization of opiate action within the periaqueductal gray.	32
Figure (8):	Schematic presents a summary of the anticipated organization of opiate receptors in the dorsal horn regulating nociceptive processing.	34
Figure (9):	Block diagram of central and peripheral pain pathways.	43
Figure (10):	Structural formula of morphine.	49
Figure (11):	Classification of pain.	59
Figure (12):	Steps in the production of pain.	67
Figure (13):	World Health Organization-advocated stepladder approach toward cancer pain relief.	81
Figure (14):	Percutaneous Silastic catheter for chronic administration of opiates into the epidural space.	86
Figure (15):	Infusaid Model 400.	87
Figure (16):	A hypothetical simplified arrangement of some of the receptors at the first central synapse in the dorsal horn of the spinal cord.	98
