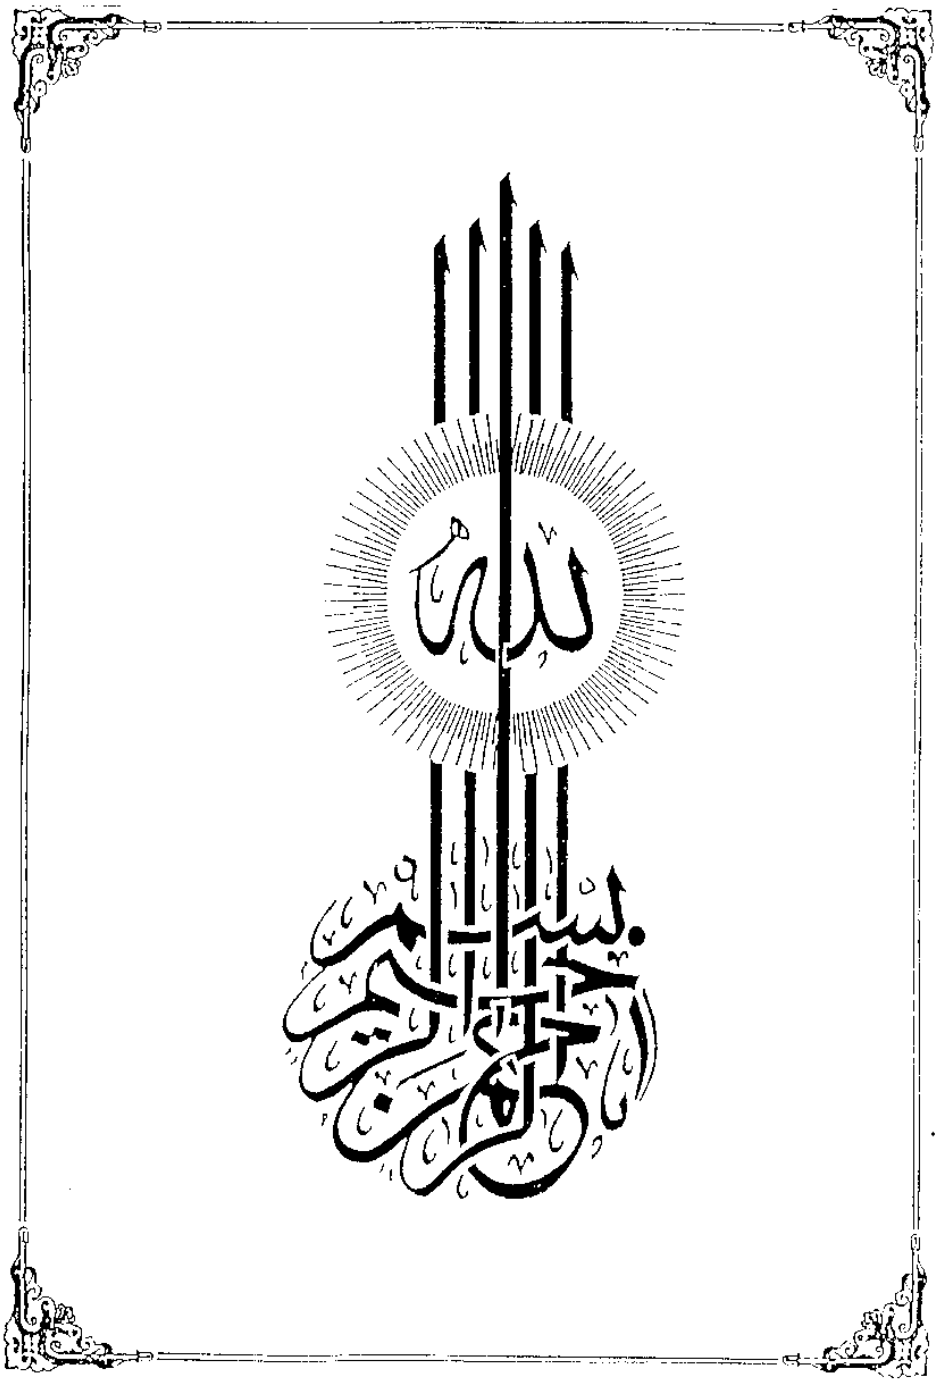
Conservative Management of Chronic Renal Insufficiency In Pediatrics

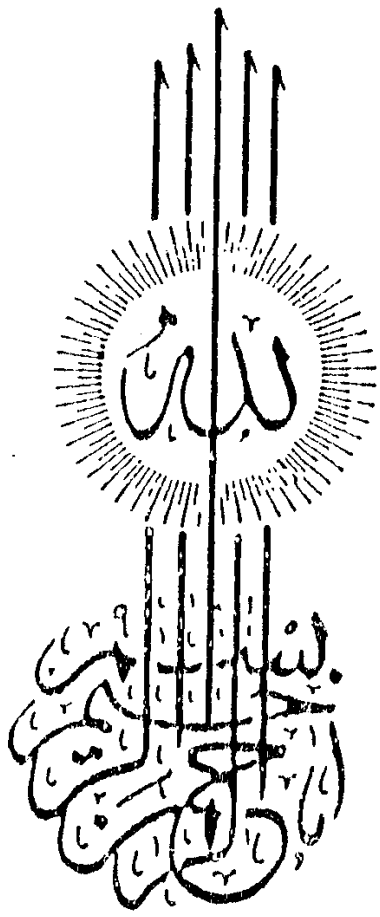
Essay
Submitted for Partial Fulfillment of
M.Sc. Degree
In
Pediatrics

By
Ibrahim Sayed Ibrahim
(M.B., B. Ch)

Supervised By
Prof. Dr. Farida Ahmed Farid
Professor of Pediatrics & Director of Pediatric
Dialysis Unit, Children's Hospital
Faculty of Medicine
Ain Shams University

Faculty of Medicine - Ain Shams University
1998





قَالُوا سُبْحَانَكَ لَا عِلْمَ لَنَا إِلَّا مَا
عَلَّمْتَنَا إِنَّكَ أَنْتَ الْعَلِيمُ الْحَكِيمُ.

صَدَقَ اللهُ الْعَلِيُّ
البقرة - ٣٢ -

Acknowledgement

First and Foremost, thanks to God to whom I relate any success in achieving any work in my life

I am particularly thankful to **Prof. Dr. Jarida Ahmed Jarid,** Professor of Pediatrics and Director of Pediatric Dialysis Unit, Children's Hospital, Faculty of Medicine, Ain Shams University for her indispensable guidance in choosing, initiating and supporting this work.

I would like to express my deepest gratitude and profound thanks to **Dr. Ihab El-Hakim,** Lecturer of Pediatrics and Pediatric-Nephrology, Faculty of Medicine, Ain Shams University, for his kind support, and sincere help.

I wish to express my thanks to all **Staff Members of Pediatric-Nephrology Department,** Faculty of Medicine, Ain Shams University, my Professors and my colleagues for their valuable assistance, cooperation and advice during the study.

Contents

- Introduction and Aim of Work 1

- **Chapter I : (Chronic Renal Failure)**
  - Definition 3
  - Stages 7
  - Epidemiology 9
  - Causes 10

- **Chapter II : (Progression of Renal Insufficiency)**
  - Mechansism of progression 15
  - Assessment of progression 18
  - Renal adaptation 19
  - Clinical factors 25
  - Tubular adaptation 27
  - Efforts to arrest the progression 36
  - Exercises and progression 42
  - Assessment of efficacy of interventions 42

- **Chapter III : (Problems Asscociated With CRF)**
  - Growth and development 44
  - Malnutrition 63
  - Cardiovascular abnromalities 71
  - Renal osteodystrophy 78
  - Anaemia 82
  - Bleeding diathesis 84
  - Endocrine disorders 85

- **Chapter IV : (Conservative Management)**
  - Approach to the patient 87
  - Nutritional management 90
  - Patterns of nutritional intake 106

List of Tables

Table No.	*Details*	*Page No.*
1	Normal GFR values for children.	4
2	Plasma creatinine levels.	5
3	Methods of estimating creatinine clearance in children.	6
4	Effect of decreasing renal mass on renal hypertrophy and GFR.	9
5	Incidence of treated ESRD by detailed primary disease and age for pediatric age < 20 years.	12
6	Aetiology of ESRD in Egyptian children.	13
7	Etiology of renal failure among 114 patients treated with HD through 5 years.	14
8	Factors affecting progression of CRF	16
9	Mechanisms of low protein diets that retard progression of RF.	20
10	Indicators of effects of interventions	43
11	Prevalence rates of systemic hypertension in patients with established progressive renal disease.	64
12	Classification of significant and severe hypertension by age group.	65
13	Factors that impact on blood pressure regulation.	67
14	Indices of malnutrition in end stage renal disease.	71

15	The most common causes of malnutrition in uremic patients.	76
16	Consequences of CRF in children.	83
17	Possible pathomechanisms of endocrine disorders.	86
18	Recommended dietary allowances (RDA).	93
19	Commonly used medications in the infant and child with CRF.	97
20	Dietary intake of selected nutrients (% RDA)	100
21	Infant formulas and nutritional supplements.	102
22	Interventions to prevent and/or treat malnutrition.	118
23	Selected antihypertensive drugs for patients with CRF.	140
24	Non-cardiovascular effect of rHu-EPO therapy in ESRD.	148
25	Diagnosis and treatment of rHu-EPO hyporesponsiveness	150
26	Alkali therapy for correction of acidosis.	154

List of Figures

Figure No.	*Details*	*Page No.*
1	Patients on regular hemodialysis from 1991-1996	11
2	Possible mechanisms by which glomerular hypertension causes glomerulosclerosis	17
3	Current concept of the alterations of the GH/IGF axis in uremia	50
4	Schematic representation of growth in children with renal insufficiency dating from infancy.	57
5	The spectrum of renal osteodystrophy in patients treated with daily oral calcitriol. Mild denotes mild hyper parathyroid bone disease	81
6	Proposed criteria for initiating growth hormone therapy	127
7	Common adverse reactions to rh-GH therapy and how to deal with?	129
8	Other adverse reactions to rh-GH therapy, and possible solutions	129
9	Suggested treatment approach for hypertension in CRF	139
10	Suggested treatment options for hypertensive emergencies	145
11	Approach to delayed or diminished response to rHu-EPO.	149

Introduction and Aim of the Work
