ACKNOWLEDGEMENT

First thanks to Allah who made me able to accomplish this work.

With gratitude. I would like to acknowledge the considerable help of Prof. Dr. Zeinab Loutfi (Dean of the High Institute of Nursing, Ain Shams University who supervised both my Master and Doctorate thesis, and encouraged me to embark in this study, she generously provided much of her time and has great interest in the progress of this work. I will always be indebted to her.

I am also very grateful to Prof. Dr. Mohamed Refaat (Professor of psychiatric medicine, Faculty of medicine, Ain Shams University) for his kind help, interesting discussions and fruitful directions through out the work.

I would like to express my gratitude to my students for their co-operation and interaction with me.

Finally I would like to express my gratitude to my husband and my three kids (*Heba, Hanaa and Hadeer*) for the time they gave me and the un-limited help.

CONTENTS

	Page
I. Introduction	1
II. Aim of the work	3
III. Review of literature	4
- Definitions of observation	
- Importance of observation for psychiatric nursing	
- Role of the psychiatric nurse in observation.	
- Purposes of observation.	
- Principles of observation.	
- Types of observation.	
- Obstructions to observation.	
- Steps to overcome the obstructions.	
- Psychological factors of observation.	
- Uses of observation.	
- Phenomena amenable to observation.	
- Advantages of observation.	
- Disadvantages of observation.	
- The psychiatric observation process.	
- Assisting students in development of observation- al skill.	
IV. Material and methods	27
V. Results	37
VI. Discussion	59
VII. Conclusion and recommendations.	66-68
VIII. Summary	69
Ix. References	72
x. Appendices	
XI. Arabic Summay	

LIST OF TABLES

Table No. (1)

Results of the pre and post test in relation to multiple choice questions regarding knowledge about four senses of observation (seeing, hearing, touching, smelling).

Table No. (2)

Results of the pre and post-test in relation to cross matching questions regarding knowledge about observation of the patients' psychiatric symptoms.

Table No. (3)

Results of the pre and post-test in relation to completing a check list observation regarding observation for patients' personal hygiene and their speech (at least 10 points) .

Table No. (4)

Results of the students ability to completing a checklist observation on the psychiatric patients accurately.

Table No. (5)

Results of the students ability to communicate comprehensively and intelligibly during recording of their observation.

Table No. (6)

Results of the students ability to identify the importance of accurate recording of observation in planning and evaluating the patients' progress.

Table No. (7)

Results of the students ability to identify signs and symptoms observed on the patients.

Table No. (8)

Results of the students ability to describe signs and symptoms observed on the patients.

Table No. (9)

Results of the students ability to identify extent of their observation toward psychiatric patients' needs.

Table No. (10)

Results of the students ability to describe their observation in a given situation.

Table No. (11)

Results of the students ability to observe minor variations of the patients behaviour.

Table No. (12)

Results of the students ability to observe physical symptoms of the psychiatric patients.

Table No. (13)

Results of the students ability to use the senses of observation systematically.

LIST OF FIGURES

Fig. No. (1) (Review)

Flow diagram of observation - decision process

Fig. No. (2)

Students knowledge about observation

Fig. No. (3)

Students ability to completing a checklist observation on the psychiatric patients accurately.

Fig. No. (4)

Students ability to communicate comprehensively and intelligibly during recording of their observation.

Fig. No. (5)

Students ability to describe signs and symptoms observed on the patients.

Fig. No. (6)

Students ability to identify extent of their observation toward psychiatric patients' needs.

Fig. No. (7)

Students ability to describe their observation in a given situation.

Fig. No. (8)

Students ability to observe minor variations of the patients behaviour.

Fig. No. (9)

Students ability to observe physical symptoms of the psychiatric patients.

Fig. No. (10)

Students ability to use the senses of observation systematically.
