1997**

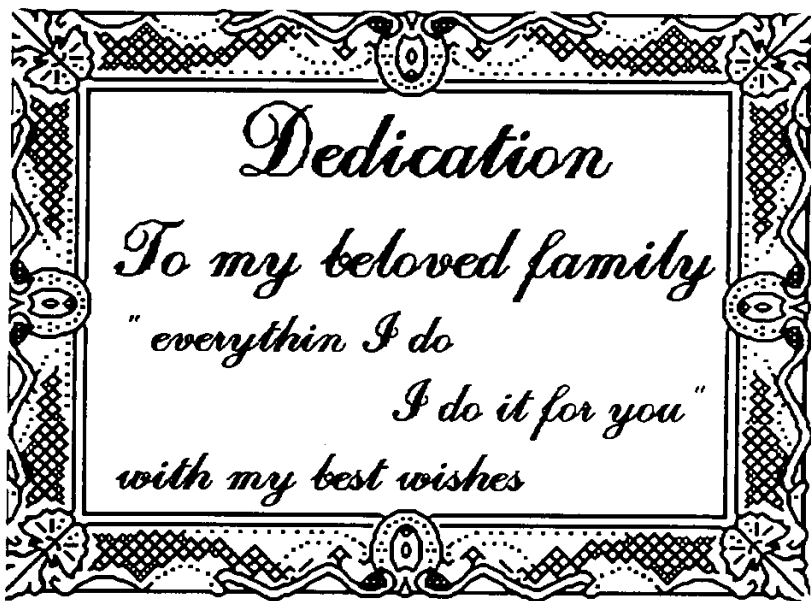

بِسْمِ اللَّهِ الرَّحْمَنِ الرَّحِيمِ

﴿ وَأَوْحَىٰ رَبُّكَ إِلَى النَّحْلِ أَنِ اتَّخِذِي
مِنَ الْجِبَالِ بُيُوتًا وَمِنَ الشَّجَرِ وَمِمَّا
يَعْرِشُونَ * ثُمَّ كُلِي مِن كُلِّ الثَّمَرَاتِ
فَاسْلُكِي سَبْلَ رَبِّكِ ذُلًّا يَخْرُجُ مِنْ
بُطُونِهَا شَرَابٌ مُّخْتَلَفٌ أَلْوَانُهُ
فِيهِ شِفَاءٌ لِلنَّاسِ إِن فِي ذَلِكَ
لَآيَةً لِّقَوْمٍ يَتَفَكَّرُونَ ﴾

صدق الله العظيم

[سورة النحل الآية ٦٨ : ٦٩]

ACKNOWLEDGEMENT

First and foremost, thanks to GOD, to whom I related any success in achieving any work in my life.

I wish to express my deep thanks and gratitude to Dr. Sanaa Abd El-Rahman, Assis. Prof. of Pediatrics, Faculty of Medicine, Ain Shams University, for giving me the honour of working under her supervision, for her patience and kind guidance and for her continuous encouragement throughout the whole work and always.

I am deeply grateful to Dr. Hanan El-Shakankiry, Lecturer of Pediatrics, Faculty of Medicine, Ain Shams University, who gave me much of her time and experience, kindly supervised my work and guided every step till it was completed.

I am sincerely thankful to Prof. Dr. Mohamed Aly El-Banby, Prof. of Agriculture and Chairman of Plant Protection, Ain Shams University, for his kindness and great cooperation and support.

I'd like also to express my utmost gratitude and respect to Dr. Mona Zaki, Lecturer of Clinical Pathology, Ain Shams University, for her sincere help and encouragement.

Last and not least, I wish to extend my thanks to my colleagues and to the nurses in the Neonatal Intensive Care Unit, and in the Clinical Pathology Department, for their cooperation and help.

List of Tables

- Table (1)** : The guide lines for energy requirements in preterm infants. 8
- Table (2)** : Composition of preterm breast milk. 15
- Table (3)** : Composition of preterm formula. 22
- Table (4)** : Enhancement of phagocyte function by fibronectin. 48
- Table (5)** : Data of studied infants upon inclusion into the study. 92
- Table (6)** : Comparison between the data of the patients in the 2 groups upon inclusion. 93
- Table (7)** : Follow up data of the 2 groups of patients at the end of the first day. 94
- Table (8)** : Daily mean milk intake (c. c. / kg/ d) and comparison between the 2 groups as regards the milk intake in 1 st and 7th days of the study. 95
- Table (9)** : Daily mean random blood glucose level in both groups and comparison between values on 1st and 7th days of study. 96
- Table (10)**: Comparison between the 2 groups as regards the mean daily caloric intake (K. cal/ day). 97
- Table (11)**: Daily mean weight (gm) in both groups. Comparison between values at the start and at the end of the study and between mean weight gain in both groups. 98

Table (12): Comparison between the hemoglobin level, white blood cell count and platelet count on days 1 and 7 in each group (Group "A" and Group "B")	99
Table (13): Mean fibronectin level (mg / dl) on days 1 and 7 of the 2 groups.	100
Table (14): Comparison between the mean fibronectin level at the start and at the end of the study for each group and for both groups.	101

List of Figures

- Fig (1)** : Daily mean random blood glucose level in both groups 102
- Fig (2)** : Daily mean weight (gm) in both groups. 103
- Fig (3)** : Comparison between the hemoglobin level, white blood cell count, and platelet count on days 1 and 7 in each groups. 104
- Fig (4)** : Mean fibronectin level (mg/ dl) at the start and at the end of the study for both groups. 105

List of Abbreviations

AA		Arachidonic acid
C. C	:	Cubic Centimeter
CRP	:	C reactive protein
CS	:	Connecting sequence
d	:	day
Da	:	Domain
DIC	:	Disseminated intravascular coagulopathy
ED	:	Extra domain
EDAcFN	:	Cellular fibronectin containing the extra domain A.
G. A.		Gestational age.
Fig.	:	Figure
G. I. T.	:	Gastrointestinal tract
gm	:	grams.
HELLP	:	Hemolysis, elevated liver enzymes and low platelets.
hGH		Human growth hormone.
ICs	:	Immune complexes
Ig	:	Immunoglobulin
IQ	:	Intelligence quotient
IUGR	:	Intrauterine growth retarded
