

**APPLICATION OF MINING GEOPHYSICAL
METHODS IN THE STUDY OF SURFACE
AND SUBSURFACE GEOLOGY
OF EL-EREDIYA URANIUM
PROSPECT, CENTRAL
EASTERN DESERT,
EGYPT.**

THESIS

**Submitted in Partial Fulfillment of the
Requirements For the Degree
of
Master of science**

**In
Geophysics**

CONTENTS

Subject	Page No.
- CONTENTS.....	i
- LIST OF FIGURES.....	v
- LIST OF TABLES.....	xi
- ACKNOWLEDGEMENTS.....	xiii
- NOTE	xiv
- ABSTRACT.....	xv
- CHAPTER I : INTRODUCTION.....	1
I-1 General.....	1
I-2 Location and Description.....	3
I-3 Mineralization.....	3
I-4 Topography.....	4
I-5 Previous work.....	6
I-6 Aim and plan of the present work.....	11
- CHAPTER II : GEOLOGIC SETTING.....	15
II-1 Regional Geology of the Central Eastern Desert.....	15
II-1-1 Geology of the Younger Granite in the Central Eastern Desert.....	16
II-2 Geologic Outlines of El-Erediya prospect area.....	22
II-2-1 Surface Geology.....	22
II-2-1-1 Detailed Geology of the prospect Area.....	23
A- Amphibolites (metabasic rocks).....	26
B- Pink granite.....	29

	Subject	Page No.
	C- Pegmatites.....	30
	D- Aplites.....	30
	E- Jasperoid Veins.....	32
	F- Basic dikes.....	33
	G- Wadi deposits (Alluvial Terraces).....	33
	H- Alteration Zones.....	34
II-2-2	Subsurface Geology.....	36
	A- Pink granite.....	37
	B- Jasperoid veins.....	38
	C- Altered granite.....	38
II-3	Structures.....	39
II-3-1	Surface structures.....	39
	a- Fractures.....	40
	b- Faults.....	42
	c- Joints.....	48
II-3-2	Subsurface Structures.....	49
	a- Fractures.....	49
	b- Faults.....	49
	CHAPTER III : GROUND RADIOMETRIC SURVEY.....	51
III-1	General.....	51
III-2	Instrumentation and survey technique.....	51
III-3	Data reduction and presentation.....	54
III-4	Interpretation.....	54
III-4-1	Qualitative Interpretation.....	56
III-4-2	Quantitative Interpretation.....	57

Subject	Page No.
A- Statistical Analysis.....	57
B- Radioactivity Unit Map.....	62
C- Distribution of Radioactivity Among the Different Rock Units.....	64
 CHAPTER IV : SELF POTENTIAL SURVEY.....	 67
IV-1 Electrical Techniques.....	67
IV-1-1 Electrical properties of rocks.....	67
IV-1-2 Electrical Potentials.....	67
IV-1-3 Electrical Conductivities.....	69
IV-2 General.....	70
IV-3 Instrumentation and Survey Technique.....	72
IV-4 Data Reduction and Presentation.....	75
IV-5 Interpretation.....	76
IV-5-1-1 Qualitative Interpretation.....	76
IV-5-1-2 Profiles of zero line and main adit of the mine.....	77
IV-5-1-3 Profiles of line 50 N and (DII & DIII)....	79
IV-5-1-4 Profiles of line 90 N and (DIV & DV).....	81
IV-5-1-5 Profiles of line 250 N and (DXI).....	81
IV-5-1-6 Profiles of line 370 N and (DVIII & DXIII).....	84
IV-5-2 Quantitative Interpretation.....	86
1 - Murty and Haricharan method (1985).....	87
2 - Ram Babu and Atchuta Rao method (1988)....	92

Subject	Page No.
CHAPTER V : INDUCED POLARIZATION SURVEY.....	104
V-1 General.....	104
V-2 Time domain IP technique.....	105
V-3 Instrumentation and survey technique.....	108
V-4 Data reduction and presentation.....	112
V-5 Filtering of the IP data.....	113
V-6 Interpretation.....	116
1- Main adit.....	116
2- DII & DIII.....	121
3- DIV & DV.....	122
4- DVIII & DXIII (Ventilation drift).....	128
CAPTER VI : HORIZONTAL-LOOP ELECTROMAGNETIC SURVEY....	131
VI-1 General.....	131
VI-2 Instrumentation and Survey techniques.....	133
VI-3 Data reduction and presentation.....	138
VI-4 Interpretation.....	139
1- Line 00 NS.....	144
2- Main Adit.....	146
3- DII & DIII.....	146
4- DIV & DV.....	148
5- DVIII & DXIII.....	150

LIST OF FIGURES

Fig. No.	Subject	Page No.
1	Location map of G. El-Erediya prospect, Central Eastern Desert, Egypt.....	2
2	Topographic map of El-Erediya prospect, Central Eastern Desert, Egypt.....	5
3	Plan of El Erediya mining works.....	13
4	Geological Map of El-Erediya area. Eastern Desert, Egypt.....	17
5	Detailed geological and structural map of El-Erediya prospect area, Central Eastern Desert, Egypt.....	25
6	Photograph showing El-Erediya pink granite pluton.....	27
7	a- photograph showing amphibolite occurs as a roof bendant carried on the granite....	28
	b- Photograph showing jasperoid veins filling the shear zone, and trending NE in El-Erediya pink granite.....	28
8	Interpreted tectonic map from magnetic data of El-Erediya prospect, Central Eastern Desert, Egypt.....	41
9	Rose diagrams showing the directions of the percentage of lengths and numbers of aplite veins (A) and jasperoid veins (B). El-Erediya prospect area.....	43

Fig. No.	Subject	Page No.
10	Rose diagrams showing the directions of the percentage of lengths and numbers of fractures (A) and faults (B). El-Erediya prospect area....	44
11	Photograph showing the multi-channels spectrometer GAD-6 with the sensor (GSP4) used in ground radiometry of El-Erediya prospect area.....	53
12	Ground total-count radiometric contour map. El-Erediya prospect area.....	55
13	frequency histograms with fitted normal theoretical curves of total-count radioactivity. El-Erediya prospect area.....	61
14	Interpreted Radio-Litho units map with the highest radioactivity anomalies. El-Erediya prospect, Central Eastern Desert, Egypt.....	63
15	a- Current and ion flow in the vicinity of an ore body.....	71
	b- Fixed electrode method. Numbers refer to successive electrode position and plotting points.....	71
16	Self potential profiles along line 00 NS (A) and main adit (B), with the corresponding surface and subsurface geology.....	78
17	Self potential profiles along line 50 N (A) and DII & DIII (B) with the corresponding surface and subsurface geology.....	80

Fig. No.	Subject	Page No.
18	Self potential profiles along line 90 N (A) and DIV & DV (B) with the corresponding surface and subsurface geology.....	82
19	Self potential profiles along line 250 N (A) and DXI (B), with the corresponding surface and subsurface geology.....	83
20	Self potential profiles along line 370 N (A) and DVIII & DXIII, with the corresponding surface and subsurface geology.....	85
21	Interpretation of two-Dimensional self potential anomalies using nomograms: a- Sp profile over a vein-type body..... b- Nomogram for interpreting 2-D SP anomalies..	88 88
22	Auxiliary charts for estimating the parameters of self potential anomalies: a- Auxiliary chart for estimating depth of the sheet..... b- Auxiliary chart for estimating $PI/2\pi$ function.....	91 91
23	a- Nomograms showing the variation of R with θ for $a/h = 0, 2$ and 4 b- Interpretation of the SP anomaly over a vein-type body.....	94 94

Fig. No.	Subject	Page No.
24	Theoretical induced polarization discharge curve.....	106
25	Photograph showing the induced polarization system.....	109
26	Diagram showing method of construction of dipole-dipole pseudosection.....	111
27	Diagram showing the types of filters.....	114
28	Induced polarization pseudosections along Main Adit, El-Erediya mine, Central Eastern Desert, Egypt.....	117
29	Filtered induced polarization profiles along Main Adit, El-Erediya mine, Central Eastern Desert, Egypt.....	120
30	Induced polarization pseudosections along DII & DIII, El-Erediya mine, Central Eastern Desert, Egypt.....	122
31	Filtered induced polarization profiles along DII & DIII, El-Erediya mine, Central Eastern Desert, Egypt.....	123
32	Induced polarization pseudosections along DIV & DV, El-Erediya mine, Central Eastern Desert, Egypt.....	125
33	Filtered induced polarization profiles along DIV & DV, El-Erediya mine, Central Eastern Desert, Egypt.....	126

Fig. No.	Subject	Page No.
34	Induced polarization pseudosections along DVIII & DXIII, El-Erediya mine, Central Eastern Desert, Egypt.....	129
35	Filtered induced polarization profiles along DVIII & DXIII, El-Erediya mine, Central Eastern Desert, Egypt.....	130
36	Principle of the two coil electromagnetic system.....	132
37	Photograph showing the horizontal loop electromagnetic survey by using TM-4 transmitter (A) and EM-4 receiver (B).....	135
38	Typical profile over a tilted conducting half-plane showing horizontal loop electromagnetic parameters.....	140
39	Interpretation of horizontal loop electromagnetic profile (00 NS) with the corresponding geologic section.....	145
40	Interpretation of horizontal loop electromagnetic profile (Main Adit) with the corresponding subsurface geology.....	147
41	Interpretation of horizontal loop electromagnetic profile (DII & DIII) with the corresponding subsurface geology.....	149
42	Interpretation of horizontal loop electromagnetic profile (DIV & DV) with the corresponding subsurface geology.....	151

Fig.	Subject	Page
No.		No.
43	Interpretation of horizontal loop electromagnetic profile (DVIII & DXIII) with the corresponding subsurface geology.....	153

LIST OF TABLES

Table No.	Subject	Page No.
1	Chronological sequence of the rock exposed in El-Erediya prospect area, Central Eastern Desert, Egypt.....	24
2	Summary of the characteristic statistics of the interpreted radiometric units, El-Erediya prospect area, Central Eastern Desert, Egypt.....	62
3	The results of quantitative interpretation of the self potential anomalies shown in figure (16). El-Erediya prospect area, Central Eastern Desert, Egypt.....	97
4	The results of quantitative interpretation of the self potential anomalies shown in Figure (17). El Erediya prospect area, Central Eastern Desert, Egypt.....	98
5	The results of quantitative interpretation of the self potential anomalies shown in Figures(18 and 19). El-Erediya prospect area, central Eastern Desert, Egypt.....	99

Table No.	Subject	Page No.
6	The results of quantitative interpretation of the self potential anomalies shown in Figure (20). El-Erediya prospect area, Central Eastern Desert, Egypt.....	100
7	The suitable sites for drilling with the corresponding depths to the center of the bodies. El-Erediya prospect area. Central Eastern Desert, Egypt.	101
8	Results of quantitative interpretation of HLEM data of lines 00 NS and main adit. El-Erediya prospect, Central Eastern Desert, Egypt.....	154
9	Results of quantitative interpretation of HLEM data of lines DII & DIII, DIV & DV, and DVIII & DXIII. El-Erediya prospect, Central Eastern Desert, Egypt.....	155

ACKNOWLEDGMENTS

My all gratitude is due to Almighty God who guided and helped me to bring forth the present work to light.

The author wishes to express his thanks and gratitude to Prof. Dr. Ahmed S. A. Abu El-Ata, Professor of Geophysics, Geophysic department, faculty of Science, Ain Shams University, Cairo, Egypt, for his supervision of this study.

The author is especially grateful to Dr. Said I. Rabie, Assistant professor of applied geophysics, Exploration Division, Nuclear Materials Authority, Cairo, Egypt, for his continuous help, Supervision and guidance throughout this study.

The author is also greatly grateful to Dr. Ahmed A. Abdel Meguid, Assistant professor of geology, Nuclear Materials Authority, Cairo, Egypt, for his supervision of this study.

Deep appreciation is due to prof. Dr. Ahmed A. Ammar, Prof. of Applied Geophysics and head of exploration Division, Nuclear Materials Authority for his cooperation.

The author would like to express his gratitude to Prof. Dr. Nabil M.T. El Hazek, President of the Nuclear Materials Authority, Cairo, Egypt.

The author is also grateful to all members of the Exploration Division, Nuclear Materials Authority, Cairo, Egypt, Special thanks are also due to my family.
