

EFFECT OF EXERCISE INDUCED MYOCARDIAL ISCHEMIA ON QT DISPERSION

Thesis
Submitted for Partial Fulfillment of Master Degree
in
Cardiology

By
Ayman Samir Mohammed Sadek
M.B., B.Ch

Under Supervision of
Prof. Dr. Wagdy Galal
Professor of Cardiology
Ain Shams University

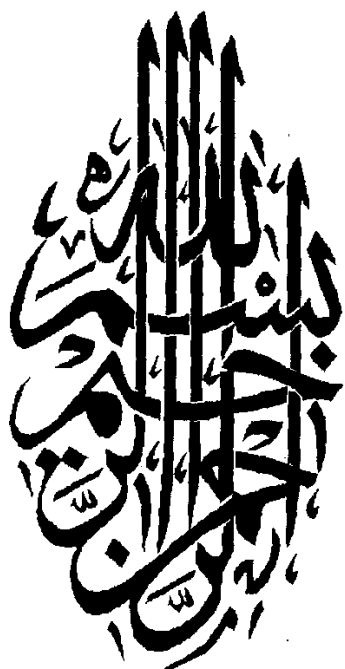

Dr. Maïy Hamedy El Sayed
Assistant Professor of Cardiology
Ain Shams University

Dr. Mohsen Fahmy
Lecturer of Cardiology
Ain Shams University

Faculty of Medicine
Ain Shams University
1999

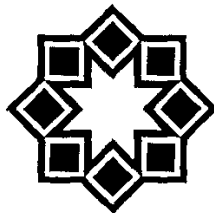

وَقُلْ رَبِّ زِدْنِي عِلْمًا ﴿١١٤﴾

صدق الله العظيم
سورة طه آية (١١٤)

ACKNOWLEDGEMENT

First and foremost, I thank ALLAH who gave us the gift of knowledge and understanding.

I would like to express my sincere gratitude and appreciation to Prof. Dr. Wagdy Galal, Professor of Cardiology, Faculty of Medicine, Ain Shams University, for his generous supervision, keen interest and precious time he offered me throughout this study. I consider my self very fortunate being worked under his supervision.

I wish also to express my deep gratitude to Dr. Maiy Hamdy El Sayed, Assistant Professor of Cardiology, Faculty of Medicine, Ain Shams University, for her continuous support, valuable remarks and for offering me much of her time and effort throughout this study.

My sincere thanks are to Dr. Mohsen Fahmy, Lecturer of Cardiology, Ain Shams University, for his meticulous supervision, valuable remarks and continuous encouragement.

Last but not least, I would like to express my sincere gratitude to Dr. Heba-allah Attia, who saved no time or effort in helping me to complete this work.

Finally, I would like to convey my warmest gratitude to my family and colleagues for their encouragement and unlimited support throughout my work.

List of Contents

Title	Page
List of abbreviations	i
List of tables	ii
List of figures	iv
Introduction and Aim of the work	
Review of literature	
▪ QT interval	4
▪ QT dispersion	12
▪ QT dispersion and CAD	38
▪ Exercise induced myocardial ischemia and QT dispersion	49
Subjects & Methods	68
Results	78
Discussion	121
Summary	132
Conclusion	135
References	136
Appendix	158
Arabic Summary	

10/1/20

List of Abbreviations

ECG	Electrocardiogram
CAD	Coronary artery disease
PTCA	Percutaneous transluminal coronary angioplasty
QTd	QT dispersion
QTcd	QT corrected dispersion
QTc	QT corrected
LAD	Left anterior descending coronary artery
RCA	Right coronary artery
Lt Cx	Left circumflex coronary artery
msec	millisecond

List of Tables

Table	Title	Page
<i>Tables of review</i>		
Table 1	QTd ratio and ventricular arrhythmia	47
Table 2	Stepwise logestic regression analysis	47
Table 3	QTmax and QTmin at rest and peak of stress	56
Table 4	Sensitivity and specificity of QTd ≥ 60 msec	60
Table 5	Diagnostic data in individual patients	63
Table 6	Diagnostic accuracy of ST segment depression and QTcd	66
<i>Tables of results</i>		
Table 1	Risk factors	78
Table 2	Resting QT dispersion, BP and HR	79
Table 3	Exercise test results	80
Table 4	Coronary angiography	80
Table 5	True positive group at rest	82
Table 6	True positive group at peak of exercise	82
Table 7	True positive group risk factors	82
Table 8	True negative group at rest	84
Table 9	True negative group at peak of exercise	84
Table 10	True negative group risk factors	84
Table 11	False positive group at rest	86
Table 12	False positive group at peak of exercise	86
Table 13	False positive group risk factors	86
Table 14	False negative group at rest	88
Table 15	False negative group at peak of exercise	88
Table 16	False negative group risk factors	88
Table 17	Age in the 4 studied group	89
Table 18	Resting heart rate in the 4studied groups	90
Table 19	Heart rate at peak of exercise in the 4 studied groups	90
Table 20	QTd at rest in the 4 studied groups	91
Table 21	QTd at peak of exercise in 4 studied groups	93
Table 22	METs at peak of exercise in 4 studied groups	95
Table 23	Duration at peak of exercise in 4 studied groups	96

List of Tables (iii)

Table 24	Blood pressure at rest at peak of exercise in 4 studied groups	97
Table 25	Blood pressure at rest at peak of exercise in 4 studied groups	98
Table 26	Ejection fraction in the 4 studied groups	98
Table 27	QTd and its relation to LAD	99
Table 28	QTd and its relation to left circumflex	101
Table 29	QTd and its relation to RCA	101
Table 30	Difference between QTd at rest and QTd at peak of exercise in 4 studied groups	104
Table 31	Association between QTd ≥ 60 msec and sex	106
Table 32	Association between QTd ≥ 60 msec and smoking	107
Table 33	Association between QTd ≥ 60 msec and hyperlipidemia	107
Table 34	Association between QTd ≥ 60 msec and family history	108
Table 35	Association between QTd ≥ 60 msec and chest pain	109
Table 36	Association between QTd ≥ 60 msec and exercise test	109
Table 37	Association between QTd ≥ 60 msec and ST segment changes	110
Table 38	Association between QTd ≥ 60 msec and CAD	111
Table 39	Association between QTd ≥ 60 msec and LAD.	111
Table 40	Association between QTd ≥ 60 msec and Lt.Cx.	114
Table 41	Association between QTd ≥ 60 msec and RCA	115
Table 42	Association between QTd ≥ 60 msec and vessel disease	115
Table 43	Sensitivity, specificity, PPV and NPV of QT dispersion ≥ 60 msec at peak of exercise in diagnosis of patients with CAD during exercise stress testing	119

List of Figures

Figure	Title	Page
Figure 1	ECG showing QTd at rest (patient number)	72
Figure 2	ECG showing QTd at peak of exercise (patient number)	73
Figure 3	QTd could not be assessed at peak of exercise test (patient number)	74
Figure 4	Coronary angiogram showing totally occluded RCA (patient number 4)	75
Figure 5	Coronary angiogram showing significant lesion in the RCA (patient number 57)	75
Figure 6	Coronary angiogram showing significant lesion in the LAD (patient number 2)	76
Figure 7	Coronary angiogram showing significant lesion in the LAD and Lt Cx (patient number 19)	76
Figure 8	QTd at rest in the 4 studied groups	92
Figure 9	QTd at peak of exercise in the 4 studied groups	94
Figure 10	QTd at rest and stress and its relation LAD disease	100
Figure 11	QTd at rest and stress and its relation to Lt Cx disease	102
Figure 12	QTd at rest and stress and its relation to RCA disease	103
Figure 13	Difference between QTd at rest and peak of exercise in the 4 studied groups	105
Figure 14	QTd at peak of exercise and significant CAD	112
Figure 15	QTd at peak of exercise and LAD affection	113
Figure 16	QTd at peak of exercise and Lt Cx affection	116
Figure 17	QTd at peak of exercise and RCA affection	117
Figure 18	QTd at peak of exercise and number of vessels affected	118
Figure 19	Sensitivity, specificity, PPV and NPV of QTd ≥ 60 msec	120
