

ROLE OF ULTRASONOGRAPHY IN DIAGNOSIS OF SHOULDER JOINT LESIONS

Thesis

Submitted for Partial Fulfilment of

M.D. Degree

In

Radiodiagnosis

By

Omnia Ahmed Kamal Yousef

M.B.: B.Ch. - M.Sc.

Supervised By

Prof. Dr. Jannette Boushra Hanna

Professor of Radiodiagnosis

Faculty of Medicine

Acknowledgement

*I would like to express my deepest appreciation and gratitude to **Professor Dr. Jannette Boushra Hanna**, Professor of Radiodiagnosis, Faculty of Medicine, Ain Shams university for her guidance, continuous supportive interest and patience all through.*

*I wish to express my sincere thanks to **Professor Doctor Zeinab Abdallah**, Chairman of Radiodiagnosis Department, Faculty of Medicine, Ain Shams University.*

I would like to thank the teaching staff and all my colleagues in Radiodiagnosis Department.

Contents

• Introduction and Aim of The Work	1
• Anatomy of the shoulder joint	3
• Normal sonographic anatomy	15
• Pathology of the shoulder joint lesions	22
• Review of Literature	42
• Technique of ultrasonography in examination of the shoulder joint	46
• Material and Methods	55
• Results	62
• Discussion	130
• Summary and Conclusion	143
• References	146
• Arabic Summary	

List of Figures

- Fig. 1 Acromioclavicular, coracoacromial, coracoclavicular and transverse humeral ligaments.
- Fig. 2 Superior, middle and inferior glenohumeral ligaments
- Fig. 3 Supraspinatus, infraspinatus and teres minor muscles.
- Fig. 4 Subscapularis muscle.
- Fig. 5 Normal sonographic appearance of biceps tendon in long scan.
- Fig. 6 Osteomyelitis-histologic appearance
- Fig. 7 Infiltrating intramuscular lipoma
- Fig. 8 Well differentiated chondrosarcoma.
- Fig. 9 Examination of biceps tendon (transverse)
- Fig. 10 Examination of biceps tendon (long)
- Fig. 11 Examination of subscapularis tendon.
- Fig. 12 Examination of supraspinatus muscle (transverse)
- Fig. 13 Examination of supraspinatus muscle (long).
- Fig. 14 Examination of infraspinatus muscle (transverse)
- Fig. 15 Biceps tendon in transverse scan

- Fig. 16 Biceps tendon in long scan.
- Fig. 17 Subscapularis in transverse scan.
- Fig. 18 Supraspinatus in transverse scan.
- Fig. 19 Infraspinatus in transverse scan.
- Fig. 20 Case of partial tear of supraspinatus muscle
- Fig. 21 Case of partial tear of supraspinatus muscle
- Fig. 22 Case of partial tear of supraspinatus muscle
- Fig. 23 Case of partial tear of supraspinatus muscle
- Fig. 24 Case of partial tear and calcification of
supraspinatus muscle.
- Fig. 25 Case of multiple partial tears and calcification of
supraspinatus muscle.
- Fig. 26 Case of complete tear of supraspinatus muscle
and partial tear of subscapularis muscle.
- Fig. 27 Case of subacromial impingement of
supraspinatus muscle grade I.
- Fig. 28 Case of subacromial impingement of
supraspinatus muscle grade I.
- Fig. 29 Case of subacromial impingement of
supraspinatus muscle grade I.
- Fig. 30 Case of acute absces within the substance of
infraspinatus muscle.

- Fig. 31 Case of fracture of upper part of shaft of humerus and tear of supraspinatus muscle.
- Fig. 32 Case of detached bony fragment from the greater tuberosity of humerus with mild tenosynovitis of biceps tendon.
- Fig. 33 Case of acute dislocation of shoulder joint with no affection of the muscles.
- Fig. 34 Case of chronic osteomyelitis of upper part of humerus
- Fig. 35 Case of septic arthritis of shoulder joint
- Fig. 36 Case of chondrosarcoma of upper part of humerus
- Fig. 37 Case of calcified tendinitis of supraspinatus tendon.
- Fig. 38 Case of subluxation of biceps tendon
- Fig. 39 Case of subcutaneous lipoma.
- Diag. 1 Part of small skeletal muscle in cross section
- Diag. 2 Pennate structure of muscles

List of Tables

- Table 1 Different clinical presentations.
- Table 2 Different groups and lesions and number of patients included in each group.
- Table 3 Different radiological and imaging manifestations in group I
- Table 4 Different radiological and imaging manifestations in group II
- Table 5 Different radiological and imaging manifestations in group III
- Table 6 Different radiological and imaging manifestations in group IV
