

Assessment of Antigliadin Seropositivity in Children with Down Syndrome

Thesis

Submitted for partial fulfillment
M.Sc. Degree in **PEDIATRICS**

By

Rasha Hussein Aly

M.B., B.Ch.

Supervisors

Prof. Rabah M. Shawky

Prof. of Pediatrics and Genetics

Head of Genetics Unit

Faculty of Medicine, Ain Shams University

Dr. Eman A. Zaky

Assist. Prof. of Pediatrics

Faculty of Medicine, Ain Shams University

Dr. Hanaa A. Amar

Lecturer of Clinical Pathology

Faculty of Medicine, Ain Shams University

Faculty of Medicine
Ain Shams University

1999

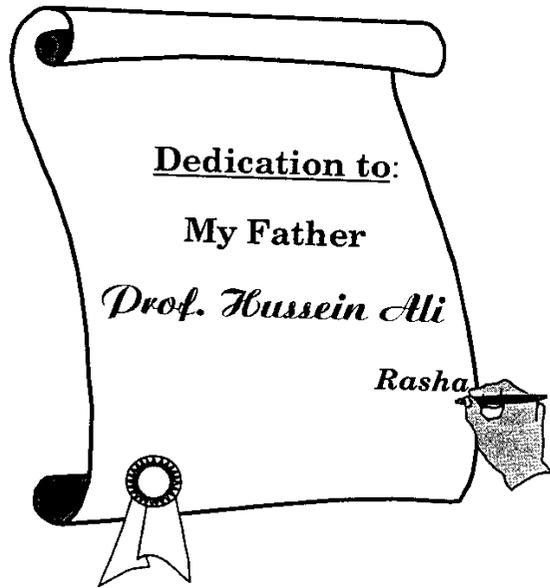

بِسْمِ اللَّهِ الرَّحْمَنِ الرَّحِيمِ

"وما توفيقى إلا بالله
عليه توكلت وإليه أنيب"

صدق الله العظيم

هود/ آية ٨٨

Acknowledgement

I would like to express my deepest gratitude to Prof. Rabah M. Shawky, Prof. of Pediatrics, head of Genetics Unit, Faculty of Medicine, Ain Shams University, for her instructive supervision, invaluable advice and unlimited support.

I would like to express my sincere thanks to Dr. Eman A. Zaky, Assist. Prof. of Pediatrics, Faculty of Medicine, Ain Shams University, for her continuous support, valuable guidance and excellent supervision.

I am much obliged to Dr. Hanaa A. Amer, for her assistance, generous co-operation and effort in presenting this work in this manner.

I also like to thank my patients for their cooperation and participation in this study.

Last but not the least I thank all the staff in the Pediatrics Hospital, Faculty of Medicine, Ain Shams University, for their help and support.

LIST OF TABLES

	<u>Page</u>
Table 1: Mode of presentation of celiac disease in 52 celiac children at the Royal Alexandra Hospital.	48
Table 2: Symptoms present at time of diagnosis in 52 children at the Royal Alexandra Hospital.	51
Table 3: Classification of results of AGA IgA estimation.	60
Table 4: Statistical comparison between studied groups as regards age distribution and mean values of weight and height.	64
Table 5: Statistical comparison between studied groups as regards sex and rate of the consanguinity.	66
Table 6: Statistical comparison between studied groups as regards weight percentiles.	68
Table 7: Statistical comparison between studied groups as regards height percentiles.	69
Table 8: Statistical comparison of studied groups concerning incidence of high maternal age, incidence of prematurity and incidence of neonatal jaundice.	71
Table 9: Statistical comparison between studied groups as regards GIT manifestations encountered among our patients.	73

Table 10: Statistical comparison between studied groups as regards non GIT manifestations.	76
Table 11: Statistical comparison between studied groups as regards findings of clinical examinations.....	77
Table 12: Statistical comparison between studied groups as regards findings of hematological investigations.....	79
Table 13: Statistical comparison between studied groups as regards findings of biochemical investigations.....	81
Table 14: Statistical comparison of studied groups concerning findings of stool analysis.....	83
Table 15: Statistical comparison between studied groups as regards seropositivity for AGA IgG, AGA IgA and AEA IgA.	85
Table 16: Comparison between subgroups of group I (DS with GIT)as regards sex distribution, growth retardation (wt and ht) below 5th percentile and other two antibodies seropositivity.	88
Table 17: Comparison between subgroups of group I (DS with GIT manifestations) as regards age, mean values of weight and height Hb (gm/dl), PT, PTT, T.S.P gm/dl and S.Alb gm/dl and their relationship to the three studied antibodies.....	90
Table 18: Statistical comparison between studied subgroups as regards sex, growth retardation with	

weights and heights below 5 th percentile and seropositivity for other studied antibodies.	92
Table 19: Statistical comparison between subgroups as regards age distribution, mean values of height, weight, Hb level (gm/dl), PT, PTT, total serum proteins (gm/dl) and serum albumin (gm/dl).	94
Table 20: Statistical comparison between studied subgroups as regards sex, growth retardation with weights and heights below 5 th percentile and seropositivity for other studied antibodies.	96
Table 21: Statistical comparison between studied subgroups as regards age distribution, mean values of weight and height, Hb (gm/dl), PT, PTT, T.S.P (gm/dl) and S.ALb (gm/dl).....	98
Table 22: Statistical comparison between studied subgroups as regards sex, growth retardation with weights and heights below 5 th percentile and seropositivity for other studied antibodies.	100
Table 23: Statistical comparison between studied subgroups as regards age distribution, mean value of weight and height, Hb (gm/dl), PT, PTT, T.S.P (gm/dl) and S.ALb (gm/dl).....	102
