

Tumor Necrosis Factor-Alpha In Bronchial Asthma

Thesis

Submitted in partial fulfillment
for the Master Degree in **Chest Diseases**

By

Farid Mounier Agaybi

M.B., B.Ch.

Supervisors

Prof. Hussein Aly Hussein

*Prof. of Chest Diseases
Faculty of Medicine
Ain Shams University*

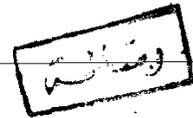

Prof. Adel Gomaa Aly

*Prof. and Chairman of Chest
Diseases Dept.
Faculty of Medicine

Acknowledgments

I am deeply grateful to our Prof. Hussein Aly Hussein, Prof. of Chest Diseases, Faculty of Medicine, Ain Shams University, for his cooperation and faithful guidance.

Many thanks to Prof. Adel Gomaa Aly Prof. and Chairman of Chest Diseases Dept., Faculty of Medicine, Ain Shams University, for giving me the privilege to work under his supervision.

I am deeply grateful to Prof. Aly Khalifa, Prof. of Biochemistry and Tumor Biology, Faculty of Medicine, Ain Shams University for his continuous encouragement, cooperation and support throughout the work.

I Also show my gratitude to Dr. Mohamed Farrag, Lecturer of Chest Diseases, Faculty of Medicine, Ain Shams University, who carried out the hardest part of this work.

My deepest sincere thanks to Dr. Maha Emam Ahmed, Lecturer of Biochemistry, Faculty of Medicine, Ain Shams University.

I am deeply grateful to all my professors, staff doctors and colleagues for this cooperation.

Contents

	Page
Introduction and aim of the work	1
Review of Literature	3
Bronchial asthma.....	3
Introduction.....	3
Classification of asthma severity.....	9
Mechanism of asthma.....	11
Immuno pathologic mechanism.....	12
Neural mechanism.....	13
Role of inflammation in asthma	15
Inflammatory cells.....	16
Inflammatory mediators.....	25
Cytokines	39
Tumor necrosis factor alpha.....	43
Discovery of TNF- α	43
Structure and biochemistry of TNF- α	44
TNF- α circulation	46
TNF- α receptors	46
Regulation of TNF- α production	48
Biological effects of TNF- α	53
Role of TNF- α in inflammation	57
Role of TNF- α in septic shock	58
Role of TNF- α in malignancy.....	59
Asthma management	60

Subjects and Methods	78
Results	87
Discussion.....	106
Summary	113
References	116
Arabic Summary	

List of Tables

Tab. No.	Title	Page
Tables in the review		
	Physiological effect of interleukines	42
	Cellular effects of glucocorticoids	69
	Novel antiasthmatic drugs	71
Tables in the Subject and Methods		
	Summary of assay procedure	85
<hr/>		
Tables in the Results		
1	Distribution of age and gender in the patients group	91
2	The main presenting symptoms of the patients group	92
3	The value of FEV ₁ , and FEV ₁ /FVC of the patient group	93
4	Distribution of patients according to the severity of the disease	94
5	TNF- α levels in serum and BALF in the patients group	95
6	The mean values of TNF- α level in serum and BALF of the control group	96
7	The mean values of TNF- α level in serum and BALF in patients group presented with mild degree of the disease	97

8	The mean values of TNF- α levels in serum and BALF in patient group presented with moderate degree of the disease	98
9	The mean value of TNF- α level in serum and BALF in patients group presented with severe form of the disease	99
10	The mean values of TNF- α in BALF, in sera, age, FEV ₁ , and FEV ₁ /FVC in the patients group	100
11	The mean values of TNF- α in serum and BALF in patients group in comparison to control group	101
12	The mean values of TNF- α in serum and BALF of patient with mild degree (group I) in comparison to control group	102
13	The mean values of TNF- α in serum and BALF of patients with moderate degree of the disease (group II) in comparison to control group	103
14	The mean values of TNF- α in serum and BALF of patients with severe form of the disease (group III) in comparison to control group	104

List of Figures

Fig. No.	Title	Page
Figures in the review		
1	Dose/concentration response curves to methacholine showing different degrees of airway hyperresponsiveness, typical of a patient with severe asthma	6
2	A proposed role for the mast cell: at the centre of the allergic inflammatory response.	18
3	A schematic representation of the role of the sub-types of T-cells.	23
	The synthetic pathways for the synthesis of platelet activating factor (PAF), leukotrienes and prostaglandins	27
4	Chronic management of asthma: stepwise approach to asthma therapy	64
5	Model for the interaction of albuterol, formoterol, and salmeterol with the β -adrenoceptor.	65
Figures in the Results		
	The mean values of TNF- α in BALF and in the sera of the patients group	105
