Acknowledgment

First of all, my gratitude and deep thanks to my God for his continuous help and support to me.

It is a pleasure to express my immense gratitude and appreciation to Prof. Dr. Sawzan Amin El-Sokkary, Professor of Pediatric, Faculty of Medicine, Ain Shams University, for supervising this work and for her kind guidance and generous effort in making this work.

I am greatly and deeply indebted to Dr. Mahmoud Tarek Abd El-Monim, Lecturer of Pediatric, Faculty of Medicine, Ain Shams University, for his generous advice, encouragement and follow-up for every detail of the work. His bright opinions, reverent aid and support were of great help to me in putting this work in its kind formation.

I also express my great thanks to Dr. Tarek Ahmed Abd El-Gawad, Lecturer of Pediatric, Ain Shams University, for his great help in the practical aspects of this thesis.

List of Abbreviations

AA	Ascending aorta
AMW	Anterior mitral valve
Ao	Aorta
AR	Aortic regurgitation
AS	Aortic stenosis
ASOT	Antistreptolysin O titre
AV	Aortic valve
CRP	C-reactive protein
CXR	Chest X-ray
DNA	Deoxy ribonucleic acid
ECG	Electrocardiogram
Echo	Echocardiography
EF	Ejection fraction
ESR	Erythrocyte sedimentation rate
EV	Eustachian valve
FF	Forward flow
FS	Fractioner shortening
IVS	Interventricular septum
LA	Left atrium
LAP	Left atrial pressure
LCA	Left carotid artery
LSA	Left subclavian artery
LV	Left ventricle
LVED	Left ventricular end diastolic

LVES	Left ventricular end systolic
LVP	Left ventricular pressure
LVPW	Left ventricular posterior wall
M-mode	Motion-mode
MR	Mitral regurgitation
MS	Mitral stenosis
MV	Mitral valve
PMW	Posterior mitral valve
PV	Pulmonary valve
PW	Posterior wall of the left ventricle
RA	Right atrium
RF	Reversed flow
RPA	Right pulmonary artery
RV	Right ventricle
RV	Right ventricle
SV	Systolic volume
TEE	Transesophageal echocardiography
TR	Tricuspid regurgitation
TS	Tricuspid stenosis

List of Tables

	Page
Table (1): Fundamentals of diagnosis of rheumatic fever.....	11
Table (2): Age and sex distribution in patients with acute rheumatic arthritis	77
Table (3): Laboratory data of patients with acute rheumatic arthritis	80
Table (4): Echocardiographic findings in patients with acute rheumatic arthritis	81
Table (5): Age and sex distribution in patients with acute rheumatic chorea.....	83
Table (6): Laboratory data of patients with acute rheumatic chorea.....	86
Table (7): Echocardiographic findings in patients with acute rheumatic chorea.....	89
Table (8): Age, sex distribution and time interval of the disease from stage of admission till stage of the study in patients with past history of rheumatic arthritis.....	91
Table (9): Laboratory data of the patients with past history of rheumatic arthritis at time of admission.....	94
Table (10): Laboratory data of the patients with past history of rheumatic arthritis at time of the study.....	95
Table (11): Echocardiographic findings in patients with past history of rheumatic arthritis.....	98
Table (12): The difference between the incidence of subclinical carditis at time of admission and at time of the study in patients with past history of rheumatic arthritis.....	101

Table (13):	Age, sex distribution and time interval of the disease from stage of admission till stage of the study in patients with past history of rheumatic chorea	102
Table (14):	Laboratory data of the patients with past history of rheumatic chorea at time of admission.....	105
Table (15):	Laboratory data of the patients with past history of rheumatic chorea at time of the study.....	106
Table (16):	Echocardiographic findings in patients with past history of rheumatic chorea	109
Table (17):	The difference between the incidence of subclinical carditis at time of admission and at time of the study in patients with past history of rheumatic chorea	112
Table (18):	Relationship between pathology & results of colored Doppler.....	112
Table (19):	Relationship between pathology & results of colored Doppler at time of admission	113
Table (20):	Relationship between pathology & results of colored Doppler at time of study	113

List of Figures
