# GLUTATHIONE AND ASSOCIATED ANTIOXIDANT SYSTEM IN PROTEIN ENERGY MALNUTRITION IN CHILDREN

Thesis
Submitted for partial fulfillment of Master Degree in Pediatrics

By

Dalia Mohye El Din Swidan
M.B.,B.Ch.

Under Supervision of

#### Prof.Dr. Mohammed Awad Alla

Professor of Pediatrics
Faculty of Medicine, Ain-Shams University

#### Dr. Shereen Medhat Reda

Lecturer of Pediatrics
Faculty of Medicine, Ain-Shams University

#### Dr. Randa Reda Mabrouk

Lecturer of Clinical Pathology
Faculty of Medicine, Ain-Shams University

Faculty Of Medicine Ain-Shams University 1998

To my Parents ... With all love and gratitude

# Acknowledgment

First and foremost, thanks to God, the most beneficial and merciful and without his help this work couldn't be completed.

No words can fulfill the feeling of gratitude and respect I carry to Prof.Dr. Mohammed Awad Allah, Professor of Pediatrics, Faculty of Medicine, Ain Shams University, for choosing the subject and for his great directions all through this work with a sincere support and kind heart.

I am also greatly honored to express my endless gratitude to Dr. Shereen Medhat Reda, Lecturer of Pediatrics, Faculty of Medicine, Ain Shams University, who saved no time nor effort in helping me to accomplish this work. I do feel greatly indebted for her supervision, advice and effort. I will always be indebted to her for ever.

I can never express my gratitude to Dr. Randa Reda Mabrouk, Lecturer of Clinical Pathology, Faculty of Medicine, Ain Shams University, who took much trouble to help with accomplishing the practical part of the work and revising the thesis.

My gratitude and thanks are extended to staff members, colleagues and patients for their help and cooperation.

### List of Abbreviations

**ADH** Antidiuretic hormone.

C<sub>3</sub> Complement 3

Cupper.

**DIC** Dissiminated intravascular coagulopathy.

Fe<sup>2+</sup> Ferrous.
Fe<sup>3+</sup> Ferric.

Gp Glutathione peroxidase.
GR Glutathione reductase
GSH Reduced glutathione.
GSS G Oxidized glutathione.
H<sub>2</sub>O<sub>2</sub> Hydrogen peroxide.
HDL High density lipoprotein.

IL-1 Interleukin-1. Kwo Kwashiorkor.

MKwo Marasmic Kwashiorkor.

Mn Manganese.
O<sup>o</sup><sub>2</sub> Superoxide.
OH<sup>o</sup> Hydroxyl radical.

PEM Protein energy malnutrition.

**PGE**<sub>2</sub> Prostaglandin E<sub>2</sub>

ROS Reactive oxygen species.
SOD Superoxide dismutase.
TPN Total parentral nutrition.

Zn Zinc.

# AIM OF THE WORK

#### **Introduction:**

Marasmus and kwashiorkor are manifestations of protein energy malnutrition. The pathophysiology of these disorders is poorly understood (Sive et al., 1993).

Kwo may occur when an imbalance between proand anti-oxidants in malnourished children results in an excess of free radicals (*Becker et al.*, 1995).

#### Aim of the work:

The aim of the present study is to investigate the disturbance in oxidant antioxidant balance in PEM by measuring the serum levels of glutathione peroxidase (GP) and glutathione reductase (GR) enzymes in infants suffering from marasmus and kwashiorkor.
