Acknowledgment

I wish to express my deep appreciation and gratitude to Prof. Dr. Ali Ramzy Abd el Megid Ramzy, professor of Cardiology, Faculty of Medicine, Ain Shams University, for giving me the privilege of working under his supervision and helpful guidance. His advice was always stimulating and specially essential to complete this work.

I would like to express my deep thanks and sincere appreciation to Dr. Ola Hamdy El_Demerdash, assistant professor of Clinical Pathology, Faculty Of Medicine, Ain Shams University, for her encouragement and constructive guidance which was paramount axis in the initiation and progress of this work. It is a great honour to work under her supervision.

I also express my cordial thanks and gratitude to Dr. Nabil Mahmoud Farag, lecturer of Cardiology, Faculty of Medicine, Ain Shams University, for his great support, encouragement, patience, enthusiasm, criticism and help. This work have been impossible without his cooperation and generous assistance.

I would like to express my deepest gratitude to all my Professors in the Cardiology Department, Faculty of Medicine, Ain Shams University, for their kind and generous attitude towards me and for their great support althrough my work. They taught me a lot.

To my father, my mother and, my sister, who dedicated their efforts to let this work come to such a final picture, I owe my thanks and gratitude.

List of Abbreviations

SMVP	Syndrome of Mitral Valve Prolapse
MVP	Mitral Valve Prolapse
MVA	Mitral Valve Apparatus
MR	Mitral Regurge
LA	Left Atrium
LV	Left Ventricle
MV	Mitral Valve
BP	Blood Pressure
SBP	Systolic Blood Pressure
DBP	Diastolic Blood Pressure
HR	Heart Rate
NE	Norepinephrine
VE	Ventricular Ectopy
VT	Ventricular Tachycardia
SV	Supraventricular
SVT	Supraventricular Tachycardia
TTE	Transthoracic Echocardiography
ECG	Electrocardiogram

List of Figures

- Figure (1):** Distribution of the studied cases.
- Figure (2):** The mean level of sinus tachycardia in both patients and control groups.
- Figure (3):** The mean level of anterior leaflet tip thickness in both patients and control groups.
- Figure (4):** The mean level of the anterior leaflet mid portion thickness in both patient and control groups.
- Figure (5):** The mean level of the anterior leaflet thickness at the annular insertion in both patients and control groups.
- Figure (6):** The mean level of the posterior leaflet thickness in both patients and control groups.
- Figure (7):** The mean level of the posterior leaflet thickness at the annular insertion in both patients and control groups.
- Figure (8):** The mean level of the posterior leaflet length in both patients and control groups.
- Figure (9):** The mean level of the Norepinephrine level in both patients and control groups.
- Figure (10):** Relation between chest pain and SMVP.
- Figure (11):** Relation between palpitation and SMVP.
- Figure (12):** Relation between dyspnea and SMVP.
- Figure (13):** Relation between ventricular tachycardia and SMVP.
- Figure (14):** Diagnostic evaluation of NE in MVP syndrome.
- Figure (15):** Correlation between heart rate and NE level in the studied cases.

- Figure (16):** Two dimensional parasternal long axis view of patient number 21 showing both anterior and posterior mitral leaflets curve into the left atrium LA.
- Figure (17):** Two-dimensional echocardiogram of the apical four chamber view of patient number 21 showing mitral valve leaflets prolapse beyond the plane of the mitral annulus.
- Figure (18):** Two-dimensional parasternal long-axis view of patient number 21 showing elongated chordae tendineae.
- Figure (19):** Two-dimensional parasternal long-axis view of patient number 21 showing measurement of the chordal length of the anterior leaflet.
- Figure (20):** Two-dimensional echocardiogram of the apical four – chamber view of patient number 21 demonstrating thickened leaflets of the mitral valve.
- Figure (21):** Two-dimensional echocardiogram of the apical four – chamber view of patient number 21 demonstrating the measurement of the annular diameter.
