

***Effect of Nigella sativa Seeds (black cumin) on
Experimental Hymenolepis nana Infection***

Thesis
Submitted for Partial Fulfillment of
The Master Degree
In
Parasitology

By
Nashwa Salah El-din Abdel Fattah Ahmed
M.B., B.Ch. - Ain Shams University

Supervised By
Prof. Dr. Mohamed Latif Mounir Khaled
Professor of Parasitology
Faculty of Medicine
Ain Shams University

Prof. Dr. Azza Abdel-Salam El-Kadery
Professor of Parasitology
Faculty of Medicine
Ain Shams University

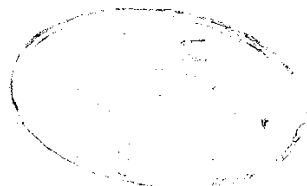

Dr. Buthina Mohamed Reda El-Gozamy
Lecturer of Parasitology
Faculty of Medicine
Ain Shams University

آیت عظمی (ع)

وقل أعملوا فليس من الله عملكم
ورسله والمؤمنون

صدق الله العظيم (التوبة ١٠٥)

Acknowledgment

I wish to express my deep thanks and gratitude to **Professor Dr. Mohamed Latif Mounir Khaled**, Professor of Parasitology, Faculty of Medicine, Ain Shams University, for giving me the privilege to work under his supervision, for his patience and encouragement.

I am also deeply thankful to **Professor Dr. Azza Abdel-Salam El-Kadery**, Professor of Parasitology, Faculty of Medicine, Ain Shams University, for her continuous support, valuable guidance and excellent supervision.

I am much obliged to **Dr. Buthina Mohamed Reda El-Gozamy**, Lecturer of Parasitology, Faculty of Medicine, Ain Shams University, for her generous co-operation and valuable assistance.

I wish also to thank **Professor Dr. Magda El-Sayed Azab**, Head of the Parasitology Department, Faculty of Medicine, Ain Shams University, for her continuous encouragement.

Finally, I wish to express my sincere gratitude to **Professor Dr. Adel El-Misery**, Head of the Medical Research Centre and Bilharzial Research, for facilitating the laboratory work. And I can't by any mean express my appreciation to **Dr. Awatef Abdel-Hamid Mady**, veterinary at Animal House, Medical Research Center and Bilharzial Research, Ain Shams University, for her great help in taking care of the animals used in this work.

Contents

1.	Introduction	1
2.	Review of Literature	3
	a) <i>Hymenolepis nana</i>	
	Historical data and synonymy	3
	Geographical distribution	4
	Prevalence of <i>H. nana</i>	5
	Morphology	7
	Life cycle	14
	Growth and nutrition	19
	Epidemiology	21
	Pathology and Pathogenesis	23
	Symptomatology	27
	Diagnosis	28
	Immunity in <i>H. nana</i> infection	28
	Prevention	36
	Treatment of <i>H. nana</i>	37
	b) <i>Nigella sativa</i>	
	Taxonomy	49
	The constitution of <i>Nigella sativa</i> seeds.....	53
	Uses of <i>Nigella sativa</i> seeds	57
	Possible hepatotoxicity of <i>Nigella sativa</i> seeds	71
3.	Aim and Plan of the Work	72
4.	Materials and Methods	74
5.	Results	80
6.	Discussion	96
7.	Summary, Conclusion and Recommendations	108
8.	References	111
9.	Arabic Summary	

List of Tables

Table No.	Details	Page No.
(1-a)	The prophylactic effect of <i>Nigella sativa</i> seeds as indicated by stool egg count	80
(1-b)	The prophylactic effect of <i>Nigella sativa</i> seeds as indicated by intestinal worm load	81
(2-a)	The curative effect of <i>Nigella sativa</i> seeds as indicated by stool egg count	84
(2-b)	The curative effect of <i>Nigella sativa</i> seeds as indicated by intestinal worm load.	85
(3-a)	Comparison between the prophylactic and curative effect of <i>Nigella sativa</i> seeds low dose as indicated by stool egg count	88
(3-b)	Comparison between the prophylactic and curative effect of <i>Nigella sativa</i> seeds low dose as indicated by intestinal worm load	89
(4-a)	Comparison between the prophylactic and curative effect of the high dose of <i>Nigella sativa</i> seeds as indicated by stool egg count	90
(4-b)	Comparison between the prophylactic and curative effect of the high dose of <i>Nigella sativa</i> seeds as indicated by intestinal worm load	91
(5-a)	Comparison between the two doses of <i>Nigella sativa</i> seeds used in treatment as indicated by stool egg count	92
(5-b)	Comparison between the two doses of <i>Nigella sativa</i> seeds used for treatment as indicated by intestinal worm load	93
(6)	The infection rate of <i>H. nana</i> after prophylactic intake of <i>Nigella sativa</i> seeds	94
(7)	The cure rate of <i>H. nana</i> using <i>Nigella sativa</i> seeds	95

List of Figures

Figure No.	Details	Page No.
(1)	a. 30 hours cysticeroid in intestinal villus. b. 96 hour cysticeroid in intestinal villus	17
(2)	<i>Nigella sativa</i> flowering plant	51
(3)	<i>Nigella sativa</i> seeds (x 15) in different views	52
(4)	Prophylactic effect of <i>Nigella sativa</i> seeds as indicated by stool egg count.	82
(5)	Prophylactic effect of <i>Nigella sativa</i> seeds as indicated by intestinal worm load	83
(6)	Curative effect of <i>Nigella sativa</i> seeds as indicated by stool egg count.	86
(7)	Curative effect of <i>Nigella sativa</i> seeds as indicated by intestinal worm load	87

List of Photographs

Photo No.	Details	Page No.
(1)	<i>H. nana</i> mature worm (x 40)	12
(2)	<i>H. nana</i> egg (x 400)	13
