

ELECTIVE SURGERY
FOR
BLEEDING ESOPHAGEAL VARICES
ESSAY

Submitted In Partial Fulfillment For
The Master Degree Of General Surgery

BY

*Dr. Sayed
Galal A. Nashed*
M. B. B. CH.

Supervised

BY

Shamel Abdalla Ali
Professor Of General Surgery

Faculty Of Medicine

Ain Shams University

1984

ACKNOWLEDGEMENT
=====

I always feel indebted to GOD who always helps and blesses me although I am usually faraway from his way.

I tender my most cordial, appreciative and grateful thanks to my professor Doctor SHAMEL ABDALLA ALI, Professor of General Surgery, Ain Shams University, for his enthusiastic guidance and help in performing this essay, who has tendered me his suggestions, advice and helpful criticisms and who has done so much to stimulate and encourage me in this highly responsible task.

I wish to express my utmost gratitude to Doctor NABIL METWALY, Assistant Lecturer of General Surgery, Ain Shams University, for his continuous patience and constructive discussions who guided me with his unceasing criticisms and who revised the whole essay till it came into this shape.

I wish also to acknowledge with thanks the efforts done by Doctor Amoun Lewis for making the necessary illustration and photography and for typing the whole essay.

I wish to express my great thanks to my second mother Kerry Ketry for her care, help and sympathy during the preparation of this essay.

Last but not least I wish to express my indebtedness to my elegant Soul who has suffered a lot during my life and who has promised to pray to GOD for me during her life.

<u>Chapter</u> I	<u>Page</u>
HISTORICAL REVIEW	1
INTRODUCTION	5
 <u>Chapter</u> II	
ETIOPATHOLOGY OF PORTAL HYPERTENSION	7
CLASSIFICATION OF PORTAL HYPERTENSION	10
I - Presinusoidal Portal Hypertension	11
A) Extrahepatic presinusoidal portal hypertension	11
- Clinical manifestation	12
- Etiology	12
B) Intrahepatic presinusoidal portal hypertension.	14
Schistomiasis	14
Other causes of presinusoidal intrahepatic	
portal hypertension	18
Exceptional types of portal hypertension . . .	20
II - Intrahepatic Post Sinusoidal Portal Hypertension..	23
Cirrhosis	23
Defination of cirrhosis	24
Pathogenesis of cirrhosis	25
Pathogenesis of intrahepatic post sinusoidal	
portal hypertension in cirrhosis	27
Classification of cirrhosis	29
Hepatic veno-occlusive disease	34
Budd-Chiari syndrome	36
 PATHOLOGY OF PORTAL HYPERTENSION	
Collateral circulation	37
Splenomegaly	39
Increased lymphatic flow	41
Increased plasma volume	42
Ascites	43
Hepatic encephalopathy	51

- II -

	<u>Page</u>
CLINICAL FEATURES OF PORTAL HYPERTENSION	63
History and general examination	63
Dilated abdominal veins	64
Splenomegaly	66
Liver	67
Ascites	67
Encephalopathy	67
Hemorrhoids	75

Chapter III

DIAGNOSTIC METHODS	76
I VISUALIZATION OF ESOPHAGEAL VARICES	76
- Barium contrast upper gastrointestinal tract studies	77
- Fiberoptic upper gastrointestinal endoscopy	78
II VISUALIZATION OF PORTAL VENOUS SYSTEM (PORTOGRAPHY)	81
- Portal Portography	81
- Retrograde Portography	82
- Percutaneous transnephatic portography	82
- Wedged hepatic venography	83
- Percutaneous intraparenchymal hepatic venography	85
- Umbilical portography	85
- Splenic Portography	87
- Arterial Portography	96
- Celiac artery portogram	99
- Superior mesenteric arterial portogram	100
- Splenic arterial portogram	102
- Scanning Procedures	104
- Scinti-Photosplenoportography	105
III HEMODYNAMIC INVESTIGATIONS :	106
- Splenic pulp pressure	106
- Umbilical vein catheterization	107
- Percutaneous transhepatic portal vein catheterization	107

	page
- Percutaneous intraparenchymal tissue pressure	107
- Wedged hepatic venous pressure	108
- Intraoperative pressure measurement	113
- Estimation of Hepatic Blood Flow	118
- Constant infusion method	118
- Plasma disappearance method	120
- Colloidal radioactive gold technique . . .	121
- Direct measurement of portal blood flow . .	123
IV LABORATORY FINDINGS	125
- Liver Function Tests	125
- Proteins	125
- Carbohydrate and lipids	126
- Enzymes	127
- Dye excretion	128
- Coagulation factor	129
- Bile pigment metabolism	130
- Urine	132
- Hematology	133
- Ammonium tolerance test	134
V LIVER BIOPSY	136
 <u>Chapter IV</u>	
ELECTIVE SURGICAL TREATMENT	139
I PROCEDURES WHICH OBLITERATE THE VARICES	141
1. Elective Injection Sclerotherapy	142
- Endoscopic	142
- Transhepatic	143
2. Esophagogastric devascularization procedures .	144
- Transection and reanastomosis	145
- Esophageal	145
Walker	145
Stappling	146
Sugaira	147
- Gastric ;	150
Tanner	150

	<u>Page</u>
- Tanner	150
Modified Tanner	151
- Esophagogastrectomy (Resection of variceal bearing area) with or without inter- position	152
II PROCEDURES WHICH DECREASE PORTAL PRESSURE AND/OR FLOW	153
1. Reduction of Portal Blood Flow	153
- Hepatic and Splenic arterial ligation. . .	154
- Splenic artery embolization	155
- Splenectomy (Hassab)	156
2. Stimulation of additional Portasystemic venous Collaterals	161
- Omentopexy	162
- Mediastinal packing	162
- Supradiaphragmatic transposition of the spleen	163
3. Portasystemic Shunts	164
A) Total Shunts	166
Portacaval	166
End-to-side	169
Side-to-side	171
Double end-to-side	174
End-to-side with arterilization	175
Splenorenal	179
End-to-side	180
Side-to-side	181
Portorenal	183
Mesocaval	184
End-to-side	184
Interposition	184
B) Selective Shunts	187
Distal splenorenal (Warren)	187
Modified Warren	190
Retroperitoneal approach (Stoney)	190

	<u>Page</u>
Nabseth modification	191
Vang modification	192
Coronocaval (Inokuchi)	
- Selection of patients for shunt operation	200
- Results of shunt operation	203

ARABIC SUMMARY	

LIST OF FIGURES
=====

Figure No.		Page
1	Classification of portal hypertension	11
2	The etiology of presinusoidal intrahepatic portal hypertension.	14
3	Factors concerned in idiopathic portal hypertension.	21
4.	Definition of cirrhosis.	25
5	Bridging necrosis and fibrosis in cirrhosis	26
6	The formation of portal-hepatic venous anastomoses in liver cirrhosis.	26
7	Etiological factors in the Budd-Chiari syndrome	26
8	The sites of the portal-systemic collateral circulation in cirrhosis of the liver.	36
9	Portal diversion by back flow into normally patent branches of the portal system.	39
10	Portal diversion through large connecting channels between the portal and systemic circulations.	40
11	Renal changes in ascites.	47
12	A summary of normal and abnormal aspects of ammonia metabolism.	55
13	Map of metabolic abnormalities in hepatic coma.	56
14	The factors concerned in hepatic encephalopathy.	57
15	The role of false sympathetic neurotransmitters in the disturbed cerebral metabolism in liver disease.	57

Figure No.-----		Page -----
16	Focal disorders in chronic portal-systemic encephalopathy.	68
17	The Reitan number correction test.	69
18	Esophageal varices by barium swallow	77
19	Operative portal portography.	81
20	Trans-hepatic portogram.	82
21	Wedged hepatic venogram.	83
22	Wedged hepatic venogram. Category I	83
23	Wedged hepatic venogram. Category II	84
24	Wedged hepatic venogram. Category III	84
25	Wedged hepatic venogram. Category IV	84
26	Normal splenic portogram.	86
27	Stage I portal hypertension.	89
28	Stage II portal hypertension.	90
29	Stage III portal hypertension.	91
30	Stage IV portal hypertension.	91
31	Portal normotension with segmental splenic hypertension.	92
32	Portal hypertension with segmental splenic normotension.	93
33	Non visualization of portal and/or splenic vein in splenoportography.	94
34	The nonvisualized but patent portal vein.	95
35	The nonvisualized but patent portal and splenic veins.	96
36	Selective celiac angiogram	98
37	Celiac arterial portography in intrahepatic block.	99

<u>Figure No.</u>		<u>Page</u> -----
38	Venous phase of superior mesenteric arteriography.	100
39	Superior mesenteric arterial portography in intrahepatic block.	101
40	Venous phase of splenic arteriography	102
41	Superior mesenteric arterial portography	103
42	Grey-scale ultrasound scan through porta hepatis showing a normal portal vein.	104
43	Transverse ultrasound scan through portal hepatis showing a thrombosed portal vein.	104
44	Diagrammatic illustration of types of pressure determined at operation.	113
45	Differences in pressure patterns between severe and mild portal hypertension.	116
46	Liver scan.	122
47	Direct measurement of portal flow (determined by the electromagnetic flowmeter) and survival	124
48	Trans-hepatic portogram after successful sclerosis.	143
49	Esophageal transection.	146
50	Esophageal transection.	146
51	Tanner's method of portaazygos disconnection.	150
52	Resection of varix-bearing area with or without interposition.	152
53	Diagrammatic representation of a valve fashioned in association with an esophagojejunostomy following esophagogastrectomy.	152

Figure No.		Page

54	Gastroesophageal decongestion and splenectomy.	157
55	Types of portal-systemic venous shunts.	166
56	Portacaval shunt.	167
57	End-to-side portacaval shunt.	169
58	Side-to-side portacaval shunt.	171
59	End-to-side portacaval shunt with arterialization of the liver	177
60	Total hepatic blood flow in 14 patients before and after portacaval anastomosis plus liver arterialization.	178
61	End-to-side splenorenal shunt	180
62	End-to-side mesenteric-caval shunt.	184
63	Interposition mesocaval shunt.	184
64	Distal splenorenal shunt.	187
65	Modified distal splenorenal shunt.	190
66	Left gastric venous-caval shunt	198

LIST OF TABLES

Table No. -----		Page -----
1	Etiology of portal hypertension	10
2	Classification of portal hypertension	11
3	The survival rate of cirrhotic patients admitted to the general hospitals in the U.S.A.	24
4	Causes of death in 235 patients with cirrhosis and varices	25
5	Classification of cirrhosis	30
6	Correlation between the degree of encephalo- lopathy and the time in seconds of the Reitan trail making test.	70
7	Classification of patients with portal hypertension according to the pressure measurements.	117
8	Child's classification of patients with portal hypertension according to the degree of liver function.	131
9.	The fate of cirrhotic patients who survived an episode of bleeding esophageal varices and did not undergo portacaval shunt	139
10	Elective surgical treatment of bleeding esophageal varices.	140
11	Late portal tension in five cases subjected to the decongestion operation.	160
12	Summary of the evolution of portasystemic shunts.	164
13	Comparison of end-to-side and side-to-side portacaval shunt in dogs with experimental cirrhosis and in cirrhotic humans who were treated for bleeding esophageal varices.	172

Table No.		Page ----
14	Results of elective therapeutic distal splenorenal shunt in highly selected patients with liver disease.	192
15	Results of elective end-to-side porta- caval shunts.	203
16	Results of splenorenal shunts.	203
17.	Operative mortality rate of portasystemic shunt with patients classified as good, moderate, or poor risk.	204
18	Long-term survival after portasystemic shunts.	
19	Results of elective portal-systemic shunt in highly selected patients with cirrhosis	204
20	Causes of death in late postoperative period in patients after portasystemic shunts.	204
