

**DIAGNOSTIC PERITONEAL LAVAGE
VERSUS OTHER DIAGNOSTIC MODALITIES
IN BLUNT ABDOMINAL TRAUMA**

THESIS

**Submitted for partial fulfillment of the
M. D. Degree of**

GENERAL SURGERY

BY

Tarek Abd El-Hakim Salem

M.B., B.Ch., M.Sc. (General Surgery)

Supervisors

Prof. Dr. AHMED SEDKY

**Professor of General Surgery
Ain Shams University**

Prof. Dr. AHMED EL-DORRY

**Professor of Radiodiagnosis
Ain Shams University**

Dr. ABD EL-WAHAB EZZAT

**Assist. Professor of General Surgery
Ain Shams University.**

**Faculty of Medicine
Ain Shams University**

1999

Dedicated To

The Soul Of a real human;

" Mohammed Saafan " ()*

(*) Lecturer of Surgery,
Ain Shams University

Acknowledgement

Prof. Dr. Ahmed Sedky, Professor of Surgery, Ain Shams University is the hallmark behind this work without his support, this work wouldn't have seen light.

I am also indebted to **Prof. Dr. Ahmed El-Dorry**, Professor of Radiognosis, Ain Shams University.

Dr. Abd El-Wahab Ezzat, Assistant Professor of Surgery Ain Shams University is the one to whom I can not express my feelings of thanks and delightness for his extreme patience and help to me in every stage until this work has been completed.

CONTENTS

Subjects	Page
• Introduction and Aim of The Work	1
• Review of Literature	
* <i>Evaluation of Blunt Abdominal Trauma</i>	6
* <i>Computed tomography "CT"</i>	22
* <i>Ultrasonography "U/S"</i>	38
* <i>Diagnostic Peritoneal Lavage "DPL"</i>	44
• Patients & Methods	56
• Results	63
• Discussion	73
• Summary & Conclusion	80
• Appendix	82
• References	83
• Arabic Summary.	

LIST OF TABLES

Table No.	Subjects	Page
1	Provides grading system for splenic injuries	11
2	Grading system for hepatic injuries	14
3	Comparison between the characteristic features of DPL and U/S in blunt abdominal trauma	41
4	Positive criteria of DPL	51
5	Patients sex	56
6	Patients ages	56
7	Mechanism of injury in 100 patients with blunt abdominal trauma	57
8	Associated injuries	57
9	Presenting symptoms and signs	58
10	Results of U/S	63
11	Patients with false negative U/S results	64
12	Computed Tomography results	65
13	False negative CT results	65
14	Patient data	66
15	Open and semiopen lavage results	67
16	Results of DPL in 100 patients (open and semiopen) methods	68
17	False negative DPL results	69
18	Injuries	69
19	Associated injuries in 12 of 22 patients with splenic trauma	70
20	Etiology of Splenic trauma in 22 patients ...	70
21	Types of splenic injury	71

LIST OF FIGURES

Fig. No.	Subjects	Page
1	Contrast enhanced abdominal CT: Free fluid	25
2	Contrast-enhanced CT: Free fluid in Douglas pouch	26
3	Contrast enhanced CT scan through lower pelvis. Minimal fluid in pouch of Douglas..	26
4	Contrast-enhanced CT scan through lower pelvis. Marked amount of fluid in pouch of Douglas	27
5	Contrast enhanced CT showing splenic injury due to motor vehicle accident (Arrow)	28
6	Contrast enhanced CT showing liver laceration sustained during a fall (Arrow) ..	29
7	CT scan of abdomen demonstrates large amount of free air (arrow) anterior to the liver	31
8	CT scan through midabdomen shows a large amount of fluid in Morrison's pouch (arrow)	32
9	Contrast-enhanced CT scan through lower pelvis shows moderate amount of intraperitoneal fluid in pouch of Douglas (arrow)	33
10 a, b	DPL, open technique	48
11 a,b	DPL, semiopen technique	49

INTRODUCTION AND AIM OF THE WORK
