

بِسْمِ اللَّهِ الرَّحْمَنِ الرَّحِيمِ

اقْرَأْ بِسْمِ رَبِّكَ الَّذِي خَلَقَ

خَلَقَ الْإِنْسَانَ مِنْ عَلَقٍ

اقْرَأْ وَرَبُّكَ الْأَكْرَمُ الَّذِي عَلَّمَ بِالْقَلَمِ

عَلَّمَ الْإِنْسَانَ مَا لَمْ يَعْلَمْ

المتن ١٠٠٠

RETINOL BINDING PROTEIN IN THE ASSESSMENT OF RENAL FUNCTIONS IN NEONATES

Thesis

**submitted for the partial fulfilment of
Master Degree in Pediatrics**

By

**Sahar Sobhy Moselhy
(M.B., B.Ch)**

Under supervision of

**ASS.PROF.DR. MONA HUSSEIN EL-SAMAHY
Assistant Professor of Pediatrics**

**ASS.PROF.DR. SALWA M. ABOU EL HANA
Assistant Professor of Clinical Pathology**

**FACULTY OF MEDICINE
AIN SHAMS UNIVERSITY
1993**

بسم الله الرحمن الرحيم
﴿رب اشرح لي صدري ويسر لي أمري
واجلل عقدة من لساني
يفقهوا قولي﴾

صدق الله العظيم

سورة طه

My SPECIAL GRATITUDES
To my FAMILY

LIST OF CONTENTS

	<i>Page</i>
-INTRODUCTION AND AIM OF THE WORK	(1)
 -REVIEW OF LITERATURE	 (2)
- Renal functions in the neonates	(2)
* Embryology and Morphology of the genitourinary tract	(2)
* Renal anatomy and morphology	(5)
* Maturation of renal function	(8)
* Renal blood flow (RBF)	(8)
* Glomerular filtration rate (GFR)	(10)
* Sodium regulation	(12)
* Urinary dilution and concentraion ability	(14)
* Potassium regulation	(15)
* Urine analysis	(15)
* Proteinuria	(17)
 - Vitamin A (Retinol) (b)	 (20)
* Nomenclature	(20)
* Functions of vitamin A	(20)
* Retinol binding protein (RBP)	(22)
* Definition	(22)
* Types of retinol binding protein	(23)
* Chemical and physical properties and interactions	(24)
* Regulation of retinol-binding protein metabolism (by vitamin A status in the rat)	(25)

	Page
* The transport of RBP in human plasma	(27)
* The concentration of retinol binding protein, pre-albumin and tansferrin in the sera of newly delivered mothers and children of various ages	(28)
* Serum vitamin A in premature and term neonates.....	(29)
* Retinol binding protein in the assesement of neonatal renal function	(32)
* Other roles of RBP	(36)
 - SUBJECTS AND METHODS	 (40)
 - RESULTS	 (47)
 - DISCUSSION	 (70)
 - SUMMARY	 (77)
 - CONCLUSION AND RECOMMENDATIONS	 (80)
 - REFERENCES	 (82)
 - ARABIC SUMMARY.

LIST OF TABLES

1. Table (1):Clinical data of all the patients group (I)
2. Table (2):Clinical and laboratory data of the intermediate care group (IA).
3. Table (3):The clinical and laboratory data of the intensive care group (IB).
4. Table (4):The clinical and laboratory data of the control group (II).
5. Table (5):Comparison of the blood urea, serum creatinine, urinary creatinine and RBP in the neonates in the 3 groups (T-test).
6. Table (6):Comparison of the blood urea, serum creatinine, urinary creatinine and RBP in the Full term neonates in the 3 groups (T-test).
7. Table (7):Comparison the laboratory data in the full term and preterm neanates in the intensive care group compared to each other using (T-test).
8. Table (8):Association between antibiotic therapy and RBP excretion in urine using chi-square test.
9. Table (9):Association between qualitative measurement of proteinuria and RBP excretion in urine using chi-square test.
