سورة البقرة، الآية ٣٢

Acknowledgment

First of all, thanks to Allah

I would like to thank Prof. Dr. Reda Abdel-Gawad, Professor of Anaesthesiology and I.C.U., Ain Shams University for his kind supervision and real support.

Also, I am grateful to Dr. Mohammed Abdel Khalek, Assistant Professor of Anaesthesiology and I.C.U., Ain Shams University, for his continuous active support and meticulous supervision.

Last but not least, I am indebted to Dr. Azza Youssef, Lecturer of Anaesthesiology and I.C.U., Ain Shams University for her kind patience and continuous advise.

*To my mother and my sister who saved no
time nor effort in helping me
to complete this work*

LIST OF CONTENTS

	Page
• Introduction	1
• Anatomical and physiological considerations of pain	3
• Assessment of pediatiatric pain	39
• Management of acute pain in pediatrics	64
• Management of chronic pain in pediatrics	87
• Pediatric pain clinics	108
• Summary	111
• References	113
• Arabic summary	

LIST OF TABLES

Table No.	Title	Page
Table (1)	Classification of nerve fibres	7
Table (2)	Contrasting characteristics of nociceptive fibres	16
Table (3)	The WHO model of consequences of disease applied to migraine	41
Table (4)	Principal features of pain assessment	42
Table (5)	Comprehensive pain questionnaire	44
Table (6)	CHEOPS scale	55
Table (7)	Objective pain scale	56
Table (8)	Toddler Preschool Postoperative Pain Scale	57
Table (9)	Advantages and disadvantages of cognitive, behavioural and physiologic pain measures	62
Table (10)	Pediatric doses of NASIDs for analgesia	69
Table (11)	Opiate receptor subtypes and actions	71
Table (12)	Opioid analgesics for pediatric pain	75
Table (13)	Selected PCA dose regimens	75
Table (14)	Pharmacology of the most commonly used local anaesthetics for nerve blocks	78
Table (15)	Recommended volumes of anaesthetic solution for common peripheral nerve block procedures	82
Table (16)	Local anaesthetic drug doses for pediatric spinal anesthesia	83
Table (17)	Commonly used dose regimens for a single injection caudal block	85
Table (18)	Tricyclic antidepressants, dose regimens	95

LIST OF FIGURES

Figure No.	Title	Page
Figure (1)	Pain Pathways	9
Figure (2)	Summary of processing and modulation of nociceptive information	21
Figure (3)	Visual analogue scale	45
Figure (4)	Face scale	46
Figure (5)	The Oucher scale	47
Figure (6)	Pain Diary	49
Figure (7)	A pain dairy for 13-years old girl with recurrent headaches	50
Figure (8)	A model of an integrated pharmacological and non-pharmacological approach for controlling a child's pain	110
