CHAPTER-1 INTRODUCTION

1.1 Environmental pollution cycle	1
1.1.1 Global perspective.....	1
1.1.2 Atmospheric deposition	4
1.1.3 Rock weathering	8
1.4 Chemical weathering.....	9
1.1.5 Chemical reactions in soil system.....	14
1.2 Sedimentary systems	20
1.2.1 Sediment diagenesis	20
1.2.2 Sediment-water interaction	22
1.2.3 Role of metal sulphides	24
1.2.4 Role of metal oxides	28
1.3 Water systems	28
1.3.1 Water resources and quality	28
1.3.2 Pathways of rain fall	30
1.3.3 Water pollution	30
1.4 Environmental Monitoring	33
1.4.1 Objectives and strategies	33
1.4.2 Different types of pollutants	34
i- non radioactive pollutants	34
ii- radioactive pollutants	35
1.4.3 Monitoring programmes	38
i- water monitoring	38
ii- monitoring of solids and sludge residues	39

CHAPTER-2 EXPERIMENTAL

2.1	Materials and reagents	42.
2.1.1	Natural and synthetic minerals	42
	i- pretreatment of material	43
	a) iron pyrite and magnetite	43
	b) wurtzite and pyrrhotite	43
	c) δ -aluminium oxide	43
	d) humic acid	44
	ii- characterization of minerals	44
2.1.2	Radioactive tracers.....	46
	i- preparation of labelled chromium(6+)	46
2.1.3	Certified reference materials	51
2.2	Sampling areas and sample collection	53
2.2.1	Sampling areas	53
	i- Ismaillia canal	53
	ii- Berket Karoun	55
2.2.2	Sample collection	57
	i- water samples	57
	ii- sediment samples	57
2.3	Experimental procedures	58
2.3.1	Effect of mineral type	58
	i- chromium uptake	58
	ii- vanadium uptake	58
2.3.2	Effect of contacting time	59
	i- using pyrrhotite	59
	ii- using iron pyrite	59
2.3.3	Effect of solubility	60
2.3.4	Adsorption on inactive mineral oxide	60
	i- effect of mineral concentration	61
	ii- effect of contacting time	62
	iii-effect of humic acid	63
	a) chromium (6+)	63
	b) chromium (3+)	63

2.3.5	Speciation of chromium and vanadium	65
i-	speciation of chromium	65
a)	determination of chromium(6+) and chromium(3+) by ICP-AES	65
b)	determination of total chromium(6+) using Cr-51.....	66
c)	determination of chromium(6+) by ion chromatography	66
d)	determination of chromium(6+) by using Uv-vis spectrophotometry	67
ii-	speciation of vanadium	69
a)	determination of total vanadium by atomic emission spectroscopy	69
b)	determination of vanadium (5+) by using Uv-vis spectrophotometry	70
2.4	Nuclear and non nuclear measurements	72
2.4.1	Gamma-ray measurements and spectroscopy	72
i-	scintillation NaI(Tl) detector	72
ii-	hyper pure germanium detector, HPGe	72
a)	energy calibration	73
b)	correction of external background.....	76
c)	efficiency calibration	76
d)	photo peak detection efficiency for soils and sediments	78
e)	aquatic samples	78
f)	efficiency factor and specific activities	83
g)	self absorption	84
2.4.2	X-ray measurements	86
i-	X-ray diffraction	86
ii-	X-ray absorption spectroscopy near edge structure (XANES) by a synchrotron radiation source.....	89
2.4.3	Inductively couples plasma-atomic emission spectrometry, ICP-AES	90
i-	spectrometric control	91
ii-	wavelength alignment	92
iii-	spectroscopic analysis	92
2.4.4	Ion chromatography	97
2.4.5	Anoxic box	99

2.4.5	Anoxic box	99
2.5	Statistical analysis	99
2.6	An equilibrium metal speciation model	100

CHAPTER-3 RESULTS AND DISCUSSION

3.1	Behaviour of chromium(6+) and vanadium(5+) on different minerals in aquatic systems	102
3.1.1	Sulphide and oxide minerals in environmental	102
3.1.2	Effect of contacting time	105
3.1.3	Effect of mineral type	109
3.1.4	Effect of solubility	132
3.1.5	Speciation of chromium in aquatic media	135
	i- general aspects	135
	a) metal speciation in aquatic systems	135
	b) inorganic speciation	137
	c) organic speciation	138
	d) speciation in chemical reaction and related processes	139
	e) speciation modelling	141
	ii- effect of pH on chromium speciation in presence of iron sulphide.....	143
3.1.6	Distribution behaviour of vanadium (5+)	152
3.2	Redox reaction mediated by natural minerals	165
3.2.1	Redox reaction mediated by iron pyrite	165
3.2.2	Chromium (6+)/ Chromium (3+) transformations ...	168
	i- effect of pH	168
	ii- effect of time	168
3.2.3	Effect of pH on sulphide/sulphate transformation ...	173
3.2.4	Effect of pH on redox potentials (Ev) of chromium and vanadium	183

3.3	Behaviour of chromium(6+) on δ -alumina	192
3.3.1	Effect of pH and equilibration time	194
3.3.2	Effect of mineral concentration	196
3.3.3	Theoretical modelling	203
3.3.4	Theoretical derivation of different forms of chromium	210
3.3.5	Surface-site speciation of δ -alumina	215
3.3.6	Sorption behaviour of chromium on δ -alumina/humic acid system	218
	i-effect of pH on the sorption behaviour of chromium(6+)	219
	ii- effect of pH on the sorption behaviour of chromium (3+)	224
3.4	Measurement of naturally occurring radioactive elements	228
3.4.1	Environmental surveillance	228
3.4.2	Effect of counting time	232
3.4.3	Correction factor	242
3.5	Determination of natural radioactivities	246
3.5.1	Sediments from Isamilia canal and Berket Karoun	246
3.5.2	Water from Ismailia canal and Berket Karoun	246
3.5.3	Application of correction factor for sediment samples	260
	English summary	265
	References	276
	Arabic summary	281

ACKNOWLEDGEMENT

I am deeply thankful to Allah, by grace of whom, the progress and success of this work was possible

I would like to express my deep gratitude and appreciation to Prof. Dr Saad El-Sayed M.Hassan. Prof of Analytical Chemistry, Faculty of Science, Ain Shams university who sponsored this work, and to my supervisors Prof. Dr A.A. Abdel Rassoul , Prof. Dr H.F. Aly and the late Dr. M.Samy El Alfy, of the Egyptian Atomic Energy Authority for suggesting the topic, continuous supervision, guidance and help during the scope of this work. Both the International Atomic Energy Agency (IAEA) and the Forschungs Anlage (FA) of Germany are acknowledged for training awards

Thanks are also to all the staff members, and my colleagues of the Hot Labs. Center, of the Egyptian Atomic Energy Authority for their help.
