Biography

Name : Ghada Hassan Elsayed Ibrahim

Degree Awarded : B. Sc. (Entomology)

Department : Entomology

Faculty : Science

University : Ain Shams University

Date of Graduation : May, 1990

Occupation : Demonstrator/ Department of Entomology
Faculty of Science, Ain Shams University.

Date of Appointment : January 1991

Date of Registration for M. Sc. Award : March, 1994

Acknowledgments

I would like to express my deepest thanks and appreciation to Dr. Reda Ramzy, Assistant Professor of Immunology, Institute of Nutrition, whose invaluable scientific advice, supervision and kind moral support have inspired and guided me from the initial phase of this thesis and throughout my task.

I also wish to extend my sincere gratitude to Dr Adel Gad, Professor of Entomology, Faculty of Science, Ain Shams University because of whom this work is, and to whom I am greatly indebted. It was he who instilled in me the interest in this topic.

Special heartfelt thanks go to Dr. Hoda Farid, Assistant Professor of Entomology, Faculty of Science, Ain Shams University, because of whose guidance, valuable scientific critisism, and continual support, this work saw the light. Profound thanks and gratitude are due for the precious time that Dr. hoda dedicated to it.

Thanks are also due to Dr. Bahira El-Sawaf, head of the Entomology department and the director of the Research and Training Center on Vectors of Diseases for her kind encouragement.

Warmest gratitude goes to all staff members both at the Department of Entomology, and The Research and Training Center for Vectors of Diseases ,Faculty of Science, Ain Shams University for being the kind people that they are. I would like to acknowledge the Entomological field team, especially Dr. Zakaria S. Morsy, all of whom I owe a great deal.

Sincerest appreciation goes to my colleagues at "The Blue Lab" of whom I am proud to be a part of and with whose undying support and mutual respect, I could not have done without. Special thanks are due to Dr: Ibrahim Hassan, lecturer at the dept. of Biochemistry and member of our team for his never-ending assistance and invaluable advice.

This Thesis is my token of appreciation for all their efforts.

My deepest appreciation goes to Dr. Steven Williams at Smith College, and Dr. Joseph Hamburger at the Kuwin Center, for their support, unlimited advice and above all supply of certain material.

The present piece of work was supported in part by the projects: The Peace-Campus and project number 1 U01 AI35855-01 : Protective Immunity in Human Filariasis (ICIDR).
