

STUDY OF VISUAL EVOKED POTENTIALS IN DIABETIC PATIENTS

THESIS
Submitted for the partial fulfillment of
Master Degree In Internal Medicine

BY

Ashraf Fayez Fahim
(M.B., B.Ch., Ain Shams)

UNDER THE SUPERVISION OF

Prof. Dr. Mohamed Fahmy Abd El-Aziz
Professor of Internal Medicine, Endocrinology and Metabolism
Faculty of Medicine, Ain Shams University

Dr. Mahmoud Hemeda El-Rakawy
Lecturer in Neuropsychiatry
Faculty of Medicine, Ain Shams University

Dr. Afaf Abd El-Wahab Haggag
Fellow of Endocrinology and Metabolism
Faculty of Medicine, Ain Shams University

Faculty of Medicine
Ain Shams University
1997

LIST OF ABBREVIATIONS

DM	=	Diabetes mellitus.
IDDM	=	Insulin dependent diabetes mellitus.
NIDDM	=	Noninsulin dependent diabetes mellitus.
VEPS	=	Visual evoked potentials.
CSF	=	Cerebrospinal fluid.
BAEP	=	brain stem auditory evoked potential.
SEP	=	Somatosensory evoked potential.
EEG	=	Electroencephalogram.
ERG	=	Electroretinogram.
CNS	=	Central Nervous System.
PNS	=	Peripheral nervous system.
CT	=	Computed tomography.
NMR	=	Nuclear magnetic resonance.
DD	=	disease duration.
SBP	=	Systolic blood pressure.
DBP	=	Diastolic blood pressure.
FBS (B)	=	Fasting blood sugar (before control).
FBS (A)	=	Fasting blood sugar (after control).
PP (B)	=	Post Prandial Blood sugar (before control).
PP (A)	=	Post Prandial Blood sugar (after control).
Hb	=	Haemoglobin.
Hb A_{1c}	=	Glycosylated hemoglobin.
Lt L100 B	=	Left latency before control.
Rt L100 B	=	Right latency before control.
Lt A100 B	=	Left amplitude before control.
Rt A100 B	=	Right amplitude before control.
Lt L100 A	=	Left latency after control.
Rt L100 A	=	Right latency after control.
Lt A100 A	=	Left amplitude after control.
Rt A100 A	=	Right amplitude after control.

LIST OF TABLES

- Table (1):**(61)
Descriptive Data of the patients
- Table (2):**(62)
Data Of Controls
- Table (3):**(63)
Data of controlled D.M.
- Table (4):**(64)
Data of uncontrolled D.M.
- Table (5):**(66)
Comparison between patients and control
group regarding clinical data studied:
- Table (6):**(69)
Comparison between control subjects and
controlled D.M. regarding clinical data
studied
- Table (7):**(71)
Comparison between control subjects and
uncontrolled D.M. regarding clinical
data studied:

----- List of tables and figures -----

Table (8): (74)
Comparison between group of control DM
and group of uncontrolled D.M.
regarding laboratory studies

Table (9): (75)
Comparison between group of control DM
and group of uncontrolled D.M.
regarding electrophysiological studies:

Table (10): (78)
Comparison before and after treatment
regarding various parameters studied.

Table (11): (82)
Comparison between controlled diabetes and
uncontrolled diabetes after treatment
regarding various parameters studied.

Table (12): (85)
Showed correlation between duration of
diabetes and latency.

Table (13): (85)
Showed correlation between duration of
diabetes and amplitude.

Table (14): (86)
Showed correlation between HB_{1C} before
control and latency in uncontrolled
DM.

----- List of tables and figures -----

Table (15):(86)
Showed correlation between HbA_{1C}
before control and amplitude in
uncontrolled DM.

Table (16):(87)
Showed correlation between HbA_{1C} after
control and latency in uncontrolled D.M

Table (17):(87)
Showed correlation between HbA_{1C}
after control and amplitude in
uncontrolled D.M

----- List of tables and figures -----

LIST OF FIGURES

- Fig. (1):** (27)
Normal visual evoked potential
- Fig. (2):** (53)
Dantec counter point apparatus
- Fig. (3):** (54)
Electrode montage in visual evoked potentials
- Fig. (4):** (67)
Mean level of LP100 in both left and right side in both patients and control groups
- Fig. (5):** (74')
Mean level of HbA1c in both controlled and uncontrolled diabetes
- Fig. (6):** (76)
Mean level of LP100 in both left and right side in both controlled and uncontrolled diabetes.
- Fig. (7):** (79)
Mean level of LP100 before and after diabetic control in both left and right side.

----- List of tables and figures -----

Fig. (8):(80)
Mean level of amplitude in both left
and right side before and after diabetic
control

Fig. (9):(83)
Abnormal visual evoked potential

----- **List of tables and figures** -----

ACKNOWLEDGEMENT

I would like to express my deepest gratitude and appreciation to my Professor and supervisor **Prof. Dr. Mohamed Fahmy Abdel Aziz**, Professor of Internal Medicine and Endocrinology, Faculty of Medicine, Ain Shams University, for his kind supervision, valuable advice and continuous support from the beginning to the end of this work.

Many thanks and gratitude are expressed to **Dr. Mahmoud Hameda El-Rakawy**, lecturer in Neuropsychiatry, Ain Shams University for his guidance and continuous help throughout this work.

I wish to express my appreciation to **Dr. Afaf Abdel Wahab Haggag**, Fellow of Endocrinology and Metabolism, Ain Shams University for her advice and continuous help throughout this work.

Lastly, to **every one** who helped this work to be carried out, I convey my thanks and gratitude.

----- Acknowledgement -----
