

Ain Shams University
Institute Of Postgraduate Childhood Studies

**CEREBRAL ULTRASONOGRAPHY AND
CLINICAL EVALUATION IN THE
NEONATES OF HIGH RISK
DELIVERIES**

Thesis Submitted For Fulfilment
of the PH.D.
in Medical Childhood Studies

By

Dr. Suzan Mohamed Moussa Hakky

Under Supervision Of

Prof. Dr. Maher Mahron

Prof. Of Obstetrics & Gynecology
Faculty of Medicine
Ain Shams University

Prof. Dr. Ibrahim Yassin Abou Senna

Prof. Of Obstetrics & Gynecology
Director of the Special Care Center of the Fetus
Faculty of Medicine
Ain Shams University

Dr. Sanqa Abdel Rahman Mahmoud

Assistant Prof. of Pediatrics
Faculty Of Medicine
Ain Shams University

1996

بِسْمِ اللَّهِ الرَّحْمَنِ الرَّحِيمِ

وَاقْلُ رَبِّ زَكَّنِي عِلْمًا

صَدَقَ اللَّهُ الْعَظِيمُ

سورة طه آية ١١٤

To My Parents
My Husband
&
My Children

Acknowledgment

I would like to express my deep thanks, respect and gratitude to Prof. Dr. Maher Mahran, Prof. of Obstetrics and Gynecology, Ain-Shams University for providing me the subject of the study, for his continuous guidance and support and for providing the means and training facilities to conduct this research.

My deep thanks and appreciation to Prof. Dr. Ibrahim Abou Senna, Prof. of Obstetrics and Gynecology, Ain-Shams University and head of the Special Care Center of the Fetus for his great effort, following and instructing steps of this research.

When I come to Dr. Sanaa Abdel Rahman, Assistant Prof. of Pediatrics, Ain-Shams University, no words of appreciation would be enough to express her great efforts, guidance and supervision. She sincerely provided all the means to conduct this research as it is her owns.

Never to forget to thank Dr. Vlatka Mejaski Bosnjak, Assistant Prof. of Pediatrics, Zagreb University Medical School, for the training which I received under her supervision on the use and technique of cranial ultrasonography.

I am also grateful to all the members of the Special Care Center of the Fetus.

Contents

	Page
INTRODUCTION	1
AIM OF THE WORK	3
REVIEW OF LITERATURE	4
* High - risk newborn	4
* Anatomy of the brain	14
- Cerebral hemispheres	17
- Ventricles of the brain	22
- Meninges	32
- Blood vessels of the brain	34
* Intracranial complications	39
- Intracranial hemorrhage	39
- Post - hemorrhagic hydrocephalus	56
- Hypoxic - ischemic cerebral injury	58
* Physics of ultrasound	65
* Ultrasonographic findings of intracranial complications.	80
- Cerebral edema	80
- Intracranial hemorrhage	82
- Post-hemorrhagic hydrocephalus	89
- Intraparenchymal hemorrhage	92
- Periventricular leukomalacia	94
* SUBJECTS AND METHOD	97
* RESULTS	107
* DISCUSSION	152
* CONCLUSIONS AND RECOMMENDATIONS	163
* SUMMARY	165
* REFERENCES	168
* ARABIC SUMMARY	

List Of Tables

	Page
Table 1 : Maternal conditions	4
Table 2 : Fetal conditions	5
Table 3 : Condition of labor & delivery	6
Table 4 : Immediate neonatal conditions	7
Table 5 : Characteristics of Group I (SVD)	109
Table 6 : Characteristics of Group II (C,S)	109
Table 7 : Characteristics of Group III (Instrumental)	110
Table 8 : Characteristics of Group 1	111
Table 9 : Characteristics of Group 2	112
Table 10 : Characteristics of Group 3	112
Table 11 : Frequency distribution of studied infants according to gestational age.	113
Table 12 : Frequency distribution of studied infants according to weight for age.	113
Table 13 : Frequency distribution of the studied infants according to clinical picture.	114
Table 14 : Comparison of means of variables (maternal age, parity, infant weight and gestational age) in the studied infants according to mode of delivery.	115

Table 15 :	Comparison of means of variables (maternal age, infant weight and gestational age) in the studied infants according to past history of mothers.	116
Table 16 :	Relation between mean maternal age of studied infants and results of first scan. (n = 200)	123
Table 17 :	Relation between mean parity of mothers of studied infants and results of first scan. (n = 200).	124
Table 18 :	Relation between past history of mothers of studied infants and results of first scan. (n = 200).	125
Table 19 :	Relation between past history of mothers of pre-term infants and results of first scan (n = 98).	126
Table 20 :	Relation between mode of delivery of mothers of studied infants and results of first scan. (n = 200).	127
Table 21 :	Relation between gestational age of studied infants and results of first scan. (n = 200).	128

Table 22 :	Relation between weight for age of studied infants and results of first scan. (n = 200).	129
Table 23 :	Comparison of results of first scan of all studied infants between clinically free and those with respiratory problems. (n = 168)	130
Table 24 :	Comparison of results of first scan of all studied infants between clinically free and those with CNS problems. (n = 126).	131
Table 25 :	Relation between clinical picture of pre-term infants and results of first scan. (n = 98).	132
Table 26 :	Relation between results of first & second scan in the studied infants (n = 200).	133
Table 27 :	Relation between results of first & second scan in the pre-term infants. (n = 98).	134

List Of Figures

	Page
Figures 1 : Semi - diagrammatic scheme of the main divisions of the brain.	15
Figure 2 : Lateral aspect of the superolateral surface of the left cerebral hemisphere.	18
Figure 3 : Diagram of the medial surface of the left cerebral hemisphere, after sagittal section of the brain, and removal of the brainstem.	20
Figure 4 : Anatomy of the ventricular system.	24
Figure 5 : Ventricles of the brain.	24
Figure 6 : A : Schematic illustration, of a coronal section through the brain and coverings. B : Enlargement of the area at the top of A.	33
Figure 7 : A diagram of the arteries at the base of the brain.	35
Figure 8 : A schema of the venous sinuses of the dura mater.	38

Figure 9	: a : Comparison and rarefaction of air particles that allow sound to travel through air. b : A sine wave showing oscillations against time.	66
Figure 10	: Reflection at a large, smooth interface.	68
Figure 11	: Reflection and transmission at a specular interface when the sound beam is incident at an angle θ_i .	70
Figure 12	: Cross-sections of ultrasound beams.	73
Figure 13	: Common type of real time, mechanical sector scanner.	76
Figure 14	: Convex or curved array.	78
Figure 15	: Operation of an electronic sector scanner (also referred to as a phased array).	79
Figure 16	: Coronal scan showing diffusely increased parenchymal echogenicity and slitlike ventricles.	81
Figure 17	: Us findings of cerebral edema in an asphyxiated term neonate.	82
