DISCUSSION AND JUDGMENT COMMITTEE

The vice-president for higher studies and research of Ain-Shams University has approved to form the following commmmittee for the discussion of Mr Nadia Abdel Aziz AL
Coastalle.

- 1 Prof. D. Saadia Mohamed Ali Bahader.
Prof. of Psychology Institute of childhood studies Ain Shams Univ. chairman 
- 2 Prof. D. Iman Abdel Salam Saad
Prof. of Pediatrics Cairo University Member 
- 3 Prof. D. Hamed EL Kariat
Prof. of Pediatrics Ain Shams University Member 
- 4 _____
_____ Member

بِسْمِ اللَّهِ الرَّحْمَنِ الرَّحِيمِ

To . .

My Father.

ACKNOWLEDGMENT

I wish to express my gratitude and respectful thanks to Prof. Dr. Saidia Bahader, Professor of Developmental Psychology, Institute of Postgraduate Childhood Studies, Ain Shams University, for honouring me with the supervision of this work, her help and encouragement throughout the work.

My deepest appreciation and profound gratitude to Prof. Dr. Said El Tohamy, Professor of Obstetrics and Gynaecology, Faculty of Medicine, Ain Shams University, for his help, valuable remarks and meticulous review of this work.

I am deeply grateful to Prof. Dr. Raafat Awadallah Hanna, Professor of Biochemistry, National Research Center, for his support, unforgettable assistance, encouragement and help.

In all gratitude, I would like to express my most sincere thanks to Dr. Gamal Samy Ali, Lecturer of Childhood Studies, Institute of Postgraduate Childhood Studies, Ain Shams University, for his help, unforgettable assistance, meticulous supervision and precious suggestions throughout the work.

All my thanks to Dr. Karima Abbas, Lecturer of Medical Physiology, National Research Centre, for her encouragement during this work.

I wish to extend my deep thanks to my husband Ahmed Hashaad, Assistant, Lecturer of Obstetrics and Gynecology, Ain Shams University, who helped me during this work, and to my family for their support and encouragement throughout this work.

CONTENTS

	Page
Introduction	1
Aim of the Work	3
Review of Literature	4
The Fetal Biophysical Profile	4
Fetal Biophysical Profile in High Risk Pregnancy	13
The Non-Stress Test	21
The Contraction Stress Test (CST)	30
Factors Affecting Biophysical Activities	44
Birth Asphyxia	49
Definition and Incidence	50
Pathophysiology	51
Clinical Indicators of Fetal Asphyxia	62
Postasphyxial Sequelae	67
Long Term Follow Up of Neonates with Perinatal Asphyxia	77
Fetal Growth and Development	79
Fetal Growth	79
Intrauterine Growth Retardation	84
Factors Affecting Fetal Growth	87
Development in the 1st Year of Life	105
Risk Factors for Developmental Disability	107
Subjects and Methods	113
Results	122
Discussion	163
Summary and Conclusion	187
Recommendation	190

LIST OF TABLES

	Page
Table (1): Technique and interpretation of biophysical profile scoring.	7
Table (2): Biophysical profile scoring management protocol.	12
Table (3): Causes of asphyxia.	52
Table (4): Normal cord blood gases.	58
Table (5): Hypoxic-ischemic encephalopathy.	69
Table (6): Scoring system for postasphyxial morbidity.	76
Table (7): Recommended daily dietary allowances for women before, during pregnancy, during lactation and for infants 0-5 months.	94
Table (8): Selected developmental milestones, birth to 1st year.	108
Table (9): Biologic risk factors for development.	109
Table (10): Environmental risk factors for development.	110
Table (11): Apgar score.	121
Table (12): Indications for biophysical profile.	122
Table (13): The value of biophysical profile score of both case and control groups.	125
Table (14): The value of biophysical profile score in both male and female newborn in case group.	127
Table (15): The value of biophysical profile score of newborn delivered by NVD and those delivered by CS.	128
Table (16): The values of developmental score of both infants of high risk pregnancy women and normal pregnant women.	129
Table (17): The value of developmental score of both male and female infants in case group.	131

	Page
Table (18): The value of Apgar score after 1, 5 minutes in both newborns of high risk and normal pregnant women	133
Table (19): The values of Apgar score after 1, 5 minutes in both newborns delivered by NVD and CS in case group.	134
Table (20): Blood gases of babies of both high risk and normal pregnant women.	136
Table (21): Weight of babies of both high risk and normal pregnant women.	139
Table (22): Maternal age of both high risk and normal pregnant women.	140
Table (23): Parity of women in both cases and control groups.	141
Table (24): Correlation of different variables with biophysical profile score.	142
Table (25): Correlation of different variables with developmental score.	153
