

BLOOD LEAD IN BREAST FED VERSUS FORMULA FED INFANTS

THESIS

Submitted for partial fulfillment of
Master Degree
in
PAEDIATRICS

Presented by
Rehab Nagah Abbas Mohamed
M.B., B.Ch.(1991)

Under the Supervision Of:

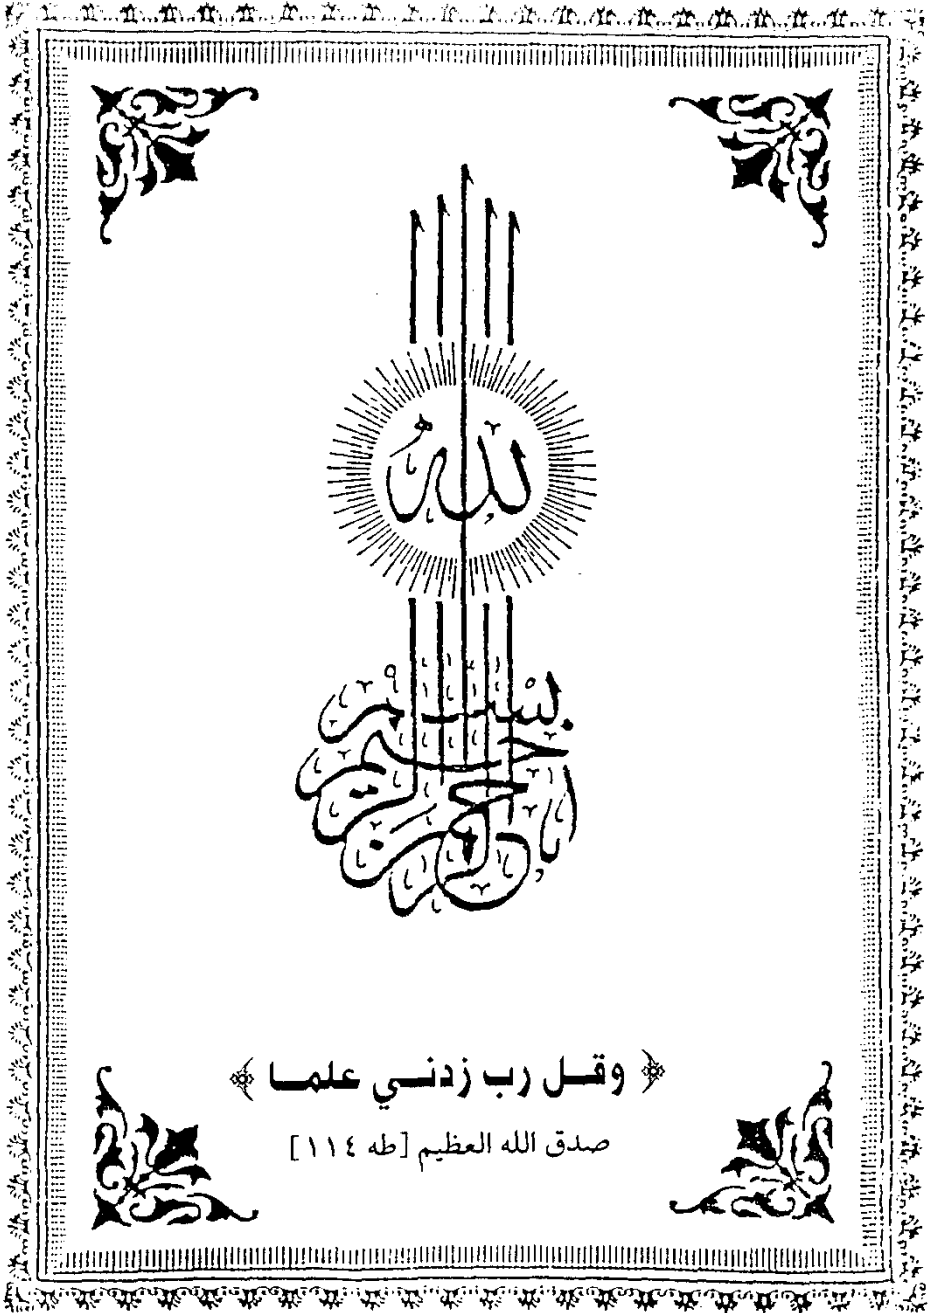

PROF. DR. SANAA YOUSSEF SHAABAN
Professor of Paediatrics
Faculty of Medicine
Ain Shams University

ASSIS. PROF. DR. AHMED ESMAT EL-SAYED SHOUMAN
Assistant Professor of Community, Environmental and
Occupational Medicine
Faculty of Medicine
Ain Shams University

ASSIS. PROF. DR. HODA LOTFI EL-SAYED
Assistant Professor of Paediatrics
Faculty of Medicine
Ain Shams University

**FACULTY OF MEDICINE
AIN SHAMS UNIVERSITY
1998**

﴿وقل رب زدني علما﴾

صدق الله العظيم [طه ١١٤]

ACKNOWLEDGMENT

I am profoundly indebted to Prof. Dr. Sanaa Goussef Shaaban, Professor of Paediatrics, Ain Shams University, I wish to express my deep appreciation and gratitude for her continuous, valuable and meticulous supervision and for supporting me all throughout the work.

My deepest respect and sincere gratitude are presented to Prof. Dr. Ahmed Esmail El-Sayed Shouman, Assistant Professor of Community, Environment, and Occupational Medicine, Ain Shams University, for his kind continuous cooperation and kind effort without which the achievement of this work would be impossible.

I wish to express my deep appreciation to Prof. Dr. Nada Lotfi El-Sayed, Assistant Professor of Paediatrics, Ain Shams University, for her great impeccable effort and moral encouragement during performing and reviewing this work.

I am greatly thankful to Dr. Adham Alshahry Hegazy, Lecturer of Paediatrics, Ain Shams University, for his kind help throughout this work.

Many thanks to Dr. Salwa Mohamed El-Batroui, Lecturer in National Research Centre, for her kind help.

I would express my appreciation to Prof. Dr. Moustafa El-Rodhah, Assistant Professor of Paediatrics, Ain Shams University, for his kind help.

Many thanks go to my wonderful Parents, my dear husband Dr. Maher Syoub, and my dear brother Dr. Diaa El-Din, for their support and continuous encouragement to achieve this work.

Lastly, I wouldn't forget to express my endless gratitude to my dear patients who were the cornerstone of this work.

INDEX

Part	Subject	Page
I	Introduction and Aim of the work	1
II	Review of Literature	
	• Epidemiology of lead	3
	• Safe blood lead level.....	16
	• Metabolism of lead	18
	• Organic alkyl lead toxicity	23
	• Effects of lead on children	26
	• Lead intoxication in infancy and fetuses	28
	• Symptoms of lead poisoning	47
	• Evaluation of the child with a blood lead level ≥ 20 µg/dl	51
	• Prevention and measures to reduce lead exposure	58
	• Treatment of childhood lead poisoning	61
III	Subjects and Methods	75
IV	Results	79
V	Discussion	91
VI	Summary and conclusion	100
VII	Recommendations	103
VIII	References	104
IX	Appendices	130
X	Arabic summary	----

LIST OF TABLES

No.	Title	Page
1	Summary of common sources of lead	4
2	Summary of uncommon sources of lead	13
3	Interpretation of blood lead test results and follow up activities, class of childhood based on blood lead concentration	17
4	Comparison between inorganic and organic lead poisoning in adults in order of frequency of presenting symptoms	24
5	Signs and symptoms of lead ingestion	49
6	Correlation between blood lead levels and clinical effects	50
7	Chelating agents used in treating children in the lead poisoning	61
8	Indication and method of chelation therapy for symptomatic and asymptomatic children	64
9	Comparison of the mean age of infants of the four different studied groups	79
10	Comparison of the mean blood lead levels of infants of the four different studied groups	80
10a	Group I versus group II, III, IV	80
10b	Group II versus group III, IV	81
10c	Group III versus group IV	81
11	Comparison of the mean milk lead level of mothers between both group I and group II	83
12	Comparison of the mental scale between both group I and group IV	85
13	Comparison of the motor scale in both group I and group IV	87
14	Correlation matrix for group I	89
15	Correlation matrix for group IV	90

LIST OF FIGURES

No.	Title	Page
1	Lowest observed effect levels of inorganic lead in children	26
2	Blood lead levels considered elevated	27
3	Schematic representation of the relationship between the concentration of lead in blood and the onset of biochemical and clinical effects	34
4	The inhibition of heme production by lead	41
5	Mean blood lead levels among the four studied groups	82
6	Comparison of the mean milk lead level between group I and group II	84
7	Comparison of the mean mental scale between group I and group IV	86
8	Comparison of the mean motor scale between group I and group IV	88
