

APPLICATION OF GAMMA RADIATION FOR  
THE PRESERVATION OF ANCIENT  
EGYPTIAN CULTURAL OBJECTS.

BY

*ASHRAF MOHAMED ABDEL KHALEK MAHROUS*

THESIS

SUBMITTED IN PARTIAL FULFILLMENT OF THE REQUIREMENTS  
FOR THE DEGREE OF MASTER OF SCIENCE.

IN

MICROBIOLOGY

UNDER THE SUPERVISION OF

*Prof. Dr. HAMID ROUSHDY ELKADI*

*Prof. Dr. SOHAIR A. MOSTAFA*

Professor of Radiobiology &

Professor of Microbiology

President of the Atomic

Botany Dept., Women's College

Energy Authority.

Ain Shams University.

*Dr. MONA IZAK RIZK*

Assistant Professor of Microbiology,

Botany Dept., Women's College,

Ain Shams University.

**BOTANY DEPARTMENT, WOMEN'S COLLEGE,**

**AIN SHAMS UNIVERSITY.**

1988

576  
A.M.

27776

APPLICATION OF GAMMA RADIATION FOR THE  
STERILIZATION OF ANCIENT EGYPTIAN  
CULTURAL OBJECTS.

Thesis Supervisors :

Prof. Dr. Hamid Roushdy El Kadi.

Prof. Dr. Sohair. A. Mostafa.

Dr. Mona Izak Rizk.

Thesis Approved

*H. Roushdy*

*Sohair Mostafa*

*Mona I. Rizk*

Prof. Dr. Mohamed Ibrahim.

Head of Botany Dept.  
Women's College, Ain Shams  
University.

~~*M. Ibrahim*~~  
8/10/14

The candidate passed successfully the examination in the following courses .

1- Special Course :

(Soil Microbiology, Microbial Biochemistry ).

2- Methodology.

3- Statistics.

4- English Language.

5- German Language.

***DEDEDICATED***

***TO My***

***Father, Mother, Wife***

***and***

***Sweet Son.***

## CONTENTS

	Page
1 Acknowledgement .....	1
2 Preface .....	3
3 Introduction .....	4
3.1 I- Why Mummies .....	5
3.2 II- Mummification " Preparing the mummies " .....	6
3.2.1 Mummification procedure .....	7
3.2.2 Rise and fall of mummification .....	16
3.3 Methods of Preservation of Perishable Objects .....	18
3.4 Gamma Radiation for the Preservation of Perishable Objects ..	19
3.5 Ionizing Radiation .....	20
3.6 Non- ionizing Radiation ( Ultra - Violet Rays ) .....	21
3.7 Mode of action of Ionizing Irradiation on Living Cells .....	22
3.8 The effect of ionizing radiation on the bacterial cell .....	25
3.9 Effect of ionizing radiation on the fungal cell .....	26
3.10 Factors influencing the sensetivity of irradiated micro- organisms .....	28
3.10.1 1- Inoculum size .....	28
3.10.2 2- Type and strain of organisms .....	28
3.11 Factors governing the biological effects of radiation .....	31
3.11.1 I - Pre-irradiation growth environment .....	31
3.11.2 II - Radiation environment .....	32
3.11.3 III - Post-radiation environment .....	35
3.12 Dose response curve .....	36
3.13 Sensitivity of microbial enzymes to irradiation .....	38
3.14 X - Raying Mummies .....	41
3.15 Microflora isolated from different Ancient Egyptian Cultural Objects .....	42
4 Materials and Methods .....	46
4.1 1 Samples .....	46
4.2 2 Media .....	48
4.2.1 A- Media used for the isolation of bacteria and fungi..	48
4.2.2 B- Media used for the identification of bacteria and fungi: .....	50
4.2.3 C Isolation and estimation of the microbial flora of the mummie's sample .....	50

4.2.3	Irradiation Procedure .....	57
4.3.1 I	Source of gamma radiation .....	57
4.3.2 II	Irradiation units .....	57
4.3.3 III	Irradiation of the Mummies samples .....	57
4.3.4 IV	Isolation of "The most Radioresistant" Isolates .....	59
4.3.5 V	Purification and Identification of "The most radioresistant" bacterial isolates .....	61
4.3.6 VI	Dose response curve for the radioresistant isolates .....	65
4.3.7 VII	- Irradiation of fungal isolates .....	67
4.3.8 VIII	- Storage of Tanta mummy Samples .....	68
4.3.9 IX	- Detection of the proteolytic activity of the microbial isolates .....	68
4.3.10 X	- Determination of the Minimal Water Activity (Aw) of the bacterial and fungal isolates .....	69
5	RESULTS .....	61
5.1	Purification and Identification of Bacterial and Fungal Flora isolated from the mummies .....	61
5.1.1 A-	Bacterial flora .....	61
5.1.2 B-	Fungal flora .....	69
5.2	Response of the mixture of the Bacterial flora isolated from the mummies to increasing doses of $\gamma$ - radiation .....	73
5.3	Response of the Bacterial flora of the Royal mummy to increasing doses of $\gamma$ - radiation .....	74
5.4	Isolation and Identification of the most Radioresistant bacterial isolates from the Royal mummy samples .....	75
5.5	Dose response curves of the Radioresistant isolates obtained from the Royal mummy samples .....	89
5.6	Response of the bacterial flora of the non-royal mummy samples to increasing doses of $\gamma$ radiation .....	90
5.7	Isolation and Identification of the most Radioresistant Bacterial Isolates from the Nonroyal mummy sample .....	94
5.8	Dose response curves of the Radioresistant isolates obtained from the Non Royal mummy's samples .....	95
5.9	Response of the fungal flora of the Royal and non royal mummy sample to increasing doses of $\gamma$ radiation .....	97
5.10	Proteolytic activity of the bacterial flora isolated from the Royal and Non Royal mummies .....	105
5.11	Minimal water activity (Aw) for the growth of the bacterial isolates of the Royal and Non Royal mummy samples .....	106
5.12	Minimal Aw for the growth of the fungal isolates of the Royal and Non Royal mummy's samples .....	111
5.13	Sterility of irradiated samples of mummies during storage .....	111
6	General Discussion .....	113
7	Summary .....	127
8	References .....	131
9	Arabic Summary .....	

LIST OF TABLES

	Page
TABLE 1	
RESPONSE OF THE BACTERIAL MIXTURE ISOLATED FROM THE ROYAL MUMMY SAMPLE AND SUSPENDED INTO PHYSIOLOGICAL SALINE TO GAMMA RADIATION	76
TABLE 2	
RESPONSE OF THE BACTERIAL MIXTURE ISOLATED FROM THE ROYAL MUMMY SAMPLES (LOADED ON DRY TEST PIECES) TO GAMMA RADIATION	77
TABLE 3	
DOSE RESPONSE CURVE OF <u>B. subtilis</u> ISOLATE R <sub>1</sub> IN THE LIQUID AND DRY STATE	82
TABLE 4	
DOSE RESPONSE CURVE OF <u>B. subtilis</u> ISOLATE R <sub>2</sub> IN THE LIQUID AND DRY STATE.	83

#### Acknowledgement.

I would like to present my profound gratitude to Dr. *Hamid Roushdy El-Radi*, Professor of Radiobiology and President of the Atomic Energy Authority, for his kind supervision, valuable advices and helpful informations .

I would like also to express my great thanks and my gratefulness to Dr. *Sohair Abd El-Aziz Mostafa*, Professor of Microbiology, Botany Department, Women's College, Ain Shams University, for suggesting this study, her valuable advices, continuous supervision, criticism and help in preparing this thesis .

My sincere thanks to Dr. *Nadia Awny*, Lecturer of Microbiology, Botany Department, Faculty of Science, El-Zagazig University, for her encouragement, supervision of the work, criticism and constant guidance during the course of this study and also for her help in preparing the manuscript.

My deep thanks goes to Dr. Mona Isaac Rizk, Assistant Professor of Microbiology, Botany Department, Women's College, Ain Shams University for reading the manuscript and her advises during the course of this work .

I would like also to thank Dr. Shaowky Nakhla, Director General of Restoration and Conservation of Egyptian Antiquities, for his valuable help in obtaining the samples.

I would like also to thank Dr. Nasry.Y.Iskander, Director General of Conservation of Egyptian Antiquities, for his great information in mummificatin procedures .

Thanks also to my colleagues in Microbiology Department, National Center for Radiation Research and Technology (NCRRT) for their cooperation and sincere help .
