

**USEFULNESS OF SYSTOLIC EXCURSION OF THE
MITRAL ANNULUS AS AN INDEX OF LEFT
VENTRICULAR SYSTOLIC FUNCTION
IN DILATED CARDIOMYOPATHY**

Thesis

Submitted in Partial Fulfillment of The Master Degree in
Cardiology

ACKNOWLEDGMENT

Firstly I thank the merciful God who gave me the power to finish this work.

I would like to express my sincere thanks, deepest gratitude and appreciation to ***Prof. Dr. Ramez R. Guindy*** Professor of Cardiology, Faculty of Medicine Ain Shams University, who offered me the generous support and many useful criticisms and suggestions throughout this work. His precious guidance and continued supervision which were kindly given are far beyond acknowledgment.

I am honored to express my sincere thanks and deepest gratitude to ***Dr. Mohamed Ayman M. Saleh*** Lecturer of Cardiology, Faculty of Medicine Ain Shams University, for his kind continued supervision, cordial support, most appreciable advice and great help that have contributed a lot to conduct this work to that term.

I am deeply grateful to ***Dr. Ashraf M. Helal***, specialist of Cardiology, Nasr-City Insurance Hospital, for his kind great help, cooperation in the practical part of this work.

To all my respectable colleagues and members of ***Intensive Care Unit, Dar El-Shifa Hospital***, to whom I belong, I am deeply grateful.

CONTENTS

Subjects	Page
Introduction	1
Aim of The Work	
Review of Literature:	4-
Chapter (I): Mitral Valve Annulus Displacement	4
Anatomical Aspects of The Mitral Annulus	4
Anatomic-Physiologic Properties of The Mitral Apparatus.	6
Physiology of The Mitral Valve Annulus	11
Descent of The Base of The Left Ventricle	13
Role of A.V. Plane Displacement (Descent of The base of The L.V) in The Pumping Function of The L.V	15
Methods of Recording A.V. Plane Displacement	17
Advantages of Echocardiography as a Method of Recording A.V. Plane Displacement	23
Advantages of A.V. Plane Displacement in Assessing L.V. Functions	23
The A.V. Plane Displacement In Various Conditions:	25
1. <i>In healthy subjects</i>	26
2. <i>In patients with coronary artery disease</i>	28
3. <i>In demonstrating the effects of exercise on the A.V. plane displacement in patients with coronary artery disease</i>	29
4. <i>In patients with acute myocardial infarction</i>	31
5. <i>In patients with chronic congestive heart failure.</i>	33
6. <i>In patients with atrial fibrillation (A.F)</i>	35
7. <i>As a way of detecting wall motion abnormalities.</i>	35
8. <i>As a way of assessment of septal function in paradoxical septal motion</i>	37

LIST OF TABLES

No.	Title	Page
A) Tables in Review:		
1	Magnitude of AVPD in different groups of health subjects	27
2	Displacement of the atrioventricular plane in patients with coronary artery disease.	29
3	AVPD in healthy persons and in patients with M.I.	33
4	The magnitude of A.V.P.D in healthy subjects and in patient with chronic C.H.F.	34
5	Number of patients with A.V.P.D \geq 1.0 cm in each group	41
B) Tables of Results:		
I	Comparison between group Ia and group Ib as regard age and sex	90
II	Comparison between group Ia & group Ib as regard pulse, systolic B.P. and diastolic B.P.	90
III	Comparison between group I and group II as regard age and sex.	91
IV	Comparison between group I & group II as regard pulse, systolic B.P. and diastolic B.P.	91
V	Comparison between group Ia & group Ib as regard E.S.V., E.D.V., S.V. and E.F%.	92
VI	Comparison between group Ia and group Ib as regard E.S.D, E.D.D. and FS%.	92
VII	Comparison between group Ia and group Ib as	93

No.	Title	Page
	regard the 4 sites of A.V.P.D and A.V. mean	
VIII	Comparison between the displacement of the 4 sites of A.V. plane in group Ia.	94
IX	Comparison between the displacement of the 4 sites of A.V. plane in group Ib	94
X	Comparison between group I and group II as regard the 4 sites of A.V.P.D and A.V. mean.	95
XI	Group Ia: clinical, E.C.G. and X-Ray chest data.	96
XII	Group Ib: Clinical, E.C.G. and X-Ray chest data.	97
XIII	Group Ia: Echocardiographic data.	98
XIV	Group Ib: Echocardiographic data.	99
XV	Group II: Clinical and Echocardiographic data.	100

LIST OF FIGURES

No.	Title	Page
A) Figures in Review:		
I	The base of the ventricles. The extent of fibrous skeleton is shown	5
II	Effects of left atrium dilatation on the competence of the mitral valve	7
III	Attachement of the anterior and the posterior mitral leaflets	9
IV	Descent of the base (DB) measurements in normal subjects	19
V	Method of measuring the systolic excursion of the mitral annulus	20
VI	A four-chamber view of the heart showing two sites of the atrioventricular (AV) plane	22
B) Figures in Subjects & Methods:		
VII	Standards used to obtain various echocardiographic measurements, as recommended by (A.S.E)	78
C) Figures in Results:		
VIII	Comparison between group Ia and group Ib as regard the 4 sites of A.V.P.D and A.V. mean.	93
IX	Comparison between group I and group II as regard the 4 sites of A.V.P.D and A.V. mean.	95

LIST OF PLATES

No.	Title	Page
I	Method of recording the systolic excursion of the mitral annulus at the septal border	80
II	Method of recording the systolic excursion of the mitral annulus at the anterior border	80
III	Magnitude of AV.S. in a healthy subject (No. 6) of group II.	101
IV	Magnitude of AV.L. in a healthy subject (No. 2) of group II.	101
V	Magnitude of AV.A. in a healthy subject (No. 5) of group II.	102
VI	Magnitude of AV.P. in a healthy subject (No. 8) of group II.	102
VII	Magnitude of AV.S. in a patient (No.1) of group Ia.	103
VIII	Magnitude of AV.L. in a patient (No.7) of group Ia.	103
IX	Magnitude of AV.A. in a patient (No. 10) of group Ia.	104
X	Magnitude of AV.P. in a patient (No.1) of group Ia.	104
XI	Magnitude of AV.S. in a patient (No.17) of group Ib.	105
XII	Magnitude of AV.L. in a patient (No.19) of group Ib.	105
XIII	Magnitude of AV.A. in a patient (No.21) of group Ib.	106
XIV	Magnitude of AV.P. in a patient (No.20) of group Ib.	106
