MORPHOLOGICAL, ANATOMICAL AND HISTOLOGICAL
STUDIES ON SOME LAND SNAILS OF AGRICULTURE
IMPORTANCE IN EGYPT

E-George Kamel

BOARD OF SCIENTIFIC SUPERVISION

Dr. Erian George Kamel, (ph.D.)
Assistant Professor of Zoology, Faculty of Girls,
Ain Shams University.

Head of Department

M. Ashry

MORPHOLOGICAL, ANATOMICAL AND HISTOLOGICAL
STUDIES ON SOME LAND SNAILS OF AGRICULTURE
IMPORTANCE IN EGYPT

COURSES

Studied by the Candidate in Partial Fulfilment
of the Requirements for the Degree of M.Sc.

- 1- Physiology.
- 2- Histology and Experimental Histology.
- 3- German Language.

0

ACKNOWLEDGEMENT

The author is highly indebted to Dr. Erian George Kamel. Professor of Zoology, Girls College for Arts, Sciences and Education, Ain Shams University, for suggesting the point, supervising the work and for his kind help in the preparation of the manuscript.

Grateful thanks are also due to Professor Madiha Abled Moniem Ashry, head of Zoology Department, Girls College for Arts, Sciences and Education for providing the research facilities and for her various assistance.

I wish also to thank my fellow research students for encouragement and moral support.

Finally, my sincere thanks and gratitude to my husband for his patience, understanding and continuous encouragement.

Hanan Tohamy

LIST OF FIGURES

	Page
Fig. 1A : <u>Eobania. vermiculata</u> (Muller) (phylum : Mollusa, class: Gastropoda, Family: Helicidae, Subfamily: Helicinae).	26
Fig. 1B : <u>E. vermiculata</u> showing the head-foot and the tentacles.	26
Fig. 1C : <u>E. vermiculata</u> showing the relaxed head-foot.	27
Fig. 1D : <u>E. vermiculata</u> showing the shell aperture.	27
Fig. 2A : Dorsal view of the shell of the snail <u>E. vermiculata</u> showing the diameter (D) of the shell.	28
Fig. 2B : Ventral view of the shell of snail <u>E.</u> <u>vermiculata</u> showing the shell height (H).	28

- Fig. 3 : A graph in which the maximum shell height and number of whorls are plotted against the shell diameter. 30
- Fig. 4 : A graph in which the ratio of maximum shell height to shell diameter(H/D) is plotted against shell diameter. 31
- Fig. 5 : Diagrammatic drawing of the soft parts of the snail E. vermiculata showing all the internal organs. 32
- Fig. 6 : Lateral aspect of the soft parts of the snail E. vermiculata. 33
- Fig. 7 : Soft parts of E. vermiculata, some structure are seen by transparency. 33
- Fig. 8A : Photomicrograph of the alimentary system of E. vermiculata. 34
- Fig. 8B : Photomicrograph of the buccal mass of E. vermiculata, showing the salivary glands and its ducts. 35

- 16
- Fig. 9A : Diagrammatic drawing of the alimentary tract of E. vermiculata after the removal of the digestive gland. 36
- Fig. 9B : Diagrammatic drawing of the stomach and proximal intestine after making cut in its dorsal walls. 37
- Fig. 10 : Diagrammatic drawing of the jaw. 38
- Fig. 11 : Diagrammatic drawing of the odontophoral cartilage. 39
- Fig. 12 : A camera lucida drawing of separated teeth of the radula showing:
 1- Central tooth (C).
 2- Lateral teeth (L).
 3- Marginal teeth (M). 40
- Fig. 13 : Photomicrograph of a transverse section of the peristome (x 160). 73
- Fig. 14 : Diagrammatic drawing of a part of a transverse section of the peristome (X 450). 74

14

- Fig. 15 : Photomicrograph of a transverse section of the buccal mass passing through the jaw (X 33). 75
- Fig. 16 : Photomicrograph of a transverse section of the buccal mass passing through the jaw to show columnar layer of the jaw and microvilli (X 132). 76
- Fig. 17 : Diagrammatic drawing of a part of transverse section of the buccal mass passing through the jaw (X 450). 77
- Fig. 18 : Photomicrograph of the anterior region of the buccal mass passing behind the level of the jaw (X 33). 78
- Fig. 19 : Diagrammatic drawing of the anterior region of the buccal mass passing behind the level of the jaw (X 450). 79
- Fig. 20 : Photomicrograph of a transverse section of the posterior region of the buccal mass (X 13.2). 80

- 12
- Fig. 21 : Diagrammatic drawing of a part of a transverse section of posterior region of the buccal mass (X 450). 81
- Fig. 22A : Transverse section of radular sac showing its horse-shoe shape (X 13.2). 82
- Fig. 22B : Transverse section of radular sac showing the subradular, supradular epithelium and radular membrane (X132). 82
- Fig. 23 : Drawing showing the structure of the radular sac (X 450). 83
- Fig. 24A : Transverse section of the odontophoral cartilage (X 33). 84
- Fig. 24B : Drawing of an enlarged part of the odontophoral cartilage (X 450). 85
- Fig. 25 : Striated muscle fibres in A and B (longitudinal and transverse sections) (X 450). 86
