ACKNOWLEDGEMENT

~

ACKNOWLEDGEMENT

I wish to express my deep feeling of gratitude to Prof. Zakia Mohammed Riad, Professur of Cytogenetics, Chairman, University College for Women, Ain - Shams University for her mouterly attitude twoards me and for supervising the present work.

May Allah bless her and extend her happy and fruitful life.

I am also indepted to my dear husband and my lovely parents, may Allah bless them.

CONTENTS

C O N T E N T S

	Page
- INTRODUCTION	1
- AIM OF THE PRESENT WORK	18
- MATERIAL AND METHODS.....	19

OBSERVATIONS

- DETERMINATION OF A BASELINE FOR COMPARISON WITH THE TEST GROUPS	22
--	----

PART I

SUSPECTED GENOTOXICITY OF NICKEL

A. EFFECT OF NICKEL ON MITOTIC CHROMOSOMES.....	
A.1. Literature Review	37
A.2. Present Findings.....	47
B. EFFECT OF NICKEL ON SPERM MORPHOLOGY	
B.1. Literature Review.....	61
B.2. Present Findings.....	63

PART II

SUSPECTED GENOTOXICITY OF ALUMINIUM

A. EFFECT OF ALUMINIUM ON MITOTIC CHROMOSOMES.....	
A.1. Literature Review.....	76
A.2. Present Findings.....	80

	Page
B. EFFECT OF ALUMINIUM ON SPERM MORPHOLOGY	
B.1. Literature Review	96
B.2. Present Findings	97
- DISCUSSION	104
- SUMMARY	115
- BIBLIOGRAPHY.....	119
- ARABIC SUMMARY	

LIST OF FIGURES

Fig. No.		Page
Fig. 1.	Normal metaphase chromosomes from a control male <i>Rattus norvegicus</i>	27
Fig. 2.	The karyotype of the metaphase shown in fig.(1).	28
Fig. 3.	A selection of the largest six autosomes (pair 1-3) from several metaphases, arranged in descending order.....	29
Fig. 4.	Autosomes of group B, (4-10) from several metaphases of different control animals.....	30
Fig. 5.	A collection of autosomes number 11-13 from various control animals.....	31
Fig. 6.	Members of the fourth group (autosomes 14-20) as seen in several occasions in the control animals.....	32
Fig. 7.	A collection of the sex chromosomes obtained from various metaphases of the control animals.....	33
Fig. 8.	4 polyploid metaphases from the control rats....	34

Fig. No.		Page
Fig. 9.	Metaphases with missing chromosomes	35
Fig. 10.	Polyploid metaphases from rats treated with a high dose of nickel chloride.....	49
Fig. 11	Polyploid metaphases from rats treated with a low dose of nickel chloride.....	50
Fig. 12.	Metaphases from rats treated with a high dose of nickel chloride.....	51
Fig. 13.	Metaphases from rats treated with a low dose of nickel chloride.....	53
Fig. 14.	Dicentric chromosome seen at several occasions in metaphases of rats treated with a high dose of nickel chloride.....	55
Fig. 15.	Dicentric chromosome seen at several occasions in metaphases of rats treated with a low dose of nickel chloride.....	56
Fig. 16.	Chromatid deletion from several metaphases of rats treated with nickel chloride.....	57
Fig. 17.	Percentage of chromosomal aberrations following injection of nickel chloride.....	60

Fig. No.		Page
Fig. 18.	Regular sperms from a control animal.....	66
Fig. 19.	Different abnormalities of the head region in sperms of control rats.....	67
Fig. 20.	Different abnormalities of the sperm-head of the rats treated with a high dose of nickel chrolide.....	68
Fig. 21.	Different Abnormalities of the head and tail of the rats treated with a high dose of nickal chloride.....	69
Fig. 22.	Different abnormalities of the sperm-head of the rats treated with a low dose of nickel chloride.....	70
Fig. 23.	Different abnormalities of the head and tail of the rats treated with a low dose of nickel chloride.....	71
Fig. 24.	Abnormal sperms following injection of nickel chloride.....	75
Fig. 25.	Metaphases from rats treated with high doses of aluminium chloride.....	84
Fig. 26.	Metaphases from rats treated with low doses of aluminium chloride.....	86

Fig. No.		Page
Fig. 27.	Polyploid metaphases from rats treated with high doses of aluminium chloride.....	87
Fig. 28.	Polyploid metaphases from rats treated with low doses of aluminium chloride.....	88
Fig. 29.	Dicentric chromosome at several occasions in metaphases of rats treated with high doses of aluminium chloride.....	89
Fig. 30.	Dicentric chromosome in metaphases of rats treated with low doses of aluminium chloride..	90
Fig. 31.	Chromatid deletion.....	91
Fig. 32.	An acentric fragment.....	92
Fig. 33.	A chromatid break and chromatid gap.....	93
Fig. 34	Percentage of chromosomal aberrations following injection of aluminium chloride.....	95
Fig. 35	Different abnormalities of the sperms of rats treated with high doses of aluminium chloride..	99
Fig. 36.	Different abnormalities of the sperms of rats treated with low doses of aluminium chloride..	100
Fig. 37.	Abnormal sperms following injection of aluminium chloride.....	103

LIST OF TABLES

Table No.		Page
1	Metal salt concentrations used in the pilot study.....	19
2	Incidence of variant chromosome counts in the control group.....	36
3	The percentage of chromosome abnormalities after treatment with a high dose of nickel chloride at different times.....	58
4	The percentage of chromosome abnormalities after treatment with a low dose of nickel chloride at different times.....	59
5	Abnormally shaped sperms in the control group.	72
6	Abnormally shaped sperms following injection of a high dose of nickel chloride.....	73
7	Abnormally shaped sperms following injection of a low dose of nickel chloride.....	74
8	The percentage of chromosome abnormalities after treatment with aluminium chloride at different times.....	94
