Acknowledgment

Thanks to **God** who offered me the ability to perform this work.

Words can never express my hearty thanks to **Prof. Dr. Magda Yehia Hussein El-Seify**, Professor of Pediatrics, Faculty of Medicine, who has kindly supervised this thesis. I am deeply indebted to her for giving me all the facilities to complete this work.

I wish to express my deepest appreciation and respect to **Dr. Eman Mahmoud Fouda**, Lecturer of Pediatrics, Faculty of Medicine, Ain Shams University. Without her kind supervision and continuous support, this work would not have been accomplished.

I would like to express my deepest gratitude to **Dr. Ahmed Khodair Ali**, Lecturer of Radiodiagnosis, Faculty of Medicine, Ain Shams University, for his continuous advice and great help in fulfilling the practical part of this work.

Last but not least, my deep appreciation is expressed to all staff members and patients of the Pediatric Chest Clinic of Ain Shams University.

Olfat Abdel Haleem

List of Contents

	PAGE
Introduction	1
Aim of the Work	3
Review of Literature	4
Bronchial Asthma	4
Pediatric Pulmonary Function Testing in Asthma	59
Scintigraphic Studies of Lung Disease	67
Patients and Methods	79
Results	87
Discussion	111
Summary	119
Recommendations	121
References	122
Raw Data	147
Arabic Summary	

List of Tables

No.	Table	Page
Table (1):	Risk factors for persistence of asthma from childhood into adult life.	6
Table (2):	Inhaled allergens and asthma.	8
Table (3):	Mechanism of viral-induced asthma.	9
Table (4):	Drug-induced asthma: Some of the drugs reported to cause asthma in susceptible individuals.	12
Table (5):	Classification of asthma by severity of disease.	16
Table (6):	Staging asthma severity.	17
Table (7):	Eosinophil granules.	27
Table (8):	Clinical examination of asthmatic patients.	39
Table (9):	The overall goals of asthma therapy.	43
Table (10):	Environmental control of bronchial asthma.	46
Table (11):	Indications of specific psychological interventions in asthmatic children.	48
Table (12):	Factors that favor consideration for immunotherapy.	54
Table (13):	Static lung volumes	60
Table (14):	Normal values of selected pediatric pulmonary function measurements.	64
Table (15):	Scoring of asthmatic children according to post-bronchodilator FEV ₁ .	65
Table (16):	Statistical comparison between asthmatic and control groups.	88
Table (17):	Statistical comparison between central and peripheral zone clearance in asthmatic and control groups.	90
Table (18):	Statistical comparison between mild and severe asthmatics.	91

No.	Table	Page
Table (19):	Statistical comparison between central and peripheral zone clearance in mild and severe asthmatics.	92
Table (20):	Statistical comparison between asthmatic group on inhaled steroid and asthmatic not on steroid therapy.	94
Table (21):	Statistical comparison between central and peripheral zone clearance in asthmatics who are on steroids and who are not.	96
Table (22):	Statistical comparison between mild asthmatics and control group.	97
Table (23):	Statistical comparison between severe asthmatic and control group.	98
Table (24):	Mean activity (count) at T0, T $\frac{1}{2}$ and T45 in asthmatics and control.	100
Table (25):	Mean activity (count) at T0, T $\frac{1}{2}$ and T45 in mild and severe asthmatics.	102
Table (26):	Mean activity (count) at T0, T $\frac{1}{2}$ and T45 in asthmatics on steroid and who are not.	104
Table (27):	Statistical comparison between male and female asthmatics as regards pulmonary function testing and central zone clearance.	106
Table (28):	Correlation between FEV% and T $\frac{1}{2}$ in different lung zones in asthmatics and control.	108
Table (29):	Correlation between FEV $_1$ % and T $\frac{1}{2}$ in different lung zones in all studied subgroups.	109
Table (30):	Raw data of the control group.	147
Table (31):	Raw data of the asthmatic group.	148
Table (32):	Raw data of the asthmatic group who are on steroid therapy.	149
Table (33):	Raw data of the asthmatic group who are not on steroid therapy.	149

List of Figures

No.	Figure	Page
Figure (1):	Illustration of how bronchial hyperresponsiveness may be linked to airway wall thickening	20
Figure (2):	Mast cell mediators.	26
Figure (3):	Acute and late phases of asthmatic responses.	33
Figure (4):	Summary of strategies for treatment of asthma.	44
Figure (5):	Stepwise approach of asthma management	55
Figure (6):	Subdivisions of static lung volume in a healthy lung and an asthmatic lung.	61
Figure (7):	Flow diagram for interpretation of spirometric data.	66
Figure (8):	Obstructive disease as found in pulmonary emphysema associated with increased lung volumes.	68
Figure (9):	Morphologic factors affecting clearance time.	70
Figure (10):	Clearance of ^{99m}Tc -DTPA aerosol.	76
Figure (11):	Pulmonary function testing apparatus.	82
Figure (12):	Flow volume loop.	83
Figure (13):	Deposition pattern of ^{99m}Tc -DTPA aerosol in entire lungs and central airway regions.	85
Figure (14):	The difference between asthmatic and control groups as regards central zone, peripheral zone clearance and the ratio between both.	89
