

1,5-ANHYDRO-D-GLUCITOL A NOVEL MARKER FOR DIABETES MELLITUS

Essay

Submitted for partial fulfillment of
Master Degree of
Clinical and Chemical Pathology

By

Nihal Seif El-Dein Zakaria

M.B.B.Ch.

Supervised by

Prof. Dr. Gihan Kamal El-Din Hassan Ali

Professor of Clinical Pathology

Faculty of Medicine

Ain Shams University

616 07561

N.S

Dr. Nasser Sadek Rezk

Assist. Prof. of Clinical Pathology

Faculty of Medicine

Ain Shams University

Dr. Arig Aly Mahmoud Seif

Lecturer of Clinical Pathology

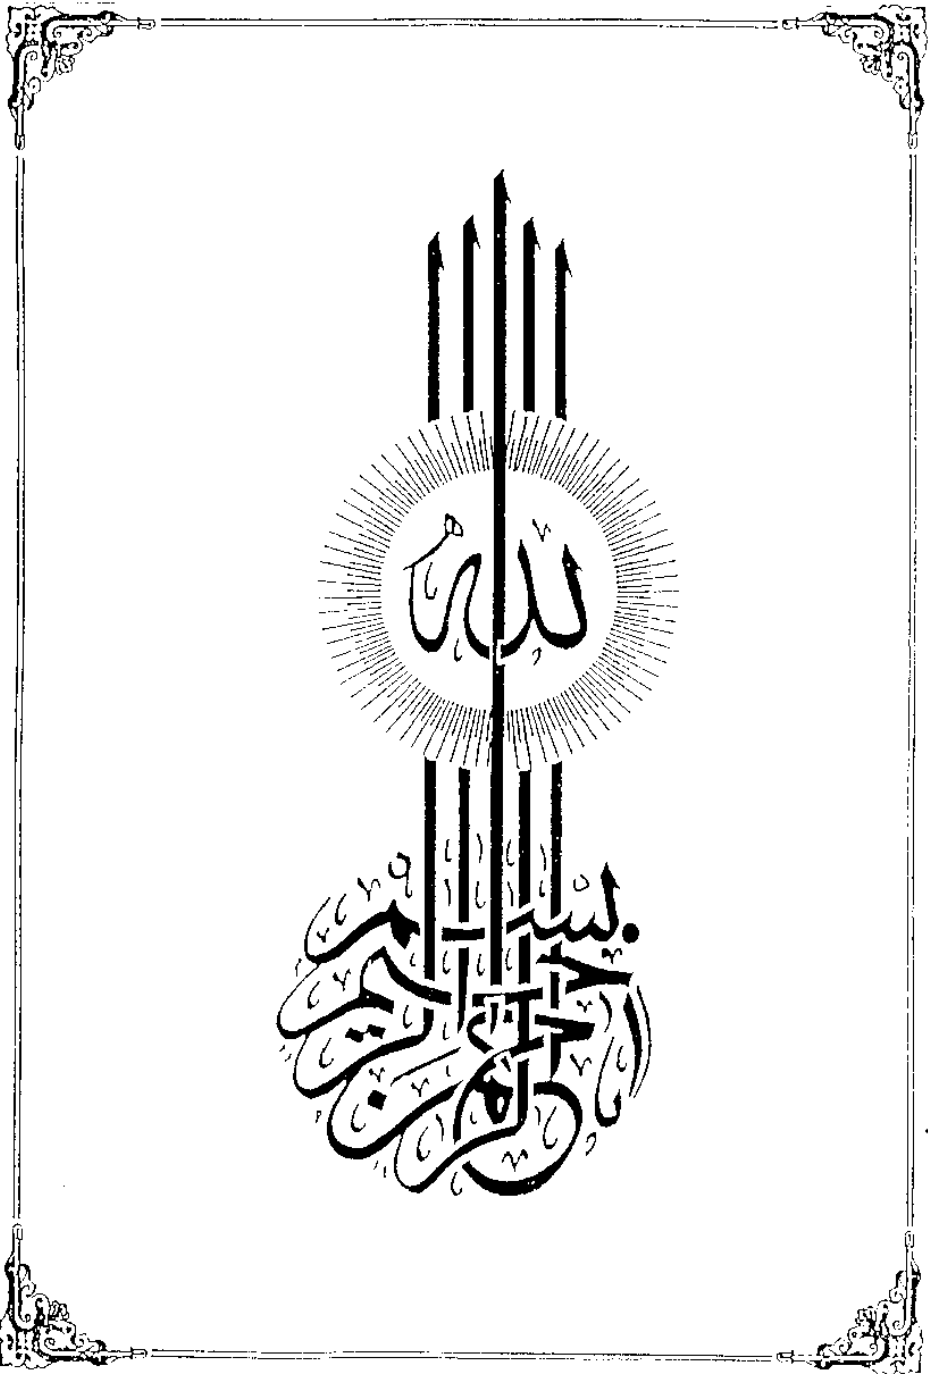

Faculty of Medicine

Ain Shams University

1996

Acknowledgement

First and foremost thanks to "**GOD**" for his help to fulfill this work.

I would like to express my deepest gratitude to **Prof. Dr. Gihan Kamal El-Din Hassan Ali**, Professor of Clinical and Chemical Pathology, Ain Shams University, for her generous guidance, motherly encouragement and support throughout this work.

I am extremely grateful to **Dr. Nasser Sadek Rezk**, Assis. Prof. of Clinical and Chemical Pathology, Ain Shams University, for his kind supervision, precious advice and sincere help during the whole work.

I would like to express my deepest gratitude to **Dr. Arig Aly Mahmoud Seif**, Lecturer of Clinical and Chemical pathology, Ain Shams University for her help, constant advice and support during this work.

CONTENTS

I. Introduction	1
II. Aim of the work	3
III. Review of Literature	4
A. Aetiology and classification of diabetes mellitus	4
B. Diagnosis of diabetes mellitus	11
C. Monitoring of diabetes mellitus	15
D. Glycated hemoglobin	16
E. Fructosamine	29
F. 1,5-Anhydro-D-glucitol: A novel marker for DM	33
1. Chemical structure	34
2. Cellular transport mechanism	36
3. Physiological features	39
4. Origin and disposal	41
5. Role as marker for screening and monitoring diabetes mellitus	45
6. Attribution of 1,5-AG to other diseases	50
7. Comparison of 1,5-AG, HbA _{1c} and fructosamine for detection of diabetes mellitus	52
8. Methods of determination	55
IV. Summary and Conclusion	63
V. References	66
VI. Arabic Summary	

LIST OF TABLES

Tab. No.	Title	Page
1	Classification of diabetes mellitus and other categories of glucose intolerance	6
2	Comparison between IDDM and NIDDM	10
3	Criteria for the diagnosis of diabetes according to NDDG, (1979)	14
4	1,5-Anhydro-D-glucitol contents in food	42
5	The main differences between HbA _{1c} , fructosamine and 1,5-AG	53,54

LIST OF FIGURES

Fig. No.	Title	Page
1	Formation of pre HbA _{1c}	18
2	D-glucose and 1,5-anhydro-D-glucitol in the fischer tollens ring formula	35
3	Schematic summary of 1,5-AG kinetics in human	44
4	Oxidation reaction of 1,5-anhydro-D-glucitol catalyzed by pyranose oxidase	58
5	The enzymatic reaction scheme for determining 1,5-anhydro-D-glucitol	60

LIST OF ABBREVIATIONS

2,3 DPG	2,3 diphosphoglycerate
3-ethylbenzothiazoline-6-sulfonic acid	3-ethylbenzothiazoline-6-sulfonic acid
4-AAP	4-amino antipyrine
B.M.I	Body mass index
CAPD	Continuous ambulatory peritoneal dialysis
CV	Curriculum vitae
DM	Diabetes mellitus
ESRD	End stage renal disease
G-6-P	Glucose-6-phosphate
GC/MS	Gas chromatography /Mass spectrometry
GDM	Gestational diabetes mellitus
GK	Glucokinase
GLC	Gas liquid chromatography
H ₂ O ₂	Hydrogen peroxide
Hb	Hemoglobin
HbA _{1c}	Glycated hemoglobin
HLA	Human leucocyte antigens
HPLC	High performance liquid chromatography
HRP	Horseradish peroxidase
HTIB	3-hydroxy-2,4,6-triiodobenzoic acid
ICA	Islet cell antibodies
IDDM	Insulin dependent diabetes mellitus
IGT	Impaired glucose tolerance
1,5-AG	1,5-Anhydro-D-glucitol
LC/MS	Liquid chromatography / Mass spectrometry
NBT	Nitroblue tetrazolium
NDDG	National diabetes data group

NIDDM	Non-insulin dependent diabetes mellitus
OGTT	Oral glucose tolerance test
PEP	Phosphoenol pyruvate
PK	Pyruvate kinase
Pot-AGT	Potential abnormality of glucose tolerance
Prev-AGT	Previous abnormality of glucose tolerance
PROD	Pyranose oxidase
RBC	Red blood cell
RIA	Radioimmunoassay
SD	Standard deviation
WHO	World health organization
