

**IMPROVING THE PALATABILITY AND
NUTRITIVE VALUE OF SOME RANGE PLANTS
FOR GOAT FEEDING IN SINAI**

By

Kamal Mahmoud Ahmed Youssef

B. Sc. Agric. (Animal Production) Ain Shams University, 1979

M.Sc. (Animal Nutrition) Ain Shams University, 1995

A thesis submitted in partial fulfillment
of
the requirements for the degree of

Doctor of Philosophy

IN
Agriculture Science
(Animal Nutrition)

*Animal Production Department
Faculty of Agriculture
Ain Shams University*

1999

APPROVAL SHEET

IMPROVING THE PALATABILITY AND NUTRITIVE VALUE OF SOME RANGE PLANTS FOR GOAT FEEDING IN SINAI"

BY

Kamal Mahmoud Ahmed Youssef

B.Sc. Agric. Sci (Animal production) Ain Shams Univ., (1979)

M.Sc. Agric. Sci (Animal nutrition) Ain Shams Univ., (1995)

This thesis for Ph.D. degree has been approved by:

Prof. Dr. Gamal El- Din Aly Abd El-Rahman

Professor of Animal nutrition, fac,
of Agric., Zagazig University.

*E. A. Abd El
Rahman*

Prof. Dr. Ahmed Abd El- Latif Zaki

Professor of Animal nutrition, fac,
of Agric., Ain. Shams University.

Ahmed El Latif Zaki

Prof. Dr. Hamdy Mohamed Khattab

Professor of Animal nutrition, fac,
of Agric., Ain. Shams University.

Hamdy M. Khattab

Date of examination: 11/8/1999

**IMPROVING THE PALATABILITY AND
NUTRITIVE VALUE OF SOME RANGE PLANTS
FOR GOAT FEEDING IN SINAI**

By

Kamal Mahmoud Ahmed Youssef

B. Sc. Agric. (Animal Production) Ain Shams University, 1979

M.Sc. (Animal Nutrition) Ain Shams University, 1995

Under the supervision of:

Prof. Dr. H. M. Khattab

*Prof. of Animal Nutrition, Faculty of Agriculture
Ain Shams University*

Prof. Dr. H.M. Kandil

Prof. of Animal Nutrition, Desert Research Center

Dr. S.M. Abdelmawla

*Teacher of Animal Nutrition, Faculty of Agriculture
Ain Shams University*

ACKNOWLEDGEMENT

*I would like to express my gratitude to **Prof. Dr. H.M. Khattab**, Professor of Animal Nutrition, Animal Production Dept. Faculty of Agriculture, Ain Shams University for his direct supervision, advices, valuable guidance throughout this work and revision are also deeply appreciated.*

*Deep thanks and gratitude for **Prof. Dr. H. M. Kandil**, Desert Research Center for his continuous supervision helps and guidance through the whole course of this work.*

*The writer is grateful to **Dr. S.M. Abdelmawla**, animal Production Department, Faculty of Agriculture, Ain Shams University for his supervision, sincere encouragement and revision this work.*

Sincere thanks to all the staff of Animal and Poultry Nutrition Department, Desert Research Center for their assistance in technical work.

My deepest thanks go for my parents and my wife for their sacrifices and help. My deepest thanks extend to my brother, my sisters my son and daughter.

CONTENTS

	Page
1. INTRODUCTION.....	1
2. REVIEW OF LITERATURE.....	3
2.1 Natural range plants as feed resources in Southern Sinai.....	3
2.2. Factors affecting the nutritive value of range plants	7
2.2.1. Plant species and varieties	7
2.2.2. Stage of growth.....	11
2.2.3. Physical and chemical defenses	13
2.2.4. Environmental factors.....	17
2.3. Palatability	21
2.4. Processing methods of unpalatable range plants	23
2.5. Voluntary feed intake of range plants	27
2.6. Effect of feeding some range plants on rumen metabolites.....	30
2.6.1. Rumen ammonia nitrogen.....	30
2.6.2. Rumen volatile fatty acids	31
2.7 Effect of feeding some range plants on blood parameters	33
2.7.1. Blood urea nitrogen (BUN)	33
2.7.2. Blood creatinine concentrations.....	34
2.7.3. Non estrified fatty acids (NEFA)	35
2.8 Daily gain and feed efficiency	36
2.9. Carcass characteristics	37
2.9.1. Dressing percentage	37
2.9.2. Physical carcass composition.....	40
2.9.3. Chemical composition of meat.....	41
2.9.4. Physical characteristics.....	42

3. MATERIALS AND METHODS	44
3.1. The first part of experiment	44
3.2 The second part of experiment	45
3.2.1. Plant making	45
3.2.2. Palatability trial	46
3.2.3. Feeding and digestibility trials	46
3.3. The third part of experiment	47
3.3.1. Palatability and digestibility trials	48
3.3.2. Fattening trial	48
3.3.2.1. Animal and feeding.....	49
3.3.2.2. Carcass characteristics.....	50
3.4. Analytical methods.....	51
3.4.1. Fermentation analysis of silage	51
3.4.2. Feed, refusals and animal excreta analysis	51
3.4.3. Rumen liquor analysis	51
3.4.4. Blood analysis	51
3.5 Statistical analysis	51
4. RESULTS AND DISCUSSION	52
4.1. First part of experiment	52
4.1.1. Survey of common shrubs	52
4.1.1.1. Palatability index.....	52
4.1.1.2. Chemical composition	54
4.1.1.3. Fiber constituents	56
4.2. The second part of experiment	58
4.2.1. Palatability and feeding trial	58
4.2.1.1 Chemical composition	58
4.2.1.2. Voluntary intake during palatability .	
trial	63
4.2.1.3. Digestibility trial.....	71
4.2.1.4. Nutritive value.....	73
4.2.1.5. Nitrogen utilization.....	77

4.2.1.6. Rumen metabolites	80
4.2.1.7. Blood metabolites.....	86
4.3. The third part of experiment	96
4.3.1. Selectivity of plant species	96
4.3.1.1. Palatability trial	96
4.3.1.2. Chemical composition of basal diet .	99
4.3.1.3. Feeding and digestibility trial.....	99
4.3.1.4. Nutritive value.....	103
4.3.1.5. Nitrogen utilization.....	106
4.3.1.6. Rumen parameters.....	109
4.3.1.7. Blood parameters	112
4.3.2. Fattening trial	122
4.3.2.1. Voluntary intake.....	122
4.3.2.2 Live body weight changes	124
4.3.2.3. Profit analysis and feed conversion..	124
4.3.2.4. Slaughter data and carcass characteristics	127
4.3.2.5. Carcass and non carcass components	130
4.3.2.6. Physical characteristics	130
4.3.2.7. Chemical composition of meat.....	132

7. ARABIC SUMMARY	

LIST OF TABLES

Table No.	Title	
1	Common natural ranges and their palatability index for goats, sheep and camels in Southern Sinai.	53
2	Chemical composition of common range plants in Southern Sinai.(% on DM basis).	55
3	Fiber constituents of common range plants in Southern Sinai.	57
4	Mean values of chemical composition of <i>Tamarix mannifera</i> (% on DM basis).	59
5	Mean values of chemical composition of <i>Halocnenum strobilaceum</i> (% on DM basis).	60
6	Mean values of chemical composition of <i>Zygophyllum album</i> (% on DM basis).	61
7	Body weight changes and voluntary intake of goats fed <i>Tamarix mannifera</i> during the feeding trial.	64
8	Body weight changes and voluntary intake of goats fed <i>Halocnenum strobilaceum</i> during the feeding trial.	65
9	Body weight changes and voluntary intake of goats fed <i>Zygophyllum album</i> during the feeding trial.	66
10	Feed and water intakes of goats fed rations containing air dried <i>Tamarix</i> (T), <i>Halocnenum</i> (H) and <i>Zygophyllum</i> (Z).	72
11	Apparent digestibility of rations containing air dried <i>Tamarix</i> (T), <i>Halocnenum</i> (H) and <i>Zygophyllum</i> (Z).	74
12	Nutritive values of goats fed rations containing air dried <i>Tamarix</i> (T), <i>Halocnenum</i> (H) and <i>Zygophyllum</i> (Z).	75

Table No.	Title	
13	Nitrogen utilization of goats fed rations containing air dried <i>Tamarix(T)</i> , <i>Halocnemum (H)</i> and <i>Zgyophyllum (Z)</i> .	78
14	Rumen ammonia nitrogen (mg/100 ml) of goats fed rations containing air dried <i>Tamarix(T)</i> , <i>Halocnemum (H)</i> and <i>Zgyophyllum (Z)</i> .	81
15	Rumen VFA's (m.equiv./100 ml) of goats fed rations containing air dried <i>Tamarix(T)</i> , <i>Halocnemum (H)</i> and <i>Zgyophyllum (Z)</i> .	84
16	Blood urea (mg/100 ml) of goats fed rations containing air dried <i>Tamarix(T)</i> , <i>Halocnemum (H)</i> and <i>Zgyophyllum (Z)</i> .	87
17	Blood creatinine (mg/100 ml) of goats fed rations containing air dried <i>Tamarix(T)</i> , <i>Halocnemum (H)</i> and <i>Zgyophyllum (Z)</i> .	90
18	Blood N.E.F.A. (m.equiv./L) of goats fed rations containing air dried <i>Tamarix(T)</i> , <i>Halocnemum (H)</i> and <i>Zgyophyllum (Z)</i> .	92
19	Selectivity and palatability of three plants (as air-dried).	97
20	Chemical composition and cell wall constituents of diet (on DM basis).	97
21	Feed intake of goats as affected by type of diets during the digestibility trial	100
22	Digestion coefficients of goats as affected by type of diets.	102
23	TDN and DCP intake as affected by type of diets	104
24	Nitrogen utilization of goats as affected by type of diets.	107
25	Rumen ammonia nitrogen (mg/100 ml) of goats as affected by type of diets.	110
26	Rumen VFA's (m.equiv./100 ml) as affected by type of diets.	113

Table No.	Title	
27	Blood urea nitrogen (mg/100 ml) of goats as affected by type of diets.	115
28	Blood creatinine (mg/100 ml) of goats as affected by type of diets	118
29	Blood NEFA (m.equiv./L) of goats as affected by type of diets.	120
30	Feed intake as affected by type of diets.	123
31	Live body weight changes of goats as affected by type of diets during fattening trial.	125
32	Profit analysis and feed conversation of the fattening diets.	126
33	Dressing percentage of goats as affected by type of diets.	128
34	Lean, bone and fat percentage in carcass side and eye muscle area (cm ²) of goats as affected by type of diets.	128
35	Carcass and non carcass components weight (kg) of goats as affected by type of diets.	131
36	Physical characteristics of eye muscle as affected by type of diets.	133
37	Proximate analysis of eye muscle (% on dry matter basis) as affected by type of diets.	133
