THE ROLE OF SOME EGYPTIAN WILD BIRDS AS ENVIRONMENTAL POLLUTERS

By

SAID AHMED MAHMOUD MAZYAD

B.Sc. of Agricultural Sciences
(Plant Protection)

Entomology (Ain Shams University)

Diploma in Medical Entomology (Faculty of Science)

Diploma in Environmental Science, Department of
Biological Science

Under the Supervision of

Prof. Dr. WALY A. ASHOUR

Prof. of Plant Pathology,
Faculty of Agriculture,
Ain Shams University.

Prof. Dr. AHMED SHOUKRY,

Dean of Faculty of Agriculture,
Suez Canal University.

Dr. MAHMOUD E. THARWAT,

Associate Professor in Plant Protection Dept.,
Faculty of Agriculture,
Ain Shams University

1993

APPROVAL SHEET

NAME : SAID AHMED MAHMOUD MAZYAD

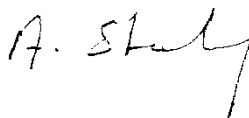

**Title : THE ROLE OF SOME EGYPTIAN WILD BIRDS
AS ENVIRONMENTAL POLLUTERS**

This Thesis For The M.Sc. Degree In
Environmental Sciences Has Been Approved

BY

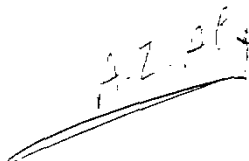

Prof. Dr. AHMED SHOUKRY ABD EL-AZIZ

Prof. of Plant Protection
Dean of Fac. of Agric.
Suez Canal Univ.

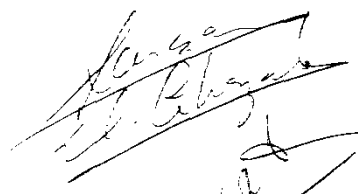

Prof. Dr. AHMED ZAKY ALY

Prof. of Plant Pathology
Agric. Bot. Dept.
Fac. of Agric., Zagazig Univ.

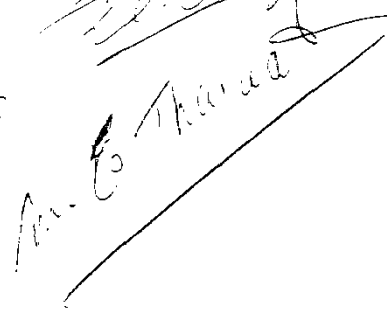

Dr. SAWSAN EL-GHAZALI

Assoc. Prof. Community Medicine
Ain Shams Univ., Cairo, Egypt

Dr. MAHMOUD E. THARWAT

Assoc. Prof. in Ecology
Plant Protection Dept
Fac. of Agric. Ain Shams Univ.

(1993)

ACKNOWLEDGEMENT

The author is very grateful to Prof. Dr. WALY EL-DIN ASHOUR, Professor of Plant Pathology, Faculty of Agriculture, Ain Shams University and Prof. Dr. AHMED SHOUKRY, Dean of Faculty of Agriculture, Suez Canal University, for their valuable supervision and guidance.

Thanks are also due to Dr. MAHMOUD THARWAT, Associate Professor in Plant Protection Department, Faculty of Agriculture, Ain Shams University for his help and assistance during this work.

Many sincere thanks to Dr. MOHAMED EL ZAYAT., Head of Environmental Department, Institute of Environmental Studies and Research, Ain Shams University, for his continuous guidance, discussions and careful revision of all points investigated in this study.

Thanks are due to Dr. Amany Mostafa, Dr. Fatehia Mohamed and Dr. Zomored Anwar for their sincere help in assisting the author during this work. The writer would like to express his deep thanks to all members of Microbiology Department, Faculty of Medicine, Ain Shams University and the Institute of Animal Health, for their encouragement and supplying the facilities.

I would like to acknowledge all staff members of the research and Training Center on Vectors of Diseases for their continuous encouragement.

LIST OF TABLES

INTRODUCTION	1
REVIEW OF LITERATURE	3
- Bacterial disease	4
- Viral disease	12
MATERIAL AND METHODS	24
I. The study areas	24
A. South of Delta (First area)	24
1- Description of the first area	24
2- The common birds in the first area	26
3- Climatic condition in the first area	28
B. North Sinai (Second area)	35
1- Description of the second area	35
2- Topography of Sinai peninsula	35
3- Climate of Sinai peninsula	37
4- Phytogeography	37
5- Human population	38
6- Water sources	38
7- Meteorological records of North Sinai during the study period (January, 1989 to December, 1990)	39
II. The birds under test	44
1. Cattle egret (<i>Bubulcus ibis</i>)	44
2. Quail (<i>Coturnix coturnix</i>)	44
3. Brown-necked raven (<i>Corvus corax ruficollis</i>)	44
4. House sparrow (<i>Passer domesticus</i>)	44

	Page
5. Starling (<i>Sturnus vulgaris</i>)	45
6. Turtle dove (<i>Streptopelia turtur</i>)	45
7. Coot (<i>Fulica atra</i>)	45
8. Egyptian goose (<i>Alopochen agypticus</i>)	45
9. Teal (<i>Anas crecca</i>)	45
10. Pintail (<i>Anas acuta</i>)	45
III. Sample collection	46
A. From birds	46
B. From sources of water	46
IV. Laboratory studies	47
A Bacteriological investigation	47
1- Preparation of samples	47
2- Isolation and identification of pathogenic and non pathogenic bacteria	48
i. Charbohydrate fermentation test.	48
ii. Isolation and purification of the colonies.	48
iii. Biochemical identification	49
1. Sugar fermentation reaction	49
2. Indole test	49
3. Methyl red reaction	50
4. Vogos-proskawer reaction	50
5. Citrate utilization	50
6. Gelatin liquification test	51
7. Urea test	51
iv. <i>Salmonella</i> isolation and identification	51
B. Examination of water samples	52
C. Plant inoculation with pathogenesis	53
D. Virology test	54
