

**AN OPEN COMPARATIVE STUDY OF FLUCONAZOLE (SINGLE
ORAL DOSE), AND KETOCONAZOLE (MULTIPLE ORAL DOSE)
IN THE TREATMENT OF VAGINAL CANDIDOSIS**

THESIS

Submitted for partial fulfillment of
Master Degree in
Obstetrics and Gynecology

Presented By
Magda Mohamed Abo Serea
M.B., B.Ch.

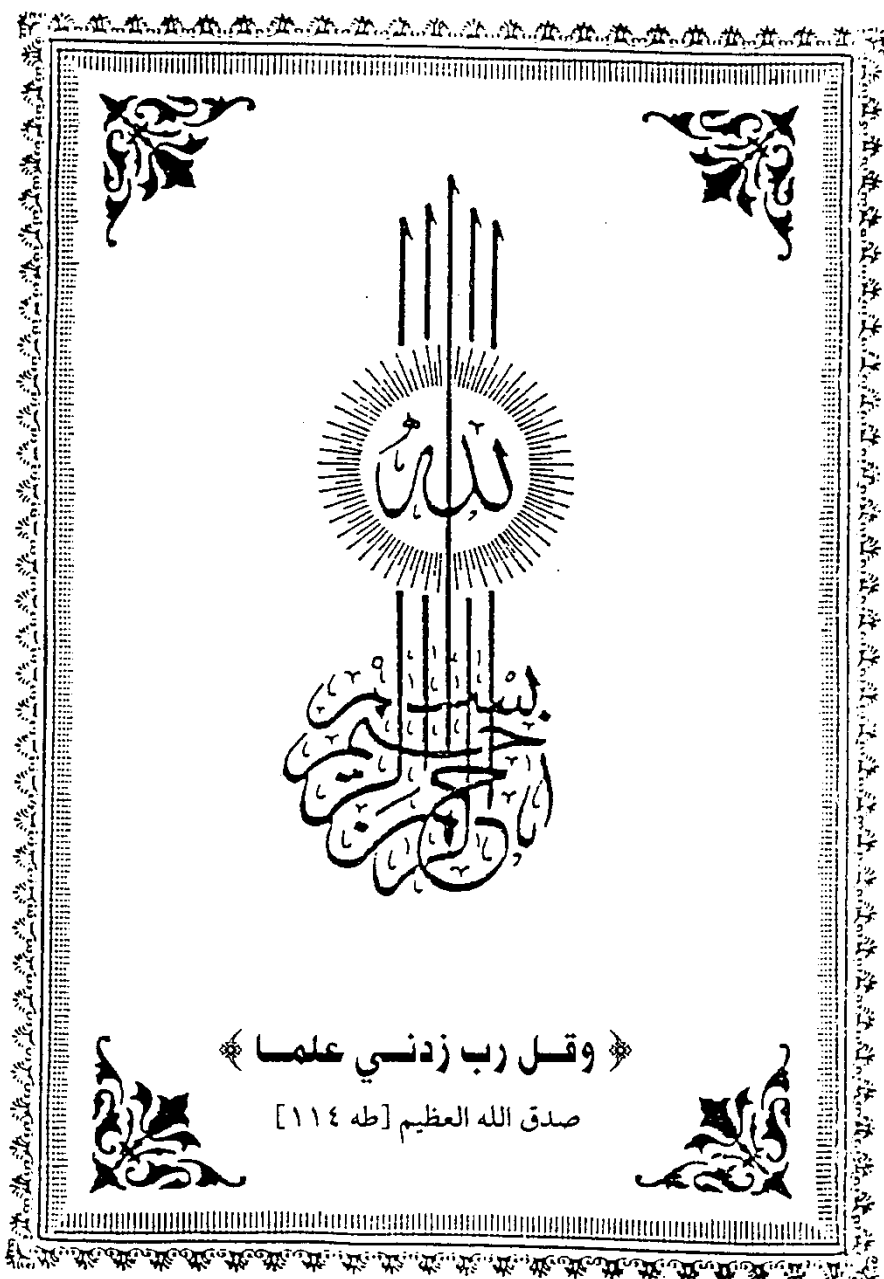

Under supervision of

Prof. Dr. Ali Farid Mohamed Ali
Professor of Obstetrics and Gynecology
Ain Shams University

Dr. Magdy Mohamed Mahmoud Abd El Gawad
Lecturer of Obstetrics and Gynecology
Ain Shams University

Faculty of Medicine
Ain Shams University
1996

My Mother

Acknowledgement

First of all, I would like to express my utter gratitude to God almighty for every thing he had given me, for his kindness and care, and for giving me strength to complete this work.

I would like to express my deepest gratitude and appreciation to **Prof. Dr. Ali Farid Mohamed Ali**, Professor of Obstetrics and Gynecology, Faculty of Medicine, Ain Shams University, for his supervision and guidance in suggesting the topic. His criticism and interest are deeply appreciated.

I am also sincerely thankful to **Dr. Magdy Mohamed Abd El Gawad**, Lecturer of Obstetrics and Gynecology, Faculty of Medicine, Ain Shams University, for his continuous help and for his supervision and valuable discussions. His effort and patience are greatly appreciated both at the inception and termination of the work.

I would like to thank all the patients who had agreed to cooperate in this research, and every person who had aided by any means in delivering this work and rendering it a successful one.

Last but not least, I am most grateful to all members of my family for giving me great support.

CONTENTS

	Page
- Introduction.	1
- Aim of the work.	4
- Review of Literature.	5
*Vaginal defense mechanism and normal vaginal flora..	5
*Causative organisms of vulvovaginal candidosis.	10
*Microbiology of Candida albicans.	11
*Vulvovaginal candidosis.	17

LIST OF TABLES

Tab. No.	Title	Page
(1)	The mean age, parity and duration of the monilial symptoms in 100 patients included in this study.	90
(2)	Symptoms of vaginal candidosis presented by 100 patients included in this study before the treatment.	91
(3)	Percentage of the symptoms of vaginal candidosis present before and after treatment in 100 patients included in this study.	92
(4)	Severity of pruritis in 100 patients with vaginal candidosis before and after treatment.	97
(5)	Change in the severity of the pruritis after treatment in 100 patients included in this study.	98
(6)	Severity of burning in 100 patients with vaginal candidosis before and after treatment.	99
