ENVIRONMENTAL STUDIES ON REARING OF SYNODONTIS SCHALL, BL. Schn.

ارشان

THESIS
Submitted to

Institute of Environmental Studies and
Research, Ain Shams University,
Cairo for the Ph.D. Degree

By

Mamdouh Thabet Kheir

*Assistant Teacher, National Institute
of Oceanography and Fisheries, Cairo.*

SUPERVISED BY

Prof. Dr. A. Kamel Mohamed

*Professor Of Zoology,
Faculty of Science,
Ain-Shams University
Cairo.*

Prof. Dr. A. M. Eisawy

*Professor of Fish Culture,
Institute of Oceanography
and Fisheries,
Cairo.*

Dr. W.D. Labib.

*Assistant Professor of Fish
Culture, Institute of
Oceanography and Fisheries
Cairo.*

Dr. A.A. Hassan

*Lecturer of Zoology,
Faculty of Science
Ain Shams University
Cairo.*

1993

ACKNOWLEDGEMENT

I am obliged to Prof. Dr. A. Kamel, Professor of Zoology, Faculty of Science, Ain Shams University, under whose supervision this work was carried out. I am greatly indebted to him for his keen review and criticism of the manuscript.

I wish to express my gratitude and appreciation to Prof. dr. A.M. Elsawy, Professor of Fish Culture, and Dr. W.D. Labib, Assistant Professor of Fish culture, National Institute of Oceanography and Fisheries for suggesting the study, their valuable advice and continuous encouragement throughout the whole work.

I wish to express my thanks to dr. A.M. Abu El Ezz, Assistant Professor, National Institute of Oceanography and Fisheries, and Dr. A.A. Hassan, Lecturer of Zoology, Faculty of Science, Ain Shams University for their help in this study.

My sincere thanks to all staff of National Institute of Oceanography and Fisheries for the facilities and useful help they offered during the work.

LIST OF TABLES

	<u>Page</u>
Table (1): Average monthly air and water temperature during the period from March, 1988 to August, 1989.....	34
Table (2): Average monthly values of chlorosity, pH and dissolved oxygen in the area of investigation during the period from March, 1988 to August, 1989.....	35
Table (3): Average seasonal variations of phosphates, Nitrites and Silicates (mg/L) in the area of investigation.....	37
Table (4): Seasonal fluctuations of the main phytoplankton groups in the area of investigation (No. org x 10 ³ /L)..	39
Table (5): Seasonal fluctuations of zooplankton organisms (average of the three sites) in the area of investigation (No. org/L).....	44
Table (6): Seasonal fluctuations of benthic organisms (average of the three sites) in the area of investigation during 1988, 1989. (No. org/m ²).....	48
Table (7): Effect of salinity on survival rate of <u>Synodontis schall</u> for a period of 21 days.....	53
Table (8): Effect of different pH levels on survival rate of <u>Synodontis schall</u> for a period of 21 days.....	55

	<u>Page</u>
Table (9): Monthly average surface water temperature in Barrage fish farm experimental ponds during the period from November, 1989 to October, 1990.	57
Table (10): Average increment in growth (in micrometer division) of <u>S. schall</u> (combined sexes) of age groups I, II and III.....	68
Table (11): Length distribution of age groups of <u>S. schall</u> from the commercial catch.....	71
Table(12): The mean observed and calculated weight, (gm.) of <u>S. schall</u> during the period from March, 1988 to August, 1989.....	77
Table (13): Variation of condition factor "K" of <u>S. schall</u> according to different lengths.....	82
Table(14): Relation between total body length L and vertebrae radius (micrometer division) of <u>Synodontis schall</u> ...	85
Table (15): Relationship between age, average total length at capture (cm) and calculated total length at the end of each year of life of male <u>Synodontis schall</u> and percentage of annual increment.....	91
Table (16): Relationship between age, average total length at capture (cm) and calculated total length at the end of each year of life of female <u>Synodontis schall</u> and percentage of annual increment.....	92

	<u>Page</u>
Table (17): Relationship between age, total length at capture (cm.) and calculated total length at the end of each year of life of <u>Synodontis schall</u> (combined sexes) and percentage of annual increment.....	93
Table (18): Average calculated weights for males <u>Synodontis schall</u> at the end of each year and percentage of annual increment.....	98
Table (19): Average calculated weights for females <u>Synodontis schall</u> at the end of each year and percentage of annual increment.....	99
Table (20): Average calculated weights of <u>S. schall</u> (combined sexes) in grams at the end of each year and percentage of annual increment.....	100
Table (21): The constants of the Von Bertalanffy equation of <u>Synodontis schall</u> computed by Ford-Walford, Gulland and Holt and Chapman Methods.....	110
Table (22): Mean lengths in cm. at different ages of <u>Synodontis schall</u> obtained by vertebral method and from the Von Bertalanffy equation.....	112
Table (23): The relative length of the gut at different lengths of <u>Synodontis schall</u>	116
Table (24): Monthly variation in the feeding intensity of <u>S. schall</u> of length group 16-30 cms. during the period from March, 1988 to August, 1989 (Percentage in parenthesis)	11

	<u>Page</u>
Table (25): Monthly variation in the feeding intensity of <u>S. schall</u> of length group 31-50 cms. during the period from March, 1988 to August, 1989 (Percentage in parenthesis).....	119
Table (26): Monthly variations of food items in the guts of <u>Synodontis schall</u> of length group 16-30 cms.....	123
Table (27): Monthly variations of food items in the guts of <u>Synodontis schall</u> of length group 31-50 cms.....	124
Table (28): Percentage composition of the food items of <u>S. schall</u> of length group 16-30 cms.....	125
Table (29): Percentage composition of the food items of <u>S. schall</u> of length group 31-50 cms.....	126
Table (30): Percentage occurrence of food items in the guts of <u>S. schall</u> of length group 16-30 cms.....	128
Table (31): Percentage occurrence of food items in the guts of <u>S. schall</u> of length group 31-50 cms.....	129
Table (32): Grading of various groups of the gut contents of <u>Synodontis schall</u> of length group 16-30 cms.....	133
Table (33): Grading of various groups of the gut contents of <u>Synodontis schall</u> of length group 31-50 cms.....	134
Table (34): Monthly changes in sexual maturity of <u>Synodontis schall</u> (males and females) from march, 1988 to February, 1989 (Percentage in parenthesis).....	139

	<u>Page</u>
Table (35): Monthly variation of average G.S.I. of <u>Synodontis schall</u> male and female in the Nile during the period from March, 1988 to February, 1989.....	143
Table (36): Length frequency distribution of immature and mature males per length group during the spawning season of <u>Synodontis schall</u> from the River Nile	146
Table (37): Length frequency distribution of immature and mature females per length group during the spawning season of <u>Synodontis schall</u> from the River Nile.....	147
Table (38): Monthly sex-ratio (females/males) of <u>Synodontis schall</u>	149
Table (39): Relation between absolute and relative fecundities and length (cm.) of <u>Synodontis schall</u>	152
Table (40): Relation between absolute and relative fecundities and weight (gm.) of <u>Synodontis schall</u>	155
Table (41): Relation between fecundity and age of <u>Synodontis schall</u>	157
Table (42): Average monthly surface water temperature, pH value and the amount of dissolved oxygen in the two experimental ponds from March to September, 1990.....	161

	<u>Page</u>
Table (43): Average growth in length (cm.) of <u>Synodontis schall</u> fed on natural and supplementary feed.....	163
Table (44): Monthly growth in weight, growth rate (G.R.), food efficiency and gain in weight/fish/day of <u>S. schall</u> (6 fish/ division).....	164
Table (45): Monthly growth in weight, growth rate (G.R.), food efficiency and gain in weight/fish/day of <u>S. schall</u> (12 fish/division).....	165
Table (46): Monthly growth is weight, growth rate (G.R.), food efficiency and gain in weight/fish/day of <u>S. schall</u> (24 fish/division).....	166
Table (47): Monthly variations in water, fat, protein and ash contents of <u>S. schall</u> of length group 16-30 cms.....	171
Table (48): Monthly variations in water, fat, protein and ash contents of <u>S. schall</u> of length group 31-50 cms.....	172
Table (49): The annual increment in length of <u>Synodontis schall</u> at Khartoum (Cited from Bishai and Abu Gideiri 1965a).....	199
Table (50): Growth in weight and annual increment in weight of <u>Synodontis schall</u> according to the present work and, Bishai and Abu Gideiri (1965a).....	201
Table (51): Sex-ratio of <u>Synodontis schall</u> in Sudan (Cited from Bishai and Abu Gideiri 1968).....	209

LIST OF FIGURES
