## Contents

	Page
<b>1- Introduction and aim of the work</b>	1
<b>2- Review of Literature</b>	3
<i>I. Psychoimmunology</i>	3
* Immune system	4
* Central nervous system modulation of immunity.	6
* Mediators of central nervous system effects on immune function.	8
* Conditioning of immune processes.	10
* Stress and immune function.	12
* Immune central nervous system feedback.	17
* Immunity, psychiatric and stress disorders.	19
<i>II. The human body the eye and stress</i>	22
* The onset of illness.	26
* The meanings of illness.	26
* Habitual mode of response to stress.	27
* Stress related activation of epstein barr virus.	27
<b>3- Patients and Methods.</b>	31
<b>4- Results.</b>	48
<b>5- Discussion.</b>	72
<b>6- Summary and Conclusion</b>	96
<b>7- References.</b>	98
<b>8- Arabic Summary</b>	115

## **List of Figures**

<b>Figure</b>	<b>Page</b>
1- Eye diseases by group	68
2- IgG level and IgM level by group	69
3- Diabetes Mellitus by group	70
4- Hypertension by group	71

## List of Tables

	<b>Page</b>
1 Functional disorders associated with psychological stress	24
2 The profession grade	32
3 The housing grade	33
4 The education greade	34
5 The income source	35
6 The level of income	36
7 Questinaire for psychiatric mood	40
8 Ophthalmic diagnosis and grouping	42
9 Uveitis : Subjects and methods.	51
11 Behcet's uveitis : Subjects and methods.	53
13 Lateral rectus palsy Subjects and methods.	55
15 Central serous chorioretinopathy	57
17 Vascular occlusion patients and methods	59
19 Optic neuritis patients and methods	61
21 Diabetic retinopathy patients and methods	63
10 Uveitis results.	52
12 Behcet's uveitis results	54
14 Lateral rectus palsy results	56
16 Central serous chorioretinopathy results	58
18 Vascular occlusion results.	60
20 Optic neuritis results.	62
22 Diabetic retinopathy results.	64

24 D.M. by group statustics	66
25 Hypertension by group statistics	67
26 Distress levels before visual loss in C.S.C.	<b>79</b>
27 Type of crisis provoking situation in C.S.C.	81

## **List of Abbreviations**

CNS	Central Nervous system
Ig	Immunoglobulins
NK	Natural killer cells
SRBC	Sheep red blood cells
CS	Conditioned stimulus
MPA	Hypothalamic pituitary axis
CHD	Coronary heart disease
DST	Dexamethasone suppression test
CMV	Cytomegalovirus
HSV	Herpes simplex virus
EBV	Epstein - Barr virus
VCA	Virus capsid antigen
EA	Early antigen
LIF	Leukocyte migration inhibition factor
CFS	Chronic fatigue syndrome
CSC	Central serous chorioretinopathy
H.M.	Hand motion
ETDRS	Early treatment diabetic retinopathy study
ACTH	Adrenocorticotrophic hormone
D.M.	Diabetes Mellitus
