

**SOME ASPECTS ON THE FLOTATION OF FINE  
PARTICLES WITH SPECIAL EMPHASIS IN  
EGYPTIAN PHOSPHATE AND KAOLIN ORES**

A Thesis

submitted to

**CHEMISTRY DEPARTMENT**

**FACULTY OF SCIENCE - AIN SHAMS UNIVERSITY**

for the Degree of

DOCTOR OF PHILOSOPHY (PH.D.)

In **CHEMISTRY**

by

**SOME ASPECTS ON THE FLOTATION OF FINE  
PARTICLES WITH SPECIAL EMPHASIS IN  
EGYPTIAN PHOSPHATE AND KAOLIN ORES**

Thesis Advisors

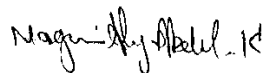

Approved

1- Prof.Dr. Mohamed F. El- Shahat  
Professor of Inorganic and Analytical  
Chemistry, Faculty of Science,  
Ain Shams Univ.

2- Prof.Dr. Mahmoud A. Arafa  
Head of Mineral Processing Lab.,  
CMRDI

3- Dr.Nagui A.Abdel-Khalek,  
Associate Professor, Mineral Processing Lab., CMRDI

Prof. Dr. A.F.M. Fahmy

Head of the Chemistry Dept.

## ACKNOWLEDGMENT

## **ACKNOWLEDGMENT**

*The author would like to express his gratitude to Prof Dr. Mohammed F. El- Shahat, Professor of Inorganic and Analytical Chemistry, Faculty of Science, Ain Shams University for his sponsorship, constructive criticism and deep concern in this work.*

*The continuous support of Prof. Dr. Aziza A.Yousef, former Chairman of CMRDI for making this work possible is highly appreciated.*

*Gratitude is due to Prof.Dr. Tawfik R.Boulos, former Vice Chairman of CMRDI, Mineral Processing Lab., for his deep concern, his continuous encouragement and sincere assistance.*

*The author is, indebted to prof. Dr.Mahmoud A. Arafa, Head of Mineral Processing Lab., CMRDI, for his close supervision, for his valuable discussion and constructive criticism and deep concern in this work.*

*He is indebted to Dr.Nagui A.Abdel-Khalek, Associate Professor, Mineral Processing Lab., CMRDI, for his eminent supervision, for his deep concern, his continuous encouragement and sincere assistance.*

*Gratitude is also due to Prof. Dr.Selim I. Moustafa, Professor, Mineral Processing Lab., CMRDI, his continuous encouragement and sincere assistance.*

*Thanks should be forwarded to all members of Mineral Processing Lab., CMRDI for their assistance and encouragement .*

<b>ABSTRACT</b>	1
<b>LIST OF FIGURES</b>	3
<b>LIST OF TABLES</b>	6
<b>PREFACE</b>	8
<b>SUMMARY</b>	10
 <b>CHAPTER I</b>	
 <b>THEORETICAL CONSIDERATION</b>	12
 <b>(A) Phosphate Rocks</b>	
1.1. Phosphate Ore Types, Occurrences, Nature of Their Associated Gangues and Specifications.	12
1.2. World Phosphate Rock Reserves, Resources and Production.	15
1.3. Status of the Phosphate Mining Industry in Egypt.	19
 <b>(B) Kaolin Ores</b>	25
1.4. Kaolin Structure, Occurrences, Uses and Specifications .....	25
1.5. World Kaolin Ore Localities and Production. ....	29
1.6. Status of Kaolin Ore in Egypt .....	30
1.7. Processing of Kaolin .....	34
 <b>(C) Flotation Processes</b>	
1.8. Froth Flotation Process .....	48
1.8.1. Principles of Froth Flotation .....	48
1.8.2. Flotation Problems of Fine Particles .....	50
1.8.3. Froth Flotation of Phosphate Rocks .....	53
1.8.3.1. Flotation of Igneous Phosphate Rocks.	53
1.8.3.2. Flotation of Sedimentary Phosphate Rocks .....	56
1.8.3.2.1. Siliceous Ore Types .....	57
1.8.3.2.2. Carbonaceous Ore Types .....	62
1.8.4. Froth Flotation of Kaolin Ores .....	65

1.9. Carrier Flotation of Fine Phosphate and Kaolin Ores .....	66
1.10. Column Flotation of Fine Particles .....	70
1.10.1. Principles of Column Flotation .....	71
1.10.2. Applications of Column Flotation for Upgrading Ultrafine Particles .....	74

## **CHAPTER II**

### **EXPERIMENTAL**

2.1. Samples Pulverization and Preparation of Flotation Feed .....	76
2.1.1. The Phosphate Sample .....	76
2.1.2. The Kaolin Sample .....	76
2.2. Characterization of Phosphate and kaolin Samples .....	77
2.2.1. Complete Chemical Analysis .....	77
2.2.1.1. Chemical Analysis of Phosphate Sample .....	77
2.2.1.2. Chemical Analysis of Kaolin Sample .....	77
2.2.2. X-Ray Diffraction Pattern of Samples .....	78
2.2.3. Granulometric Analysis of Samples .....	78
2.2.3.1. Granulometric Analysis of the Phosphate Sample .....	78
2.2.3.2. Granulometric Analysis of the Kaolin Sample .....	78
2.2.4. Liberation Study (Sink-Float) of the Phosphate Sample .....	78
2.2.5. Types of Flotation Reagents .....	79
2.3. Flotation Tests. ....	79
2.3.1. Conventional Froth Flotation Tests .....	79
2.3.1.1. Phosphate Flotation .....	79
2.3.1.2. Kaolin Flotation .....	81
2.3.2. Carrier Flotation Tests .....	82
2.3.3. Column Flotation Tests .....	82
2.3.3.1. The Laboratory Flotation Column Equipment .....	82
2.3.3.2. Flotation in Flotation Column .....	84

## CHAPTER III

### RESULTS AND DISSCUSION

3.1.Characterization of the phosphate and the Kaolin Samples .....	86
3.1.1.X-ray Diffraction Analysis of the Samples .....	86
3.1.2.Complete Chemical Analyais of the Samples .....	86
3.1.3.Granulometric Analysis of the Samples .....	90
3.1.4.Liberation Study of the Phosphate Samples .....	90
A)Flotation of Sebaiya West Phosphate Ore .....	94
3.2.Froth Flotation of the Phosphate Sample .....	95
3.2.1.Optimization of the Main Parameters Affecting the Flotation of the Undeslimed Ground Sample .....	95
3.2.1.1.Effect of Dosage of Oleic Acid .....	95
3.2.1.2.Effect of Sodium Silicate Dosage .....	97
3.2.1.3.Effect of Changing pH .....	99
3.2.2.Effect of Multi-Cleaning of the Rougher Concentrate and Scavenger of the Tail Fraction .....	102
3.2.3.Effect of Desliming the Flotation Feed at Different Cut Sizes .....	104
3.2.4.Separate Flotation of Coarse and Fine Fractions of Different Splitting Sizes .....	106
3.2.5.Separate Conditioning of Coarse and Fine Fractions Before Their Combined Flotation .....	110
3.2.6.Flotation of Discrete Size Fractions .....	113
3.3.Optimization of Some Parameters Affecting the Froth Flotation of the Finest Size Fraction (-0.045 mm.).	116
3.3.1.Effect of Dosage of Depressant .....	117
3.3.2.Effect of Dosage of Collector .....	117
3.3.3.Effect of Speed of the Impeller of the Cell During the Flotation Process .....	118
3.3.4.Cleaning the Rougher Concentrate of the Finest Size Fraction at Different Speeds .....	120
3.4.Column Flotation of the Phosphate Fines .....	121
3.4.1.Effect of Air Flowrate. ....	121

3.4.2. Effect of Frother Concentration .....	123
3.4.3. Effect of Column Height .....	125
3.4.4. Effect of Wash Water Flowrate .....	127
3.5. Column Flotation of Phosphate Ore Ground to Different Sizes .....	130
B) Flotation of Egyptian Kaolin Preconcentrate .....	132
3.6. Optimization of the Main Parameters Affecting on the Froth Flotation of Kaolin Preconcentrate .....	132
3.6.1. Effect of Conditioning Speed of Kaolin With Reagents .....	133
3.6.2. Effect of Conditioning Time of Kaolin With Reagents .....	135
3.6.3. Effect of Impeller Speed during the Flotation of Kaolin .....	138
3.6.4. Effect of Changing pH at Different Impeller Speeds of Conditioning and Flotation .....	140
3.6.5. Effect of Oleic Acid Dosage at Different Conditioning levels .....	144
3.6.6. Effect of Different Depressants and Their Dosages .....	147
3.6.7. Effect of Dosages of Activator .....	149
3.6.8. Effect of Changing the Conditioning Temperature .....	149
3.7. Carrier Flotation of Kaolin Preconcentrate -----	154
3.7.1. Size and Chemical Analysis of Limestone as a Carrier in the Flotation of Kaolin.....	154
3.7.2. Optimization of Some Parameters Affecting the Carrier Flotation of Kaolin Preconcentrate. ....	155
3.7.2.1. Effect of Amount of Carrier .....	155
3.7.2.2. Effect of Conditioning Time of the Pulp with Oleic Acid .....	157
3.7.2.3. Effect of the Close Grain Size of the Carrier on Anatase Flotation .....	159
3.8. Column Flotation of Kaolin Preconcentrate .....	161
3.8.1. Effect of Air Flowrate .....	162
3.8.2. Effect of Wash Water Flow Rate .....	164
3.9. Evaluation of Kaolin Concentrates Obtained by Different Flotation Techniques .....	164
