Head of Chemistry Department

**For the spirit of my father.
For my mother, my husband and my
children in gratitude for all their help.**

ACKNOWLEDGMENTS

I would like to express my sincere and deepest appreciation to my advisors: Prof. Wafaa S. Higazy, Prof. of Physical Chemistry and Vice Dean for Student Affairs, University College for Girls, Ain Shams University and Prof. Sherril D. Christian, G. L. Cross Prof. of Chemistry, University of Oklahoma, Norman, for the valuable guidance, friendly encouragement, and continuous scientific support that were offered to me both in Egypt and in the United States.

My sincere gratitude is also owed to Dr. Faten M. Zakaria, Lecturer of Physical Chemistry in the University College for Girls, for her kind help and cooperation mainly in the computer analysis which was of great importance in the completion of this work.

Many thanks are also extended to my colleague Connie Dunaway, for her friendship and assistance in setting the experimental work and in data analysis done in the lab of the University of Oklahoma.

I would also like to thank Jim Roach, Andrew Slagle, Qi Qu for their help and fruitful scientific discussion.

I will always remember with gratitude the cooperation and friendship of the members of the Chemistry Department in the University College for Girls, Ain Shams University.

I highly appreciate the financial support provided by the Egyptian government.

Finally, I am very grateful to my husband, my children and all the members of my family for their patience, encouragement, and moral support.
