﴿ سورة البقرة - الآية ٣٢ ﴾

ABSTRACT

Transcatheter uterine artery embolization proved to be a highly effective technique for controlling acute and chronic genital bleeding in a wide variety of obstetric and gynecologic disorders.

This alternative approach enables ease of bleeder detection, avoidance of surgical risks, fertility preservations and shorter hospitalizations.

&
My Husband**

ACKNOWLEDGMENT

Thanks first and last to GOD as we owe him for his great care, support and guidance in every step in our life.

*Words do fail me when I come to express my sincere indebtedness, profound gratitude and cordial appreciation to my **Prof. Dr. Faten Mobamed Kamel** Assistant Professor of Radiodiagnosis, Faculty Of Medicine, Ain Shams University, for her moral support, valuable supervision and for enabling me to fulfill this work. She is not only my Professor to whom I am very grateful, but She is also a human to whom I wish always the best of everything.*

*Special thanks are due to **Dr. Mounir Sobhy** Lecturer of Radiodiagnosis, Faculty Of Medicine, Ain Shams University, for dedicating so much of his precious time and effort and for his kindness, honest and constant guidance to complete this work.*

Dina
