

**ULTRASONIC THICKNESS OF THE  
ENDOMETRIUM CORRELATED TO BODY  
MASS INDEX IN MENOPAUSAL WOMEN**

*Thesis*

Submitted for partial fulfilment of the  
Master Degree in Obstetrics and Gynaecology

By

**Ghada Mahmoud Mansour**

*M.B., B.Ch., Ain Shams University*

Under Supervision Of

**Prof. Dr. Mohammed Abd Allah El-Maraghy**

**M.D., F.R.C.O.G.**

*Professor of Obstetrics and Gynaecology*

*Faculty of Medicine*

*Ain Shams University*

**Dr. Alaa El-Din Hamed El-Feky, M.D.**

*Lecturer of Obstetrics and Gynaecology*

*Faculty of Medicine*

*Ain Shams University*

وقل رب زدني علما

صدق الله العظيم (طه ١١٤)

## *Acknowledgments*

I wish to express my deep indebtedness and gratitude to **Prof. Dr. Mohammed Abd Allah El-Maraghy**, Professor of Obstetrics and Gynecology, Ain Shams University, for honoring me by his supervision on this work, his precious comments and guidance in every aspect of this thesis and his greatest help to get this work out to light.

I would also express my sincere thanks and deepest appreciation to **Dr. Alaa Eldin Hamed El-Feky**, Lecturer of Obstetrics and Gynecology, Ain Shams University, for the greatest help and effort he offered to me during this work and his glorious, creative ideas in each aspect of it.

Also I express my thanks to the special care center of the fetus for performing pelvic ultrasound scans for the cases included in this study.

My thanks also to the unit for early cancer detection for performing histopathological examination of the specimens.

## CONTENTS

<b>Introduction and aim of the work</b>	1
<b>Review of Literature</b>	
The endometrium	3
Endometrial hyperplasia	12
Obesity and its relation to endometrial hyperplasia	22
Ultrasonographic imaging of endometrium	37
<b>Subjects and Methods</b>	43
<b>Results</b>	49
<b>Discussion</b>	83
<b>Summary</b>	95
<b>Recommendations</b>	98
<b>References</b>	99
<b>Arabic Summary</b>	

## LIST OF TABLES

Tab. No.	Title	Page
1	The new classification of endometrial hyperplasia	16
2	Endometrial cancer risk factors	18
3	Multiple risk factors in endometrial cancer	19
4	Normal variations of endometrial thickness	40
5	Age distribution among the 150 women	49
6	Parity distribution among 150 women	51
7	Years of menopause-distribution among 150 women	53
8	Age at menopause (distribution among 150 women)	55
9	Summary of means and ranges of different data	57
10	Number and percentage of menopausal women presenting with various medical disorders	59
11	Menopausal women presenting with gynecological disorders	61
12	Number and percentage of contraceptive pills users	61
13	Number of cases around the cut off value of endometrial thickness	63
14	Endometrial thickness distribution among 150 women	64
15	Number and percentage of 49 cases with different histopathological findings	67

16A	Age, endometrial thickness and histopathological findings in the 8 malignant cases	68
16B	Data of 49 females who had undergone dilatation and curettage operations	69
17	BMI distribution among 150 women	71
18	Waist/hip ratio distribution among 150 women	73
19	Mean endometrial thickness in groups of females having medical disorders	75
20	Mean endometrial thickness in diabetic hypertensive females: obese and non obese.	77

## LIST OF FIGURES

Fig. No.	Title	Page
1	Correlation between menstrual cycle and ovarian and pituitary hormones	6
2	Dating of human endometrium	7
3	Profiles of endometrial thickness through out the cycle	8
4	Graphic presentation of the menstrual cycle in absence of fertilization	9
5	The interaction between different types of endometrial hyperplasia	12
6	Scale for BMI determination	27
7	Grades of obesity	31
8	Age distribution	50
9	Parity distribution	52
10	Years of menopause	54
11	Age at menopause distribution	56
12	Percentage of medical disorders	60
13	Percentage of gynecological disorders	62
14	Endometrial thickness in millimeters	65
15	Distribution of body mass index	72
16	Waist/hip ratio distribution	74
17	Scatter diagram representing the correlation between BMI and endometrial thickness	81
18	Scatter diagram representing the correlation between waist/hip ratio and endometrial thickness	82

## **LIST OF ABBREVIATIONS**

<b>BMI</b>	Body mass index
<b>DM</b>	Diabetes mellitus
<b>DVT</b>	Deep venous thrombosis
<b>FFA</b>	Free fatty acids
<b>FFM</b>	Fat free mass
<b>GIT</b>	Gastrointestinal tract
<b>HRT</b>	Hormone replacement therapy
<b>LBM</b>	Lean body mass
<b>LPL</b>	Lipoprotein lipase
<b>NHANES</b>	National health and nutrition examination surveys
<b>PMS</b>	Post menopausal syndrome
<b>RW</b>	Relative weight
<b>SD</b>	Standard deviation
<b>TAS</b>	Transabdominal scan
<b>TVS</b>	Transvaginal scan
<b>US</b>	Ultrasound
<b>VLDL</b>	Very low density lipoproteins
