

**APPLICATION OF POSITRON  
ANNIHILATION LIFETIME TECHNIQUE  
TO THE STUDY OF  
POLYMERS AND MINERALS**

63037

**THESIS  
SUBMITTED FOR THE DOCTOR DEGREE  
OF PHILOSOPHY IN  
PHYSICS  
TO  
DEPARTMENT OF PHYSICS  
FACULTY OF SCIENCE  
AIN SHAMS UNIVERSITY**

**By**

**Ehsan Abdel Halim Ahmed Gomaa**

**B.Sc (1984)**

**M.Sc(1990)**

**1997**

## ACKNOWLEDGMENT

### Acknowledgment

*I express my feeling of greatest gratitude and appreciation to my supervisor **Prof. Dr. M. Mohsen** for valuable suggestions, advice and fruitful discussions.*

*I am most grateful to **Prof. Dr. A. Van Veen** and **Dr. H. Schut** from IRI, TU-Delft, the Netherlands, for their kind supervision, valuable suggestions and interesting comments.*

*Sincere thanks also due to **Dr. E. Abdel Ghafar** for her kind encouragement.*

*I wish to express my gratitude to **Prof. Dr. H. Van Dam** Chairman of Reactor Physics Department (TU-Delft) for offering me a working place and for allowing me to use the facilities of his Department.*

*Thanks are also due to all **members** of the nuclear solid state Lab. Faculty of Science, Ain Shams University for their kind cooperation and support.*

*I especially thank my husband **Adel. M. Hassan** for his everlasting support, encouragement during this work.*

# CONTENTS

## **Contents**

<b>Subject</b>	<b>Page</b>
<b><u>List of Figures</u></b>	IV
<b><u>List of Tables</u></b>	IX
<b><u>Abstract</u></b>	1
<b><u>Chapter 1: Introduction</u></b>	3
<b><u>Chapter 2: Theoretical details</u></b>	9
2.1 Annihilation process	9
2.2 Positron behavior in solid	10
2.2.1 Positron slowing down and annihilation	10
2.2.2 Positronium formation	12
2.2.2.1 Ore model	13
2.2.2.2 Spur model	13
2.2.2.3 Free volume model	14
2.3 Positron annihilation lifetime theory	16
2.4 Structure of polymers	22
2.5 High voltage on polymers	22
2.5.1 Partial discharges	22
2.5.2 Internal discharges	25
2.5.3 Surface discharges	26
2.6 Gases in polymers	29
2.6.1 Dual- mode transport model	31
2.7 Polymer samples	35
2.7.1 Epoxy	35

<b>Subject</b>	<b>Page</b>
2.7.2 Polyethylene	36
2.7.3 Poy(1-(trimethylsilyl)-1-propyne)	38
2.8 Minerals: Gypsum structure	39
2.8.1 Phases of gypsum	44
<b>Chapter 3: Experimental Techniques</b>	47
3.1 Positron Annihilation Lifetime Technique (PAL)	47
3.1.1 Positron source	47
3.1.2 Scintillator	50
3.1.3 Photomultiplier tube	51
3.1.4 Constant fraction discriminator	51
3.1.5 Time-to-amplitude convertor	53
3.1.6 Multichannel analyzer	53
3.2 Adjustment Procedure	53
3.2.1 Combination of TAC and MCA/PC	54
3.2.2 Photomultiplier tube	54
3.2.3 Time definition electronics	55
3.3 Gas loading and desorption apparatus	56
3.4 High voltage	59
3.5 Lifetime spectra analysis	61
3.5.1 Finite term lifetime analysis (PATFIT)	61
3.5.2 Continuous lifetime analysis (CONTIN)	63
3.6 Artificial Spectra	66
<b>Chapter 4: Results and Discussion</b>	79
4.1 Effect of the electric field	79

<b>Subject</b>	<b>Page</b>
4.1.1 Epoxy	80
4.1.2 High density polyethylene	88
4.1.3 Discussion	96
4.2 Effect of gases in polymer	99
4.2.1 Polyethylene	104
I) Effect of CO <sub>2</sub> on HDPE and LDPE	104
II) Effect of CH <sub>4</sub> on HDPE	111
III) Effect of Helium on HDPE	114
4.2.2 Comparison between effects observed for CO <sub>2</sub> and CH <sub>4</sub> on PTMSP	117
4.2.3 Discussion	124
4.3 Gypsum	125
4.3.1 Annealing at 100°C	125
4.3.2 Annealing at 90°C	130
4.3.3 Discussion	138
4.4 Conclusion	139
<b><u>Summary</u></b>	143
<b><u>References</u></b>	147
<b><u>Arabic Summary</u></b>	153
