

**AN EXPERIMENTAL INVESTIGATION OF THE
EFFECT OF THE CONTRACEPTIVE DRUG “DIANE “
AND THE ORGANOPHOSPHORUS INSECTICIDE
“CYANOX” ON RAT TISSUES**

THESIS SUPERVISORS

PROF.DR . MAHMOUD A.EL-BANHAWY

PROFESSOR OF EXPERIMENTAL ZOOLOGY

FACULTY OF SCIENCE , AIN SHAMS UNIVERSITY

PROF.DR. MOHAMED A.ABO HASHISH

PROFESSOR OF HISTOCHEMISTRY

NATIONAL RESEARCH CENTER

CONTENTS

	PAGE
INTRODUCTION	1
AIM OF THE WORK	5
REVIEW OF LITERATURE	7
MATERIAL AND METHODS	39
I The Experimental Animals	40
II The compounds used :	40
- A- Oral contraceptive pills	40
- B- Organophosphorus insecticide compound.	40
III Animals Treatments	40
- Experimental procedures	40
- Serum Preparation.	40
- Blood-free liver perfusion.	40
- Preparation of liver protein homogenate and serum .	40
- Preparation of liver and heart homogenate for lactate dehydrogenase isoenzyme LDH isoenzymes.	41

- Preparation of liver lipoprotein homogenate.	41
- Electrophoresis	42
- Preparation of the gel mould.	42
- Preparation of the gel for determining serum and liver proteins	43
- Preparation of gradient polyacrylamide gel 4-30%.	44
- Separation of proteins.	45
- Staining of proteins	45
- Destaining	46
- Drying	47
- Scanning	47
Preparation of the gel for separation LDH-isoenzymes.	48
- Preparation of 5.5% polyacrylamide gel.	48
- Separation run	48
- Staining.	49
- Destaining	49

- Drying.	49
- Scanning.	49
preparation of cellulose acetate for detecting lipoproteins	50
Separation run.	50
- Staining of lipoproteins .	50
- Scanning.	51
Estimation of total proteins	52
Protein standard solution.	52
Determination of γ globulins.	54
Estimation of lactate dehydrogenase activity	54
Estimation of succinate dehydrogenase activity.	55
RESULTS AND OBSERVATIONS	56
DISCUSSION	118
SUMMARY AND CONCOLUSIONS	130
REFERENCES	133
ARABIC SUMMARY	

List of Tables

	Page
Table 1: Effect of oral contraceptive pills (Diane) on serum protein fractions of Wister rats at different durations (1-6) months.	57
Table 2: Effect of oral contraceptive pills (Diane) on Liver protein fractions of Wister rats at different durations (1-6) months.	58
Table 3: Effect of the Organophosphorous insecticide (Cyanox) on serum protein fractions of Wister rats at different durations (1-4) weeks.	65
Table 4: Effect of the organophosphorous insecticide (Cyanox) on liver protein fractions of Wister rats at different durations (1-4) weeks.	66
Table 5 : Effect of oral contraceptive pills (Diane) on total proteins (Serum & Liver) and γ globulin of Wister rats at different durations (1-6) months.	71
Table 6 : Effect of the organophosphorous insecticide (Cyanox) on total Proteins (Serum & Liver) and γ globulin of Wister rats at different durations (1-4) weeks.	75
Table 7: Effect of oral contraceptive pills (Diane) on the electrophoretic profile of LDH-isoenzymes in serum of Wister rats at different durations (1-6) months.	78
Table 8 : Effect of oral contraceptive pills (Diane) on electrophoretic profile of LDH-isoenzymes in	

	heart of Wister rats at different durations (1-6) months.	82
Table 9 :	Effect of oral contraceptive pills (Diane) on the electrophoretic profile of LDH-isoenzymes in liver of Wister rats at different durations (1-6) months.	86
Table 10 :	Effect of the organophosphours insecticide (Cyanox) on the electrophoretic profile of LDH-isoenzymes in serum of Wister rats at different durations (1-4) weeks.	90
Table 11 :	Effect of the organophosphours insecticide (Cyanox) on the electrophoretic profile of LDH-isoenzymes in heart of Wister rats at different (1-4) weeks.	93
Table 12 :	Effect of the organophosphours insecticide (Cyanox) on the electrophoretic profile of LDH-isoenzymes in the liver of Wister rats at different durations (1-4) weeks.	96
Table 13 :	Effect of oral contraceptive pills (Diane) on lactate and succinate dehydrogenase enzymatic activities (LDH) and (SDH) in the Liver homogenate of Wister rats at different durations (1-6) months.	100
Table 14 :	Effect of the organophosphorous insecticide (Cyanox) on lactate and succinate dehydrogenase enzymatic activities (LDH) and (SDH) of Wister rats at different durations (1-4) weeks.	103

Table 15:	Effect of oral contraceptive pills (Diane) on serum lipoprotein fractions of Wister rats at different durations (1-6) months.	106
Table 16:	Effect of oral contraceptive pills (Diane) on liver lipoprotein fractions of Wister rats at different durations (1-6) months.	109
Table 17:	Effect of the organophosphorous insecticide (Cyanox) on serum lipoprotein fractions of Wister rats at different durations (1-4) weeks.	112
Table 18 :	Effect of the organophosphorous insecticide (Cyanox) on liver lipoprotein fractions of Wister rats at different durations (1-4) weeks.	113
Table 19 :	Effect of the administration of oral contraceptive pills (Diane) and organophosphorus compound (Cyanox) on the Mean body and liver weights and the liver/body weight ratio.	117

List of Figures

	Page
Fig. (1) Standard curve of protein.	53
Fig. (2) Gel acrylamide plates stained for fractionated proteins of control rat serum.	59
Fig (3) Concentration of serum protein fractions of control and Diane - treated rats at different durations (1-6) months.	60
Fig (4) Gel acrylamide plates stained for fractionated serum proteins of Diane - treated rats at different duration (1-3) months.	61
Fig (5) Gel acrylamide plates stained for fractionated serum proteins of Diane -treated rats at different duration (4-6) months.	62
Fig (6) Concentration of liver protein fractions of control and Diane - treated rats at different durations (1-6) months.	63
Fig (7) Concentration of serum protein fractions of control and Cyanox - treated rats at different durations (1-4) weeks.	67
Fig (8) Gel acrylamide plates stained for fractionated serum proteins of Cyanox-treated rats at different durations (1-4) serum proteins.	68

- Fig (9) Concentration of liver protein fractions of control and Cyanox-treated rats at different durations (1-4) weeks. 69
- Fig (10) Total protein (serum - liver) concentration of control and Diane - treated rats at different durations (1-6) months. 72
- Fig (11) γ globulin concentrations of control and Diane - treated rats (1-6) months and Cyanox - treated rats (1-4) weeks. 73
- Fig (12) Total protein (serum & liver) concentrations of control and Cyanox - treated rats at different durations (1-4) weeks. 76
- Fig (13) Electrophoretic Profile of lactate dehydrogenase isoenzymes of control rats (Serum (S) - Heart (H) - Liver (L)). 79
- Fig (14) Electrophoretic profile of lactate dehydrogenase isoenzymes of Diane - treated rats (Serum (S) - Heart (H) - Liver (L)) (1-3) months. 83
- Fig (15) Electrophoretic profile of lactate dehydrogenase isoenzymes of Diane - treated rats (Serum (S) - Heart (H) - Liver (L)) (4-6) months. 87
- Fig (16) Electrophoretic profile of the percent contribution of LDH - isoenzymes in serum of control and Diane - treated rats at different duration (1-6) months. 80
