

INTRAOCULAR PRESSURE IN SILICONE OIL FILLED EYES

Thesis Submitted For Partial
Fulfillment of M.D. Degree in
Ophthalmology

By

Ahmed Abdalla Darwish

1992**

Handwritten notes in Arabic script, including a signature and the date 1495/1/10.

TO MY PARENTS
WIFE AND
DAUGHTERS

ACKNOWLEDGEMENT

I wish to express my sincere thanks and my deep gratitude and appreciation to Prof Dr. **MOHAMED OMAR RASHED** Professor of Ophthalmology, Ain Shams University, for his valuable assistance, generous help, elaborate suggestions, kind supervision and continuous encouragement throughout the whole work.

I am also deeply indebted to Prof. Dr. **ALIA NASSAR** Professor of Anatomy and head of Anatomy Department, Ain Shams University for her constructive supervision, generous advice and constant help in doing this work.

I would also like to express my thanks Dr **EZZ EL-DIN H. HELIL**, Assistant Professor of Anatomy, Ain Shams University for providing me with knowledge and experience necessary for achieving this work.

I wish also to thank Dr. **AHMED ABO EL-NAGA**, Assistant Professor of Ophthalmology, Ain Shams University for his valuable advice and suggestion.

Finally, I would like to express my thanks to all Professors and Staff members of the Ophthalmology Department, Ain Shams University for their help and support during this work.

CONTENTS

	<u>Page</u>
* REVIEW OF LITERATURE	
- Silicone oil:	
* Historical review.....	1
* Chemical properties.....	2
* Physical properties.....	5
- Variation in IOP in Silicone Oil Filled eyes...	16
- Anterior segment findings related to IOP changes in silicone oil filled eyes.....	25
- Posterior segment findings related to IOP changes in silicone oil filled eyes.....	31
- Light microscopy of the angle in silicone oil induced glaucoma.....	32
- Electron microscopy of the angle in silicone oil induced glaucoma.....	33
- Management of abnormal IOP :	
a. Management of glaucoma.....	34
b. Management of hypotony.....	45
* AIM OF THE WORK.....	46
* MATERIAL AND METHODS.....	47
* RESULTS.....	72
* DISCUSSION	229
* CONCLUSION.....	306
* SUMMARY	309
* REFERENCES.....	316
* ARABIC SUMMARY.....	-

LIST OF FIGURES

	Page
Figs. 1 & 2	Importance of lower peripheral iridectomy...20
Fig. 3	Pupillary block in phakic eye..... 21
Figs. 4 & 5	Superior versus lower peripheral iridec- tomy..... 29
Figs. 6 & 7	Silicone oil behaviour when the lower peri- pheral iridectomy is obstructed..... 30
Fig. 8	Method (1) of removal of silicone oil from the eye..... 40
Figs. 9 & 10	Method (2) of removal of silicone oil from the eye..... 42
Fig. 11	Silicone oil face seen by the Goldmann-3- mirror contact lens..... 52
Fig. 12	The Shin-Nippon SL-202 P photo slit lamp.. 55
Fig. 13	The Topcon (TRC - 50 VT) fundus camera... 57
Fig. 14	The automated computerized field analyzer (Humphrey field analyzer model 620)..... 58
Fig. 15	VISULAS Nd : YAG laser..... 63
Fig. 16	Postoperative hyphema with secondary rise in ocular tension..... 76
Figs. 17 & 18	Pupillary block in aphakic..... 77
Fig. 19	Silicone oil prolapse into the anterior chamber after obstruction of the lower peripheral iridectomy..... 85

		Page
Figs. 20 & 21	Importance of iris sutures in case of a wide superior iridectomy.....	90
Fig. 22	Iris sutures in case of traumatic mydriasis.....	92
Figs.23 & 24	Emulsified silicone oil in the angle of anterior chamber.....	100
Fig. 25	Emulsified silicone oil seen in the red reflex.....	101
Fig. 26	Emulsified silicone oil in the posterior pole	101
Fig. 27 & 28	Silicone oil in the anterior chamber of a phakic eye.....	117
Fig. 29	Postvitrectomy atrophía bulbi.....	119
Figs. 30 & 31	Inflammatory pupillary membrane and its response to medical treatment.....	120
Fig. 32	Peripheral anterior synechiae (PAS) in the angle.....	124
Fig. 33	Rubeosis iridis in an aphakic silicone oil filled eye.....	133
Figs. 34-43	Fields of vision of samples of the glaucomatous eyes.....	136-153

	Page
Figs; 44 & 45 Effect of YAG laser lower iridotomy on silicone oil that prolapsed into the anterior chamber.....	164
Figs. 46 & 47 Overfill in aphakic.....	170
Figs. 48 & 49 Removal of emulsified silicone oil from the eye.....	172
Fig. 50 Pupillary membrane following cyclocryo- therapy.....	179
Figs. 51-66 Light micrographs of the trabecular mesh- work in silicone oil induced glaucoma cases.....	191-206
Figs. 66 & 88 Transmission electron micrographs of the trabecular meshwork of the same silicone oil induced glaucoma cases.....	207-228

LIST OF ABBREVIATIONS

BSS	= Balanced salt solution
Cm	= Centimeter
CS	= Centistokes
dB	= deci Bell
gm	= gram
IOP	= Intraocular pressure
OT	= Ocular tension
p	= poise
PVR	= proliferative vitreoretinopathy
RD	= retinal detachment
&	= and
ppm.	= parts per unit of weight
C.G.S.	= centimeter, gram, second
sec.	= second
esp.	= especially
ptn.	= patient
ttt	= treatment.

LIST OF GRAPHS

	Page
Histogram (1) Comparison between the various groups as regards the risk of silicone oil prolapse into the anterior chamber:.....	96
Histogram (2) Risk of silicone oil prolapse into the anterior chamber.....	98
Histogram (3) Influence of silicone oil viscosity on its emulsification.....	107
Histogram (4) Influence of uveitis on emulsification in the 1000 cs group.....	110
Histogram 5 Influence of uveitis on emulsification in all the cases included in the study.....	112
Histogram 6 Effect of the presence or absence of the crystalline lens on the incidence of glaucoma	114
Histogram 7 Influence of trauma on the incidence of uveitis.....	125

		Page
Histogram 8	Influence of the timing and technique of cataract extraction on the incidence of uveitis.....	128
Histogram 9	Contribution of the various etiologies in glaucoma, hypotony and normal tension.....	130
Histogram 10	Variation in ocular tension in the various etiologic subgroups...	131
Histogram 11	Efficiency of YAG versus surgical lower iridectomy.....	168
Histogram 12	Percentage of cases that needed antiglaucoma drugs after silicone oil removal, cyclocryotherapy and subcleral trabeculectomy.....	185
Curve (1)	Degree of intraocular pressure control following silicone oil removal cyclocryo and subcleral trabeculectomy.....	186

LIST OF TABLES

1.	Review of literature table:	Page
	Incidence of glaucoma and hypotony in silicone oil filled eyes in various studies.....	16
2.	Results tables:	Page
	Table 1 : Original indication for surgery...	73
	Table 2 : Variation of ocular tension in silicone oil filled eyes.....	73
	Table 3 : Cases that had glaucoma in the early postoperative period.....	75
	Table 4 : Cases that had a late rise in intra-ocular pressure.....	79
	Table 5 : Cases that had an obstructed lower peripheral iridectomy.....	82
	Table 6 : Cases that had a lower sector iridectomy.....	86
	Table 7 : Cases that had an upper sector iridectomy.....	88
	Table 8 : Cases that had a big iris defect ...	91
	Table 9 : Cases that had a patent lower peripheral iridectomy and silicone oil prolapsed into the anterior chamber..	94
	Table 10 : Comparison between the various groups as regards the risk of silicone oil prolapse into the anterior chamber..	95

	<u>Page</u>
Table 11 : Risk of silicone oil prolapse into the anterior chamber.....	96
Table 12 : Eyes that had glaucoma secondary to silicone oil emulsification.....	99
Table 13 : Influence of silicone oil viscosity on its emulsification.....	107
Table 14 : Incidence of emulsification in the 1000 cs group in cases that had uveitis as compared to cases that did not have uveitis.....	109
Table 15 : Influence of uveitis on emulsification in all the cases in the study.....	111
Table 16 : Effect of presence or absence of the crystalline lens on the incidence of glaucoma.	113
Table 17 : Silicone oil filled eyes that developed hypotony.....	118
Table 18 : Eyes that developed marked postoperative uveitis.....	122
Table 19 : Influence of trauma on the incidence of uveitis.....	125

Table 20	: Influence of the number of surgeries on the incidence of uveitis.....	126
Table 21	: Influence of the timing and technique of cataract extraction on the incidence of uveitis.....	128
Table 22	: Influence of original etiology on ocular tension.....	129
Table 23	: Influence of rubeosis iridis on ocular tension..	132
Tables 24 & 25	: Statistical analysis of the visual fields..	138 – 144
Table 26	: Glaucomatous eyes first treated by anti- glaucoma drugs.....	158
Table 27	: Cases treated by Nd: YAG laser iridotomy.	163
Table 28	: Cases treated by surgical lower peri- pheral iridectomy.....	166
Table 29	: Comparison between the efficiency of YAG versus surgical iridectomy in silicone oil filled eyes.....	167
Table 30	: Cases from which excess silicone oil was removed.....	169
Table 31	: Cases from which silicone oil was totally removed.....	171
